Michael Kors MK8507

Michael Kors Oversized Slim Runway Men's Watch Instruction Manual

Model: MK8507

INTRODUCTION

The Michael Kors Slim Runway watch is a sophisticated timepiece designed for versatility and style. Featuring a classic three-link bracelet and a monochromatic sunray dial with stick indexes, this watch is suitable for various occasions. This manual provides essential information for the proper setup, operation, and care of your watch to ensure its longevity and performance.

SETUP

Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards to the first position. You may feel a slight click.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Adjusting the Watch Band

The stainless steel bracelet band is designed with removable links to allow for a customized fit. It is recommended to have a professional jeweler or watch repair service adjust the band to prevent damage to the watch or band.

OPERATING

Timekeeping

This watch utilizes a precise quartz movement with a three-hand analog display for accurate timekeeping. Once the time is set, the watch will continuously display the current time.

Water Resistance

The watch is water resistant up to 50 meters (165 feet), or 5 ATM. This means it is suitable for short periods of recreational swimming in shallow water. It is **not** suitable for diving, snorkeling, or high-impact water sports. Avoid operating the crown or pushers when the watch is wet or submerged.

MAINTENANCE

Cleaning

To maintain the appearance of your watch, wipe the case and band regularly with a soft, dry cloth. For stainless steel, a slightly damp cloth can be used, followed by a dry cloth. Avoid using harsh chemicals, cleaning agents, or abrasive materials, as these can damage the finish.

Battery Replacement

The watch is powered by one Lithium Metal battery. When the watch stops or the time becomes inaccurate, the battery may need replacement. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

General Care

- Avoid exposing the watch to extreme temperatures (hot or cold) or sudden temperature changes.
- Protect the watch from strong impacts or shocks.
- Keep the watch away from strong magnetic fields, as these can affect the accuracy of the quartz movement.
- Ensure the crown is always pushed in completely to maintain water resistance.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running	Crown is pulled out; Battery is depleted	Push crown in fully; Replace battery (professional service recommended)
Time is inaccurate	Low battery; Exposure to strong magnetic fields	Replace battery; Move watch away from magnetic sources
Condensation inside crystal	Water ingress	Immediately take to a professional watch repair service
Band feels too tight/loose	Incorrect band sizing	Adjust band links (professional service recommended)

SPECIFICATIONS

- **Model Number:** MK8507
- **Case Material:** Stainless Steel
- **Case Diameter:** 44mm
- **Dial:** Black sunray dial with stick indexes
- **Crystal:** Mineral crystal (resists scratches)
- **Band Material:** Black Stainless Steel Bracelet
- **Band Width:** 22mm
- **Movement:** Quartz (three-hand analog display)
- **Water Resistance:** 5 ATM (50 meters / 165 feet)
- **Battery:** 1 Lithium Metal battery (required)
- **Product Dimensions:** 3.46 x 3.7 x 3.7 inches
- **Item Weight:** 4.23 ounces
- **Manufacturer:** Michael Kors Watches
