

PreSonus AIR12

PreSonus AIR12 2-Way Active Sound-Reinforcement Loudspeaker User Manual

Model: AIR12

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your PreSonus AIR12 2-Way Active Sound-Reinforcement Loudspeaker. Please read this manual thoroughly before operating the device to ensure optimal performance and longevity. The AIR12 is designed to deliver high-quality audio for various sound reinforcement applications, combining a compact design with powerful amplification and versatile DSP features.

2. SAFETY INFORMATION

Important Safety Instructions:

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with a dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Proposition 65 Warning:

This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

3. PRODUCT OVERVIEW

The PreSonus AIR12 is a compact and lightweight 2-way active sound-reinforcement loudspeaker designed for a variety of audio applications. It features a 12-inch custom low-frequency driver and a 1.35-inch high-frequency compression driver, powered by a 1,200W hybrid amplifier configuration. This design ensures a rich low-end and natural high-frequency extension. The AIR12 includes onboard DSP presets for various uses, such as front-of-house, floor wedge, music playback, and speech, along with EQ controls to adapt to different acoustic environments.

Key Features:

- 12-inch custom low-frequency driver with 2.5-inch voice coil.
- 1.35-inch high-frequency compression driver.
- 90° horizontal dispersion x 60° vertical dispersion.
- Hybrid 1,200W power amplifier configuration (Class D for low-end, Class AB for high-frequency).
- Onboard mixer with two combo XLR and 1/4" inputs, plus a stereo 1/8" input.
- Easy-to-use DSP performance presets for various applications.

What's in the Box:

- 1 AIR12 loudspeaker

Product Views:

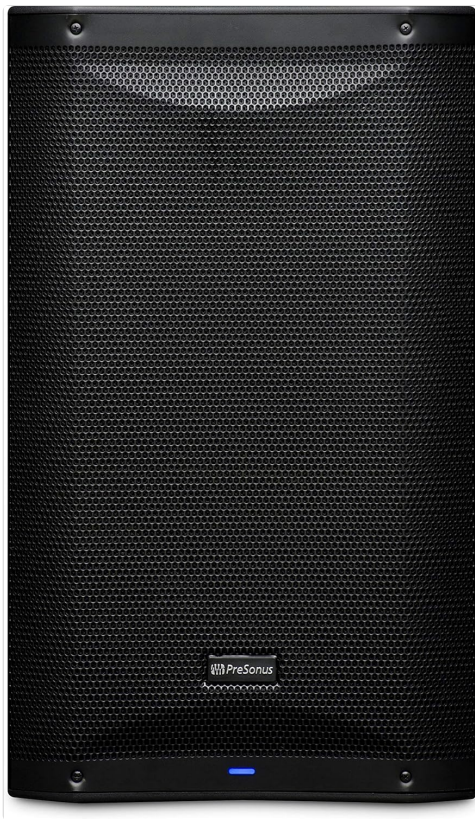

Figure 1: Front view of the PreSonus AIR12 loudspeaker, showcasing its protective grille and integrated PreSonus logo. This view highlights the robust construction designed for sound reinforcement.

Figure 2: Angled view of the PreSonus AIR12 loudspeaker, showing the side handle for easy transport. This perspective illustrates the speaker's depth and ergonomic design.

Figure 3: The PreSonus AIR12 loudspeaker positioned as a floor wedge monitor, demonstrating its versatility for stage applications. The angled design allows for optimal sound projection towards performers.

Figure 4: Rear panel of the PreSonus AIR12 loudspeaker, displaying input/output connections, level controls, and DSP preset selection. This panel is the central hub for all audio and configuration adjustments.

Figure 5: Cutaway view of the PreSonus AIR12 loudspeaker, illustrating internal components like the 12-inch woofer and high-frequency driver. This image highlights the acoustic design and driver placement.

4. SETUP

Proper setup is crucial for optimal performance and safety. Follow these steps to set up your AIR12 loudspeaker:

1. **Placement:** Position the loudspeaker on a stable surface, speaker stand, or use appropriate flying hardware. Ensure adequate ventilation around the unit. The AIR12 can be used as a main PA speaker, a floor monitor (as shown in Figure 3), or flown.
2. **Power Connection:** Connect the provided power cord to the AC inlet on the rear panel (Figure 4) and then to a grounded electrical outlet. Ensure the power switch is in the OFF position before connecting.
3. **Audio Input Connections:**
 - **Mic/Line Inputs (Channels 1 & 2):** Use XLR or 1/4-inch TRS/TS cables to connect microphones, mixers, or other audio sources to the combo inputs on the rear panel.
 - **Aux Input:** For connecting portable media players or smartphones, use a stereo 1/8-inch (3.5mm) cable.
4. **Output Connection (Optional):** If linking multiple loudspeakers, connect the MIX OUT XLR output to the input of another active loudspeaker.
5. **Initial Power On:** Once all connections are secure, turn on the power switch. The power indicator LED on the front will illuminate.

5. OPERATING INSTRUCTIONS

The AIR12 features intuitive controls for sound optimization. Refer to Figure 4 for control locations.

1. **Level Controls:** Adjust the individual LEVEL knobs for Mic/Line 1 and Mic/Line 2 to set the input gain for each channel. Start with these at their minimum position and gradually increase.
2. **Master Volume:** The MASTER VOL knob controls the overall output level of the loudspeaker.
3. **DSP Presets:** The AIR12 includes several Digital Signal Processing (DSP) presets to optimize its sound for different applications. Use the dedicated controls to cycle through and select presets such as:
 - **FOH (Front-of-House):** Standard full-range operation for main PA.
 - **Monitor:** Optimized for use as a floor wedge.
 - **Music:** Enhanced for music playback.
 - **Speech:** Tailored for vocal clarity.
 - **Sub:** Engages a high-pass filter for use with a subwoofer.
4. **EQ Controls:** Utilize the onboard EQ settings to fine-tune the frequency response to compensate for room acoustics or personal preference.
5. **Location Presets:** Select presets that optimize performance based on the speaker's physical placement (e.g., stand-mounted, flown, or floor).
6. **Monitoring Audio:** Play your audio source and adjust the LEVEL and MASTER VOL controls to achieve the desired volume without distortion. Observe the signal/clip indicators to prevent clipping.

6. MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your AIR12 loudspeaker.

- **Cleaning:** Disconnect the power before cleaning. Use a soft, dry cloth to wipe down the exterior of the loudspeaker. Avoid using abrasive cleaners, solvents, or waxes, as these can damage the finish.
- **Ventilation:** Ensure that all ventilation openings remain clear of dust and debris to prevent overheating.
- **Storage:** When not in use for extended periods, store the loudspeaker in a cool, dry environment, protected from extreme temperatures and humidity.
- **Inspection:** Periodically check all cables and connections for signs of wear or damage. Replace any damaged cables immediately.

7. TROUBLESHOOTING

If you encounter issues with your PreSonus AIR12 loudspeaker, refer to the following common troubleshooting steps:

- **No Power:**
 - Ensure the power cord is securely connected to both the loudspeaker and a working electrical outlet.
 - Check the power switch position.
 - Verify the outlet is supplying power by testing with another device.
- **No Sound:**
 - Check that the input source is active and sending a signal.
 - Ensure all audio cables are correctly connected and not damaged.
 - Verify that the LEVEL controls for the input channels and the MASTER VOL knob are turned up.
 - Confirm that the correct input is selected if applicable (though AIR12 has dedicated inputs).

- **Distorted Sound:**

- Reduce the input LEVEL and MASTER VOL. If the signal/clip indicator is lighting up frequently, the input signal is too hot.
- Check the audio source for distortion.
- Ensure speaker cables are not damaged.

- **Hissing or Noise:**

- Disconnect all inputs. If the hiss persists, the noise may be internal to the speaker.
- If the hiss disappears, reconnect inputs one by one to identify the noisy source.
- Ensure proper grounding of all audio equipment to avoid ground loops. Try using a ground lift adapter if necessary, but only as a temporary diagnostic tool and with caution.
- Lowering input gain and increasing master volume can sometimes reduce noise floor.

- **Overheating:**

- Ensure adequate airflow around the loudspeaker. Do not block ventilation ports.
- Reduce the operating volume if the unit feels excessively hot.

If these steps do not resolve the issue, please contact PreSonus customer support for further assistance.

8. SPECIFICATIONS

Detailed technical specifications for the PreSonus AIR12 loudspeaker:

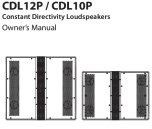

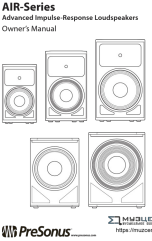

Specification	Detail
Model Name	AIR12
Speaker Type	PA Loudspeaker
Mounting Type	Floor Standing
Woofer Diameter	12 Inches
Audio Driver Type	Dynamic Driver
Speaker Amplification Type	Active
Speaker Maximum Output Power	1200 Watts
Wattage	1200 watts
Frequency Response	20 KHz (Upper limit, full range is wider)
Connectivity Technology	XLR
Audio Output Mode	Stereo
Product Dimensions	13.8"D x 14.2"W x 24.4"H
Item Weight	37.5 Pounds
Power Source	Corded Electric
Included Components	1 AIR12 loudspeaker

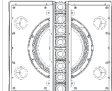

Specification	Detail
UPC	673454005053, 673454005015, 642892765881
ASIN	B01HCUPNH0
Date First Available	June 30, 2016

9. WARRANTY AND SUPPORT

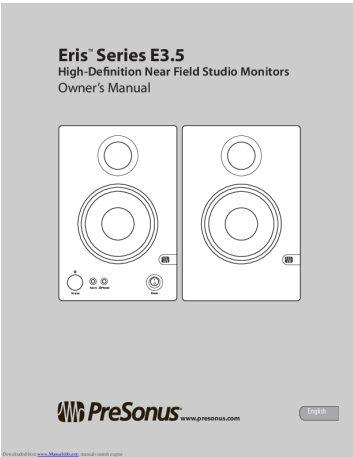

The PreSonus AIR12 loudspeaker comes with a Limited Warranty. For specific terms and conditions of your warranty, please refer to the documentation included with your product or visit the official PreSonus website. For technical support, service, or warranty claims, please contact PreSonus customer support through their official website or the contact information provided in your product registration materials. When contacting support, please have your product model (AIR12) and serial number available.
