Shoei X-Fourteen Cheek Pad Set Instruction Manual

Model: 01-70724

PRODUCT OVERVIEW

The Shoei X-Fourteen Cheek Pad Set is designed to provide customizable comfort and fit for your Shoei X-Fourteen helmet. These pads are universally interchangeable across all helmet sizes, allowing for fine-tuning of the helmet's fit. The thickness of the cheek pads directly influences the fit: thinner pads create a looser fit, while thicker pads provide a tighter, more secure fit. Constructed from moisture-wicking materials, they contribute to rider comfort by managing sweat and humidity. The design facilitates easy removal and replacement for cleaning or adjustment.

INSTALLATION GUIDE

Proper installation of the cheek pads is essential for both comfort and safety. Follow these steps carefully to replace or install your Shoei X-Fourteen Cheek Pad Set.

Figure 1: The Shoei X-Fourteen Cheek Pad Set, displaying the internal structure and attachment points. Note the red accents indicating the moisture-wicking material and the black plastic base with multiple holes for secure fastening within the helmet shell.

Figure 2: A side view of the Shoei X-Fourteen Cheek Pad Set, highlighting the contoured shape designed to fit snugly against the rider's cheeks. The grey fabric and red mesh are visible, emphasizing the comfort and ventilation features.

1. **Removal (if replacing):** Gently pull the existing cheek pads away from the helmet shell. They are typically secured with snaps or clips. Locate all attachment points and carefully detach them.
2. **Identify Pad Orientation:** Each cheek pad is specific to either the left or right side of the helmet. Ensure you have the correct pad for the corresponding side.
3. **Align Attachment Points:** Position the new cheek pad inside the helmet, aligning its snaps or clips with the corresponding receptacles in the helmet's interior.
4. **Secure the Pads:** Press firmly on each attachment point until you hear or feel a click, indicating that the pad is securely fastened. Ensure all snaps are engaged.
5. **Check Fit:** Once installed, try on the helmet to assess the fit. If the fit is too loose or too tight, consider trying a different thickness of cheek pad (available separately).

MAINTENANCE AND CARE

To ensure the longevity and hygiene of your Shoei X-Fourteen Cheek Pad Set, regular cleaning is recommended.

- **Cleaning:** Remove the cheek pads from the helmet. Hand wash them gently using mild soap and lukewarm water. Avoid harsh detergents or abrasive cleaners.
- **Drying:** After washing, gently squeeze out excess water. Do not wring. Allow the pads to air dry completely in a well-ventilated area, away from direct sunlight or heat sources. Ensure they are fully dry before re-installing them into the helmet.
- **Storage:** If storing the pads separately, keep them in a clean, dry place away from extreme temperatures.

TROUBLESHOOTING

Issue: Helmet feels too loose after installing new cheek pads.

Solution: The current cheek pads may be too thin for your head shape or preference. Consider purchasing a thicker set of Shoei X-Fourteen Cheek Pads to achieve a more snug fit. Refer to the product specifications for available thickness options.

Issue: Helmet feels too tight or uncomfortable.

Solution: The current cheek pads may be too thick. Replace them with a thinner set of Shoei X-Fourteen Cheek Pads to alleviate pressure and improve comfort.

Issue: Cheek pads do not snap securely into place.

Solution: Ensure the pads are correctly oriented (left/right) and that all attachment points are aligned with the helmet's receptacles. Apply firm, even pressure until each snap engages. If issues persist, inspect both the pad's snaps and the helmet's receptacles for any damage or obstruction.

SPECIFICATIONS

Attribute	Detail
Brand	Shoei
Model Name	X-Fourteen Cheek Pad Set
Item Model Number	01-70724
Manufacturer Part Number	0204-4005-35
Material	Acrylonitrile Butadiene Styrene (ABS)
Item Weight	0.01 ounces
Product Dimensions	2 x 10 x 12 inches
Compatibility	Shoei X-Fourteen Helmets (all sizes)
Key Feature	Moisture-Wicking
