

## Michael Kors MK2580

# Michael Kors Sawyer Analog Purple Dial Women's Watch - MK2580 User Manual

## INTRODUCTION

---

Welcome to the user manual for your Michael Kors Sawyer Analog Purple Dial Women's Watch, model MK2580. This guide provides essential information on setting up, operating, maintaining, and troubleshooting your watch to ensure its longevity and optimal performance. Please read these instructions carefully before using your watch.

## PRODUCT OVERVIEW

---

The Michael Kors Sawyer MK2580 is an elegant women's watch featuring a rose gold-tone stainless steel case and a plum leather strap. It boasts a plum dial with rose gold-tone hands, crystal-tipped index hour markers, and minute markers around the outer rim. The watch includes an analog display, luminescent hands and markers, and a date display positioned at 12 o'clock. A combination sub-dial provides 12-hour and 30-minute chronograph functions. Powered by a reliable quartz movement, it is protected by a scratch-resistant mineral crystal. The watch is designed with a pull/push crown, a solid case back, and a tang clasp. It offers water resistance up to 100 meters (330 feet).

- **Dial Color:** Purple
- **Case Shape:** Round
- **Band Color:** Purple
- **Band Material:** Leather
- **Movement Type:** Quartz
- **Display Type:** Analog

## SETUP

---

### Setting the Time and Date

1. **Setting the Date:** Gently pull the crown out to the first click position. Rotate the crown clockwise or counter-clockwise to adjust the date. Ensure the date changes correctly for AM/PM cycles if applicable.
2. **Setting the Time:** Pull the crown out further to the second click position. Rotate the crown to move the hour and minute hands to the desired time. For accurate time setting, synchronize with a reliable time source.
3. **Finalizing:** Once the time and date are set, push the crown back into its original, fully-in position (position 0). This ensures the watch is sealed and water resistant.

### Adjusting the Strap

The plum leather strap features a traditional tang clasp. To adjust, simply thread the strap through the buckle and secure the pin into the hole that provides a comfortable and secure fit on your wrist. Avoid overtightening, which can restrict circulation, or leaving it too loose, which can cause the watch to move excessively.

## OPERATING THE CHRONOGRAPH

---

Your Michael Kors Sawyer watch is equipped with a chronograph function, allowing you to measure elapsed time. The watch features two pushers on the side of the case, typically located above and below the crown, and a combination sub-dial for 12-hour and 30-minute measurements.

1. **Start:** Press the top pusher to start the chronograph. The chronograph second hand will begin to move, and the sub-dials will track minutes and hours.
2. **Stop:** Press the top pusher again to stop the chronograph. The elapsed time can then be read from the chronograph hands and sub-dials.
3. **Reset:** After stopping, press the bottom pusher to reset the chronograph hands to their zero positions. The chronograph must be stopped before it can be reset.

## MAINTENANCE

---

### Cleaning Your Watch

To maintain the appearance of your watch, regularly wipe the case and mineral crystal with a soft, dry, lint-free cloth. For the leather strap, avoid prolonged exposure to water, direct sunlight, and harsh chemicals. If cleaning is necessary, gently wipe with a slightly damp cloth and mild soap, then dry thoroughly with a soft cloth. Allow the strap to air dry completely before wearing.

## Water Resistance

This watch is water resistant to 100 meters (330 feet). This rating means it is suitable for swimming and snorkeling. However, it is **not** suitable for scuba diving. To maintain water resistance, ensure the crown is always pushed fully into its original position. Do not operate the crown or pushers while the watch is wet or submerged, as this can compromise the water seal.

## Battery Replacement

The watch is powered by 1 Lithium Metal battery. When the watch stops running, it indicates the battery needs replacement. Battery replacement should always be performed by a qualified watch technician to ensure the correct battery type is used and the watch's water resistance is maintained after the case back is opened and resealed.

## TROUBLESHOOTING

- **Watch Not Running:** If the watch hands are not moving, the battery may be depleted. Refer to the 'Battery Replacement' section and seek professional service.
- **Date Not Changing:** Ensure the time is set correctly, especially passing midnight, which triggers the date change. If the date mechanism appears stuck or does not advance, consult a professional watch technician.
- **Chronograph Not Resetting to Zero:** If the chronograph hands do not return to their zero positions after pressing the reset pusher, the movement may require adjustment. This typically requires professional service.

## SPECIFICATIONS

<b>Model Number</b>	MK2580
<b>Case Diameter</b>	39 Millimetres
<b>Band Colour</b>	Purple
