# Tissot T-Race 21mm Black Rubber Watch Strap Instruction Manual

Model: T610029696

## PRODUCT OVERVIEW

This document provides instructions for the Tissot T-Race 21mm Black Rubber Watch Strap, an authentic accessory designed for specific Tissot Men's T-Race watch models. This strap is intended to replace an existing strap or to be fitted to a compatible watch case.

The strap is made from durable rubber, offering comfort and resilience for daily wear. It is specifically compatible with Tissot Men's T-Race watches that have the back-case reference number T048417A.

This image displays the two separate pieces of the Tissot T-Race 21mm black rubber watch strap. Each piece features a textured design on the outer surface and includes the necessary attachment points for securing it to the watch case and buckle.

## SETUP AND INSTALLATION

---

Before proceeding with installation, ensure your watch is a Tissot Men's T-Race model with the back-case reference T048417A. This strap is designed for a precise fit with this specific model.

1. **Prepare Your Workspace:** Lay out a clean, soft cloth on a flat surface to protect your watch and strap during installation.
2. **Remove the Old Strap (if applicable):** If replacing an existing strap, use a spring bar tool to carefully compress the spring bars holding the old strap to the watch lugs. Gently remove the old strap pieces.
3. **Identify Strap Orientation:** The Tissot T-Race strap typically has a shorter piece for the 12 o'clock position (where the buckle attaches) and a longer piece for the 6 o'clock position. Ensure you have the correct orientation.
4. **Attach the New Strap:** Insert one end of a spring bar into the lug hole on the watch case. Place the strap piece between the watch lugs, aligning the other end of the spring bar with the opposite lug hole. Use the spring bar tool to compress the spring bar, allowing it to snap into place within the lug hole. Gently tug on the strap to ensure it is securely fastened.
5. **Repeat for the Second Piece:** Follow the same procedure for the other strap piece.
6. **Attach Buckle (if not included):** This strap does not include a buckle. If your existing buckle is compatible, attach it to the shorter strap piece using a spring bar.

If you are unsure about the installation process, it is recommended to seek assistance from a qualified watch technician to avoid damage to your watch or strap.

## USAGE AND ADJUSTMENT

---

Once installed, the Tissot T-Race rubber strap is ready for use. To wear your watch:

1. **Fasten the Strap:** Wrap the strap around your wrist and insert the longer end through the buckle.
2. **Adjust for Comfort:** Select the hole that provides a snug yet comfortable fit. The watch should not slide freely on your wrist, nor should it feel too tight.
3. **Secure the Keeper:** Thread the excess strap through the keeper loops to prevent it from flapping.

Rubber straps are known for their flexibility and comfort, making them suitable for various activities. Avoid over-tightening the strap, as this can cause discomfort and premature wear.

## MAINTENANCE AND CARE

---

Proper care will extend the life and appearance of your Tissot rubber watch strap:

- **Regular Cleaning:** Clean the strap periodically with mild soap and lukewarm water. Use a soft cloth or brush to gently scrub away dirt and oils.
- **Rinse Thoroughly:** After cleaning, rinse the strap thoroughly with clean water to remove all soap residue.
- **Dry Completely:** Pat the strap dry with a soft, lint-free cloth. Allow it to air dry completely before wearing or storing.
- **Avoid Harsh Chemicals:** Do not use harsh chemicals, solvents, or abrasive cleaners, as these can

damage the rubber material.

- **Protect from Extreme Conditions:** While rubber is durable, prolonged exposure to direct sunlight, extreme heat, or very cold temperatures can affect its integrity over time.
- **Storage:** When not in use, store the strap in a cool, dry place away from direct sunlight.

## TROUBLESHOOTING

---

- **Strap Does Not Fit:**
  - Ensure your watch's back-case reference number is T048417A. This strap is designed for specific compatibility.
  - Verify that the spring bars are correctly seated in the lug holes.
- **Discomfort While Wearing:**
  - Adjust the strap to a looser setting. It should be snug but not constricting.
  - Ensure the strap is clean and free of debris that might cause irritation.
- **Signs of Wear and Tear:**
  - Over time, all watch straps will show signs of wear. If the strap becomes cracked, discolored, or loses its flexibility, it may be time for a replacement.
  - Regular cleaning and proper storage can help prolong the strap's life.

## WARRANTY INFORMATION

---

As an authentic Tissot accessory, this watch strap is subject to Tissot's official warranty policy for accessories. Please refer to the official Tissot website or your purchase documentation for detailed warranty terms and conditions. The warranty typically covers manufacturing defects but does not cover normal wear and tear, accidental damage, or damage resulting from improper use or maintenance.
