## KneeRover ECONOMY KNEE SCOOTER

# KneeRover Economy Knee Scooter Instruction Manual

Model: ECONOMY KNEE SCOOTER | Brand: KneeRover

## INTRODUCTION

---

Welcome to the KneeRover Economy Knee Scooter instruction manual. This steerable knee walker is designed to provide a comfortable and stable mobility solution for individuals recovering from foot, ankle, or lower leg injuries, offering an excellent alternative to traditional crutches. Please read this manual thoroughly before assembly and use to ensure safe and proper operation.

## SAFETY INFORMATION

---

Your safety is paramount. Adhere to all warnings and instructions to prevent injury.

- **Weight Capacity:** Do not exceed the maximum weight capacity of 300 lbs.
- **Speed Limit:** Maintain a safe walking speed of less than 3 mph.
- **Braking:** Always engage the locking handbrake when stationary to prevent unintended movement.
- **Surface Use:** Use on flat, stable surfaces. Exercise caution on uneven terrain, inclines, or wet surfaces.
- **Adjustments:** Ensure all adjustable components (handlebars, kneepad) are securely locked before use.
- **Indications:** This product is intended for individuals recovering from broken foot, broken ankle, broken leg, foot surgery, ankle surgery, leg surgery, below the knee amputee, leg amputation, foot injury, ankle injury, or medical conditions like foot ulcers. Consult a healthcare professional for suitability.
- **Legal Disclaimer:** Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition.

## SETUP GUIDE

---

The KneeRover Economy Knee Scooter is designed for easy assembly. Follow these steps carefully:

1. **Unpacking:** Carefully remove all components from the packaging. Inspect for any damage.
2. **Handlebar Installation:** Insert the handlebar post into the main frame. Secure it using the quick-release folding mechanism and the adjustment knob.
3. **Kneepad Adjustment:** Adjust the height of the kneepad to ensure comfortable and ergonomic positioning for your injured leg. The kneepad is designed for supporting either the right or left leg.
4. **Brake Check:** Verify that both handbrakes are functioning correctly and can effectively lock the rear wheels.

## OPERATING INSTRUCTIONS

Using your KneeRover Economy Knee Scooter is straightforward:

- **Positioning:** Place the knee of your injured leg onto the padded kneepad. Ensure your foot is comfortably positioned off the ground.
- **Propulsion:** Use your uninjured leg to push off the ground, propelling the scooter forward.
- **Steering:** The steerable handlebars allow for easy navigation. Guide the scooter by turning the handlebars in the desired direction.
- **Braking:** Squeeze the handbrakes to slow down or stop. For prolonged stops, engage the locking handbrake by pushing the small button on the brake lever while squeezing. Release by squeezing the lever again.

# Fully Adjustable

For Users Between  
4'9" and 6'4"

## MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your KneeRover Economy Knee Scooter:

- **Cleaning:** Wipe down the frame and kneepad with a damp cloth and mild soap as needed. Avoid abrasive cleaners.
- **Wheel Inspection:** Periodically check the 7.5" rubber wheels for wear and tear. Ensure they rotate freely and are free of debris. The non-marking wheels are designed for safe and smooth navigation on various floor types.
- **Brake Cable Check:** Inspect brake cables for fraying or damage. Ensure they are properly tensioned for effective braking.
- **Fastener Tightness:** Regularly check all nuts, bolts, and adjustment knobs to ensure they are tight and secure.

### TROUBLESHOOTING

---

If you encounter any issues with your KneeRover Economy Knee Scooter, refer to the following common problems and solutions:

- **Scooter pulls to one side:** Check tire pressure (if applicable, though these are solid rubber, so check for debris or bent axles). Ensure handlebars are aligned and securely tightened.
- **Brakes are not effective:** Inspect brake cables for slack or damage. Adjust cable tension as needed. Ensure brake pads are making full contact with the wheels.
- **Squeaking noises:** Lubricate moving parts, especially wheel axles and folding mechanisms, with a silicone-based lubricant.
- **Difficulty folding/unfolding:** Ensure all locking mechanisms are fully disengaged. Check for any obstructions or debris in the folding joints.

# SPECIFICATIONS

---

Feature	Detail
Brand	KneeRover
Model Number	ECONOMY KNEE SCOOTER
Color	Matte Black
Material	Steel frame, Rubber wheels
Item Weight	21 Pounds
