2. SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Ensure the refrigerator is properly grounded.

- Do not damage the refrigerant circuit.
- Keep ventilation openings clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not use electrical appliances inside the food storage compartments, unless they are of the type recommended by the manufacturer.
- Unplug the appliance before cleaning or performing any maintenance.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. SETUP

3.1 Unpacking

Carefully remove all packaging materials. Dispose of packaging responsibly. Check the appliance for any damage incurred during transit. Report any damage to your retailer immediately.

3.2 Placement

Place the refrigerator on a firm, level surface away from direct sunlight, heat sources (e.g., oven, radiator), and extreme cold. Ensure adequate air circulation around the appliance. Maintain a minimum clearance of 10 cm (4 inches) from the back and sides for proper ventilation.

3.3 Leveling

Adjust the front leveling feet to ensure the refrigerator is stable and level. This helps prevent vibrations and ensures proper door sealing.

3.4 Power Connection

Connect the refrigerator to a dedicated, properly grounded electrical outlet. Do not use extension cords or adapters. Allow the refrigerator to stand for at least 2-4 hours before plugging it in to allow refrigerants to settle.

3.5 Initial Cleaning

Before first use, clean the interior of the refrigerator with a mild detergent and warm water. Wipe dry thoroughly.

4. OPERATING INSTRUCTIONS

4.1 Temperature Control

Your Whirlpool TTNF9322OX features digital temperature control. Use the control panel, typically located

inside the refrigerator compartment or on the exterior door, to set the desired temperature for both the refrigerator and freezer sections. Refer to the specific icons on your appliance for precise adjustments.

4.2 Food Storage Guidelines

- **Refrigerator Compartment:** Ideal for fresh foods, dairy products, fruits, and vegetables. Utilize the dedicated vegetable/fruit drawers for optimal freshness.
- **Freezer Compartment:** Suitable for long-term storage of frozen foods. Ensure food is properly sealed to prevent freezer burn.
- Avoid placing hot food directly into the refrigerator; allow it to cool down first.
- Do not overload the shelves, allowing for proper air circulation.

4.3 No Frost System

This refrigerator is equipped with a No Frost system, which automatically prevents ice build-up in both the freezer and refrigerator compartments. This eliminates the need for manual defrosting.

5. MAINTENANCE

5.1 Cleaning the Interior

Regularly clean the interior with a solution of mild detergent and warm water. Remove shelves and drawers for thorough cleaning. Rinse and dry all parts completely before returning them to the refrigerator.

5.2 Cleaning the Exterior

Wipe the exterior surfaces with a soft cloth dampened with water and a mild detergent. For stainless steel finishes, use a specialized stainless steel cleaner. Avoid abrasive cleaners or solvents.

5.3 Door Seal Care

Inspect door seals regularly for cracks or damage. Clean them with warm water and a mild detergent to ensure they remain flexible and maintain a tight seal, which is crucial for energy efficiency.

5.4 Power Outage

In case of a power outage, keep the refrigerator doors closed to maintain the internal temperature for as long as possible. Food will remain frozen for several hours depending on the ambient temperature.

6. TROUBLESHOOTING

Before contacting service, check the following common issues:

- **Refrigerator not cooling:** Ensure the power cord is securely plugged in. Check the circuit breaker. Verify temperature settings are correct. Ensure doors are fully closed and seals are intact.
- **Unusual noises:** Some operating noises (e.g., refrigerant flowing, fan motor) are normal. Check if the appliance is level. Ensure nothing is vibrating against the back or sides.
- **Water on the floor:** Check if the drain hose is blocked or dislodged. Ensure the drip tray is correctly positioned.
- **Excessive frost in freezer:** Although it's a No Frost model, frequent door opening or a faulty door seal can lead to some frost. Ensure the door is sealing properly.

If the problem persists after checking these points, contact qualified service personnel.
