- Blue backlit display for easy reading in low light.
- Memory function for 30 previous measurements.
- Quick measurement in seconds.
- Displays date and time.
- Switchable between Celsius (°C) and Fahrenheit (°F).

## SETUP

### Battery Installation

1. Locate the battery compartment cover, usually on the back or side of the device.
2. Slide or gently pry open the cover.
3. Insert the required batteries (e.g., 2 x AAA) according to the polarity indicators (+/-) inside the compartment.
4. Close the battery compartment cover securely.

The thermometer is battery-operated. Ensure fresh batteries are used for optimal performance.

## OPERATING INSTRUCTIONS

### Powering On/Off

- To power on, press the **Power button** (often marked with  or a similar symbol). The display will light up.
- The device will automatically turn off after a period of inactivity to conserve battery life. You can also manually turn it off by pressing and holding the Power button.

### Setting Date and Time

Refer to the specific instructions in your device's full manual for detailed steps on setting the date and time, as this often involves pressing and holding the 'M' (Memory) or 'S' (Set) button while the device is off or in a specific mode.

### Selecting Measurement Unit (°C/°F)

With the device powered off, press and hold the 'M' (Memory) button for a few seconds until the unit changes. Release the button when your desired unit (°C or °F) is displayed.

### Taking a Measurement

1. **Ear Measurement:** Gently insert the thermometer tip into the ear canal. Ensure a snug fit. Press the measurement button. The result will appear in seconds.

2. **Forehead Measurement:** Position the thermometer near the center of the forehead, ensuring good contact. Press the measurement button.

3. **Object/Liquid Measurement:** Point the thermometer at the object or liquid surface (do not immerse). Press the measurement button.

4. After the measurement, the result will be displayed on the blue backlit screen.

### Fever Alarm

The thermometer features an optical fever alarm:

- **Red Light:** Indicates a fever, typically for temperatures at or above 38 °C (100.4 °F).
- **Green Light:** Indicates a normal temperature.

### Memory Function

The device stores up to 30 previous measurements. To access them, press the 'M' (Memory) button while the device is on. Each press will cycle through the stored readings, displaying the most recent first.

### MAINTENANCE AND CARE

- **Cleaning:** After each use, especially for ear measurements, clean the thermometer tip with an alcohol swab or a cotton swab moistened with alcohol. Do not immerse the device in water or other cleaning solutions.
- **Storage:** Store the thermometer in a clean, dry place at room temperature, away from direct sunlight and extreme temperatures.
- **Battery Replacement:** When the low battery indicator appears on the display, replace all batteries with new ones of the same type. Dispose of used batteries according to local regulations.
