

weBoost 470510

weBoost Drive 4G-X OTR (470210) Truck Cell Phone Signal Booster

User Instruction Manual

1. INTRODUCTION

The weBoost Drive 4G-X OTR is a powerful cell phone signal booster designed to enhance cellular connectivity for all types of trucks, including semis and pickup trucks, as well as for off-road enthusiasts in remote areas. This manual provides essential information for the proper installation, operation, and maintenance of your device to ensure optimal performance.

The system amplifies cell signals from all major U.S. carrier networks, including Verizon, AT&T, Sprint, T-Mobile, and U.S. Cellular, supporting bands 4, 5, 12/17, 13, and 2. It is engineered to provide fewer dropped calls, better voice quality, faster data speeds, increased hotspot capability, and improved audio and video streaming while on the road.

Figure 1.1: The weBoost Drive 4G-X OTR system components. This image displays the main booster unit, the external trucker antenna, the power supply, and the product box, highlighting its 5G compatibility and U.S. design and assembly.

2. WHAT'S IN THE BOX

Please verify that all components are present before beginning installation:

- Drive 4G-X Booster
- 4G Trucker Mirror Mount antenna
- DC/DC 6V/2A power supply
- Slim low profile antenna (internal antenna)
- 3 way mount

3. SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance of your weBoost Drive 4G-X OTR. Follow these general steps. For detailed, step-by-step instructions, refer to the official User Guide PDF linked in the Support section.

3.1 External Antenna Placement

Mount the 4G Trucker Mirror Mount antenna on the exterior of your truck. Choose a location that is as high as possible and clear of obstructions. The included 3-way CB antenna mount and mast extension can assist with flexible placement.

Figure 3.1: External antenna mounted on a truck. This image shows the omnidirectional, weather-resistant 17-inch antenna installed on the side of a large truck, emphasizing its ability to provide reliable cell signal wherever work takes you.

3.2 Internal Antenna Placement

Place the slim low profile antenna inside the vehicle, typically on the dashboard or near the area where you will be using your mobile device. Ensure there is sufficient separation between the external and internal antennas to prevent oscillation.

3.3 Booster Unit Connection

Connect the external antenna cable to the designated port on the Drive 4G-X Booster. Then, connect the internal antenna cable to its respective port on the booster unit.

3.4 Power Connection

Connect the DC/DC 6V/2A power supply to the booster unit and then plug it into your vehicle's power outlet (e.g., cigarette lighter socket). The booster will power on automatically.

3.5 Using the weBoost App for Installation

For easier installation and troubleshooting, download the official weBoost App. It provides step-by-step video guides, an antenna positioning guide, and allows you to see before-and-after signal readings.

Easily install and troubleshoot your weBoost.

Get the weBoost App:

- Watch step-by-step videos
- Use the antenna positioning guide
- See before-and-after readings

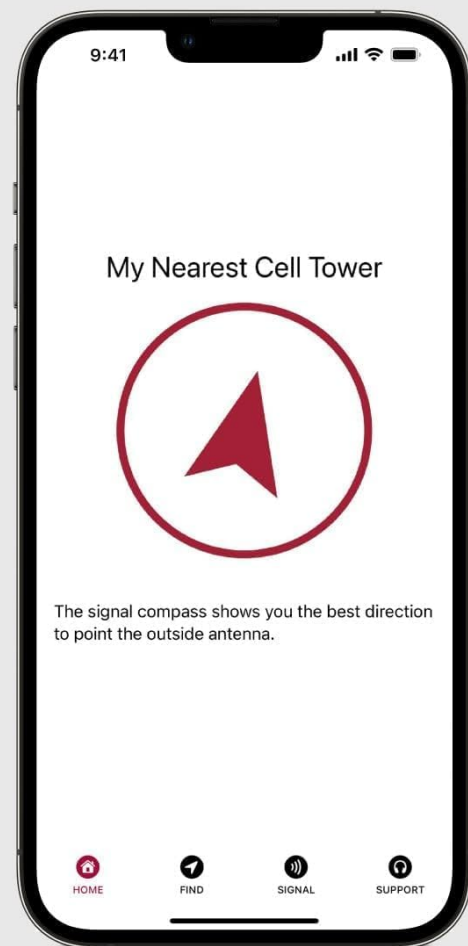

Figure 3.2: The weBoost App interface. This image illustrates how the app helps users easily install and troubleshoot their weBoost device by providing step-by-step videos, an antenna positioning guide, and signal readings.

4. OPERATING INSTRUCTIONS

Once installed and powered on, the weBoost Drive 4G-X OTR operates automatically. The booster will detect available cellular signals, amplify them, and rebroadcast them inside your vehicle.

- **Signal Indicator:** The booster unit typically has an LED indicator that shows its operational status. Refer to the full user manual for specific LED patterns and their meanings.
- **Device Placement:** For best results, keep your mobile device within the coverage area of the internal antenna. The closer your device is to the internal antenna, the stronger the boosted signal will be.
- **Multi-User Functionality:** The Drive 4G-X OTR supports multiple users simultaneously, allowing all passengers to benefit from the boosted signal.

5. MAINTENANCE

The weBoost Drive 4G-X OTR is designed for durability and requires minimal maintenance. However, regular checks can ensure its longevity and optimal performance.

- **Cable Connections:** Periodically check all cable connections to ensure they are secure and free from damage.
- **Antenna Condition:** Inspect the external antenna for any physical damage, especially after long trips or exposure to harsh weather conditions. Ensure it remains firmly mounted.
- **Cleaning:** Clean the booster unit and antennas with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Software Updates:** While not typically user-updatable, ensure your device is registered with weBoost for any potential firmware updates or important notifications.

6. TROUBLESHOOTING

If you experience issues with your weBoost Drive 4G-X OTR, try the following troubleshooting steps:

- **No Signal Improvement:**
 - Ensure all connections are secure.
 - Verify the power supply is working and the booster is powered on (check LED indicator).
 - Increase the separation distance between the external and internal antennas.
 - Reposition the external antenna for better signal reception from the nearest cell tower.
 - Confirm there is at least one bar of existing signal outside the vehicle for the booster to amplify.
- **Flashing Lights on Booster:**
 - Refer to the full user manual for specific flashing light patterns, as they often indicate oscillation (feedback loop) or other operational issues.
 - Increasing antenna separation is a common solution for oscillation.
- **Poor Voice Quality or Data Speeds:**
 - Ensure your mobile device is close to the internal antenna.
 - Check for any physical obstructions between your device and the internal antenna.

If problems persist after attempting these steps, please contact weBoost customer support.

7. SPECIFICATIONS

Feature	Detail
Model Number	470510
Product Dimensions	21.75 x 1.5 x 3.5 inches
Item Weight	5 pounds
Connectivity Technologies	Wireless
Wireless Communication Standard	Radio Frequency
Connector Type	SMA Female
Power Supply	DC/DC 6V/2A
Supported Bands	4, 5, 12/17, 13, 2
Max Gain	Up to 50 dB
Uplink Power	Up to 24.8 dBm
Downlink Power	Up to 2.9 dBm

8. WARRANTY AND SUPPORT

weBoost products are designed, engineered, and assembled in the USA, ensuring high quality and reliability. They are certified by the FCC and authorized by every cellular carrier in the US, Canada, and Mexico, and are 5G compatible.

02

DESIGNED, ASSEMBLED
AND SUPPORTED
IN THE USA.

All weBoost products are designed, engineered and assembled in the USA so you can rest assured that our systems would never attempt to access your voice and data.

Figure 8.1: Commitment to USA design and assembly. This image highlights weBoost's dedication to designing, engineering, and assembling all products in the USA, ensuring quality and data privacy.

weBoost offers a 30-day money-back guarantee. If you are not satisfied with your purchase, you may return it within 30 days.

WORK TRUCK
SKU 4710061

KEY FEATURES

- Boosts 4G LTE & 3G for multiple people in a vehicle, boat, truck, van, RV or boat
- For multiple devices and users
- Works on ALL cellular devices with ALL carriers simultaneously
- Enhances talk, text, and high-speed 4G LTE internet

Kit Includes

- Drive 4G-X
- 4" High Gain Antenna
- 4G LTE Low Power Amplifier
- Power Supply

About

weBoost's Drive 4G-X is our most powerful professional-grade 4G vehicle cell phone signal booster. Commonly used by first responders throughout North America to boost signals while out on the road with 4G LTE signal strength, the Drive 4G-X is the most powerful 4G vehicle cell phone signal booster available. It's the only 4G vehicle cell phone signal booster that can boost signals up to 32x and enhance 4G LTE and 3G signals for everyone in the vehicle whether it's a car, truck, van or RV.

Specifications

Feature	Specification
Carrier	AT&T, Sprint, T-Mobile, US Cellular, Straight Talk and more
Frequency	700 MHz, 850 MHz, 1900 MHz, 2100 MHz
Power	30W

stay connected

DRIVE 4G-X

weBoost brings seamless, uninterrupted cellular connectivity for everyone in your vehicle. Cell phones are an essential part of our lives - especially when we're on the go.

Whether around town or on a long road trip, the weBoost Drive 4G-X cellular signal booster is a simple, effective solution to maintain continuous communication for all cell-phone-enabled devices - smartphones, tablets, GPS in your car, truck, van or RV.

Installation is easy - no tools needed. A step-by-step video guide gets you through the process. No special tuning or alignment is required.

weBoost improves your coverage—including 4G—no matter which cellular carrier you use in the United States and Canada. The Drive 4G-X continuously monitors multiple antennas connected across multiple carriers, ensuring effectiveness across and data communications for all users.

We're Raising the Bar on Cell Signal Coverage

ABOUT WEBOOST® CELL SIGNAL BOOSTERS FOR HOME, OFFICE, OR ON THE GO

weBoost is one of the nation's leading manufacturers of consumer cell signal boosters. From your home to your workplace or even on your car, our boosters are designed to provide you with the most powerful cell signal possible—on wheels and approved by the FCC.

Put us and us to shaped calls, internet, texts, and more. Put us and us to shaped calls, internet, texts, and more. Put us and us to shaped calls, internet, texts, and more.

weBoost cell signal boosters show three great features:

- Boost 4G LTE/3G cell signal, data, voice, text
- Support all cell carriers, all major cell carriers
- Patented automatic gain control technology
- Reproducible boost signal for multiple users*

How weBoost cell signal boosters work

Everyone has experienced bad cell reception at one time or another. When a weak signal is received, the booster system amplifies the signal and retransmits it to the vehicle. The booster system amplifies the signal and retransmits it to the vehicle.

EXTERNAL ANTENNA
An external antenna is mounted on the roof of the vehicle to receive the signal from the tower.

BOOSTER SYSTEM
The booster system is mounted inside the vehicle to amplify the signal.

INTERNAL ANTENNA
An internal antenna is mounted inside the vehicle to provide signal to the vehicle.

CELL TOWER
The cell tower is the source of the signal.

Drive 4G-X

SKU: 470510 MAP: \$399.99

FEATURES

- Boosts cellular signal for multiple users in any passenger vehicle--car, truck, van, or SUV.
- Works on ALL cellular devices with ALL carriers simultaneously.
- Enhances talk, text, and high-speed internet.

WARNING: This product can expose you to chemical agents. Some of these agents may cause cancer, reproductive harm, or other harm to you. For more information go to [www.hhs.gov/ohrt](#).

Kit Includes

- Drive 4G-X
- 4G LTE Antenna
- 4G LTE Antenna Mount
- 4G LTE Antenna Cable
- 4G LTE Antenna Connector

About

weboost's **Drive 4G-X** is our most powerful professional grade 4G cellular signal booster. Commonly used by first responders throughout the U.S. to boost signal while out on the road, the 4G-X ensures that you get better voice and data with fewer dropped calls, improved video quality, faster download and upload speeds, and more. It's a 4G cellular signal booster that works in every signal area. weboost's 4G-X boosters can signal up to 20 mobile devices at once in a passenger vehicle, or a car, truck, or van.

Compatible with all U.S. wireless carriers including Verizon, AT&T, T-Mobile, US Cellular, Rogers, Telcel, and more. All components needed for installation are included in the kit. An easy-to-use manual is included to help you get up and running quickly. Plug the Drive 4G-X into the car's power supply and the booster will be on the road. The Drive 4G-X comes with a 2-year warranty from manufacturer and a 30-day money back guarantee.

Drive 4G-X

SKU: 470510 MAP: \$479.99

FEATURES

- Boosts 4G LTE & 3G for multiple people in a vehicle, car, truck, van, RV or boat.
- For multiple devices and users.
- Works on ALL cellular devices with ALL carriers simultaneously.
- Enhances talk, text, and high-speed 4G LTE internet.

Kit Includes

- weBoost 4G-X
- 4" All-Directional Magnetic Mounting Bracket
- 4G LTE and 3G Power Adapter (Cables)
- Power Supply (5V/2A)

About

weBoost's **Drive 4G-X** is our most powerful, professional-grade 4G LTE and 3G signal booster. Commonly used by first responders throughout the U.S., it's the most powerful signal booster available. The Drive 4G-X ensures that you get better voice and data with fewer dropped calls, improved email speeds, better streaming video, and allows up to 2 hours additional talk time in weak signal areas. weBoost's 4G-X boosts and improves up to 30x weak 4G LTE and 3G signals for everyone in the vehicle whether it's a car, truck, van, or RV.

Compatible with all U.S. wireless carriers including Verizon, AT&T, Sprint, T-Mobile, US Cellular, Boost Mobile, and more. All components needed for installation are included as well as simple instructions for a quick, easy setup. Plug the Drive 4G-X into the car power supply, plug in the magnetic antenna on the center of the roof, and get better wireless signal on the road now.

Estamos Elevando El Nivel De Cobertura De Señal Celular 

WILSON PROBOOST / AMPLIFICADORES DE SEÑAL CELULAR PARA EL VEHICULO, LA OFICINA O EN EL CAMINO

weBoost es uno de los líderes mundiales en amplificadores de señal celular. weBoost Cellular ofrece la mejor forma de lograr un mayor nivel de cobertura de señal celular. Con los amplificadores de señal celular de weBoost, usted puede mejorar su cobertura de señal celular en su hogar, oficina o en el camino.

Para la mayoría de las aplicaciones, los amplificadores de señal celular de weBoost ofrecen una cobertura de señal celular de hasta 100 veces más que la cobertura de señal celular de un teléfono celular estándar.

Los amplificadores de señal celular de weBoost ofrecen una cobertura de señal celular de hasta 100 veces más que la cobertura de señal celular de un teléfono celular estándar.

¿Cómo funcionan los amplificadores de señal weBoost?

Solo el estado de la tecnología de señal celular puede mejorar la cobertura de señal celular en un momento u otro. Pero solo si usted conecta a un amplificador de señal celular de weBoost. Los amplificadores de señal celular de weBoost ofrecen una cobertura de señal celular de hasta 100 veces más que la cobertura de señal celular de un teléfono celular estándar.

Antena Externa
La antena externa de weBoost es la mejor para mejorar la cobertura de señal celular en su hogar, oficina o en el camino.

Aumento de la Señal Celular
El aumento de la señal celular de weBoost es la mejor para mejorar la cobertura de señal celular en su hogar, oficina o en el camino.

Antena Interna
La antena interna de weBoost es la mejor para mejorar la cobertura de señal celular en su hogar, oficina o en el camino.
