## 5. OPERATION

1. **Receiving Audio:** Once connected, audio from your radio will be transmitted directly through the earpiece. Adjust your radio's volume for comfortable listening.
2. **Transmitting Audio (PTT):** To speak, press and hold the PTT button located on the earpiece cable. Speak clearly into the microphone. Release the PTT button when you are finished speaking to return to receive mode.
3. **Testing Communication:** Before critical use, perform a communication test with another radio user to ensure clear audio transmission and reception.

## 6. MAINTENANCE

- **Cleaning:** Regularly wipe the earpiece and cable with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the earpiece in a clean, dry place away from extreme temperatures and direct sunlight. Avoid tangling the cable.
- **Inspection:** Periodically inspect the cable and connectors for any signs of wear or damage. Replace the earpiece if any damage is observed to ensure safe and effective operation.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
No audio from earpiece.	Earpiece not fully connected; radio volume too low; radio not powered on.	Ensure the 2-pin connector is fully inserted. Increase radio volume. Power on the radio.
Unclear or distorted audio.	Loose connection; microphone too far/close; radio interference.	Check connection. Adjust microphone position. Move away from sources of interference.
PTT button not working.	Faulty PTT button; incorrect radio settings.	Test with another earpiece if available. Verify radio settings for external PTT.
