### AQUA CREST AQF-FF27

# AQUA CREST DA29-00020B Refrigerator Water Filter Instruction Manual

Model: AQF-FF27

## PRODUCT OVERVIEW

The AQUA CREST DA29-00020B replacement refrigerator water filter is designed to provide clean, great-tasting water by reducing various impurities. This filter utilizes a multi-stage filtration process, including a PP cotton layer for particle capture and an advanced coconut shell carbon block for chemical reduction. It is certified by NSF International against NSF/ANSI Standard 42 and 372 for the reduction of chlorine, taste, odor, and low lead.

Image: AQUA CREST DA29-00020B Refrigerator Water Filters. This image displays three AQUA CREST water filters, highlighting their design and branding.

## Key Features

- **Advanced Filtration:** Filters impurities layer by layer, including suspended particles, copper, VOCs, THM, chromium, and chlorine.
- **NSF Certified:** Independently tested and certified by NSF International against NSF/ANSI Standard 42 for chlorine,

taste, and odor reduction, and NSF/ANSI 372 for low lead.

- **High-Quality Material:** Made with 100% selected coconut shell carbon block for efficient filtration.
- **Easy Installation:** Designed for quick and DIY replacement without professional assistance.
- **Leak-Proof Design:** Features double protection to prevent water leakage.
- **Compatibility:** Compatible with various Samsung refrigerator models (see full list in Specifications).

## SETUP AND INSTALLATION

---

Follow these steps to correctly install your AQUA CREST water filter. Ensure your refrigerator is compatible with the DA29-00020B (HAF-CIN) filter model. This filter is round, not square, and is not compatible with DA97-17376B (HAF-QIN).

# Choose Correct Model for Your Refrigerator

DA29-00003G  
HAFCU1

AQF-FF45  
DA97-17376B  
HAF-QIN

**Image:** Choose Correct Model for Your Refrigerator. This image illustrates the correct filter model (AQF-FF46 / DA29-00020B / HAF-CIN) and highlights incompatible models like AQF-FF11B (DA29-00003G / HAFCU1) and AQF-FF45 (DA97-17376B / HAF-QIN).

1. **Locate the Filter Compartment:** Open your refrigerator and locate the water filter compartment, typically found in the upper right corner of the fresh food section or in the CoolSelect Pantry drawer.
2. **Remove the Old Filter:**
  - If your refrigerator has a filter cover, lift it up.
  - Turn the old filter handle counter-clockwise to the "unlock" position.

- Pull the old filter straight out to remove it. Some water may drip, so have a towel ready.

3. **Prepare the New Filter:** Remove the new AQUA CREST filter from its packaging.

4. **Insert the New Filter:**

- Align the new filter with the filter housing.
- Push the filter firmly into the housing until it stops.
- Turn the filter handle clockwise to the "lock" position. Ensure it is securely seated to prevent leaks.

5. **Reset Filter Indicator:** After replacing the filter, reset the filter indicator on your refrigerator. Refer to your refrigerator's manual for specific instructions, or typically, press and hold the "Filter Reset" button for 3-5 seconds. For Samsung Family Hub models, navigate to Fridge Manager > Settings > Water filter, then tap Reset.

# Easy Installation

Quick  
Set-up

DIY  
Replacement

No Professional  
Needed

**Image:** Easy Installation. This image illustrates the simplicity of installing the AQUA CREST water filter, emphasizing its quick and DIY-friendly nature.

## OPERATION

After installing the new filter, it is crucial to flush the system to ensure optimal performance and remove any trapped air or carbon fines.

1. **Flush the System:** Run water from the dispenser for approximately 5 minutes at 0.5 gallons per minute (about 2.5

gallons total). This helps to clear the system, activate the filter media, and prevent sputtering.

2. **Check for Leaks:** Visually inspect the filter area for any signs of water leakage. If leaks are present, re-seat the filter and ensure it is properly locked.

## Better Filtration, Better Taste

Effectively reduces harmful substance and improves the taste of the water.

Rust

Color

Chlorine

Sediment

Taste & Odor

\*Tested by a third party laboratory.

**Image:** Better Filtration, Better Taste. This image visually compares unfiltered water to filtered water, illustrating the effectiveness of the AQUA CREST filter in improving water clarity and taste.

## MAINTENANCE

Regular filter replacement is essential for maintaining water quality and the longevity of your refrigerator's water dispensing system.

- **Replacement Frequency:** It is recommended to replace your water filter every 6 months or after filtering 300 gallons of water, whichever comes first. This ensures consistent water quality and prevents reduced flow rates.
- **Monitoring Filter Life:** Your refrigerator's filter indicator light will typically signal when it's time for a replacement. Always reset the indicator after installing a new filter.

# No Leakage

Double protection prevent water leakage.

**Image:** No Leakage. This image highlights the secure design of the filter's connection, emphasizing its leak-proof features and proper fit for efficient water flow.

If you encounter any issues with your AQUA CREST water filter, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
<b>Slow Water Flow</b>	Clogged filter, air trapped in the system, or low water pressure.	<ul style="list-style-type: none"><li>◦ Flush the system for 5 minutes after installation.</li><li>◦ Ensure the filter is correctly installed and locked.</li><li>◦ Check if it's time to replace the filter (every 6 months).</li><li>◦ Verify household water pressure.</li></ul>
<b>Water Leaks</b>	Improperly installed filter, damaged O-rings, or incorrect filter model.	<ul style="list-style-type: none"><li>◦ Remove and re-install the filter, ensuring it is fully seated and locked.</li><li>◦ Check the O-rings on the filter for any damage.</li><li>◦ Confirm you are using the correct filter model (DA29-00020B / HAF-CIN).</li></ul>
<b>Bad Taste or Odor</b>	New filter not flushed, expired filter, or external water quality issue.	<ul style="list-style-type: none"><li>◦ Flush the new filter thoroughly (2.5 gallons).</li><li>◦ Replace the filter if it has been in use for more than 6 months.</li><li>◦ If issues persist, consult a plumbing professional to check your home's water supply.</li></ul>
