JiBen M002

JiBen LED Lighted 10X Magnifying Makeup Mirror

Model: M002 | Brand: JiBen

INTRODUCTION

The JiBen LED Lighted 10X Magnifying Makeup Mirror is designed to enhance your daily beauty and grooming routines. Featuring powerful 10X magnification, bright diffused LED lighting, and a versatile 360-degree rotating adjustable arm, this portable and cordless mirror provides exceptional clarity and convenience for home and travel use.

SAFETY INFORMATION

Please read and understand all safety information before using the mirror.

- **CAUTION:** Handle with care to avoid breakage.
- Do not disassemble or attempt to replace LEDs.
- Use only 3 AAA batteries.
- Keep out of reach of children due to choking hazard.
- Ensure proper mounting on non-porous surfaces to prevent falling.
- Prolonged exposure to LED lights may cause discomfort for some users.

PACKAGE CONTENTS

- 1 x JiBen LED Lighted 10X Magnifying Makeup Mirror
- 1 x Power Locking Suction Cup Assembly

SETUP

Battery Installation

The mirror requires 3 AAA batteries (not included) for the LED light function.

1. Locate the battery compartment on the back of the mirror unit.
2. Open the battery compartment cover.
3. Insert 3 AAA batteries, ensuring correct polarity (+/-).
4. Close the battery compartment cover securely.

Rear view of the mirror, showing the battery compartment and the JiBen logo.

Mounting Instructions

The mirror features a powerful locking suction cup for secure attachment to smooth, non-porous surfaces such as glass, tile, or polished metal.

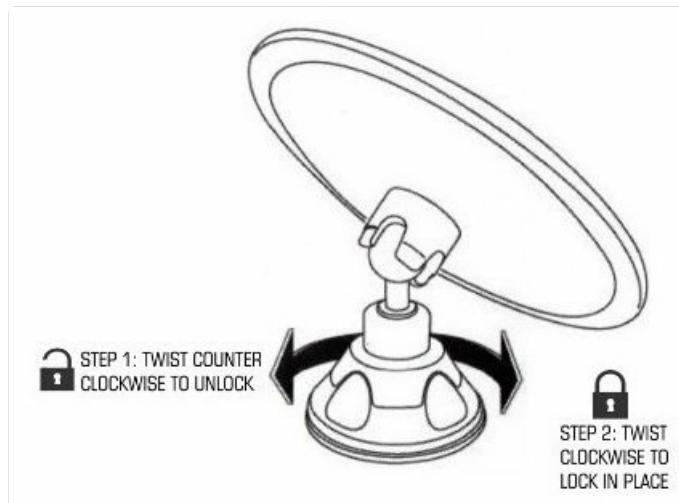

- 1. Prepare the Surface:** Ensure the mounting surface is absolutely smooth and flat. Clean the surface

thoroughly to remove any dust, dirt, or moisture.

2. **Unlock the Suction Cup:** Twist the base of the suction cup assembly counter-clockwise to unlock the suction mechanism.
3. **Position the Mirror:** Press the suction cup firmly against the desired clean, smooth surface.
4. **Lock the Suction Cup:** While maintaining pressure, twist the base of the suction cup assembly clockwise until it is securely locked in place. You should feel a strong suction.

Visual guide for twisting the suction cup base to lock and unlock the mirror.

Detailed diagram illustrating the two steps for securing the suction cup: unlock counter-clockwise, then lock clockwise.

OPERATING INSTRUCTIONS

Turning On/Off the LED Light

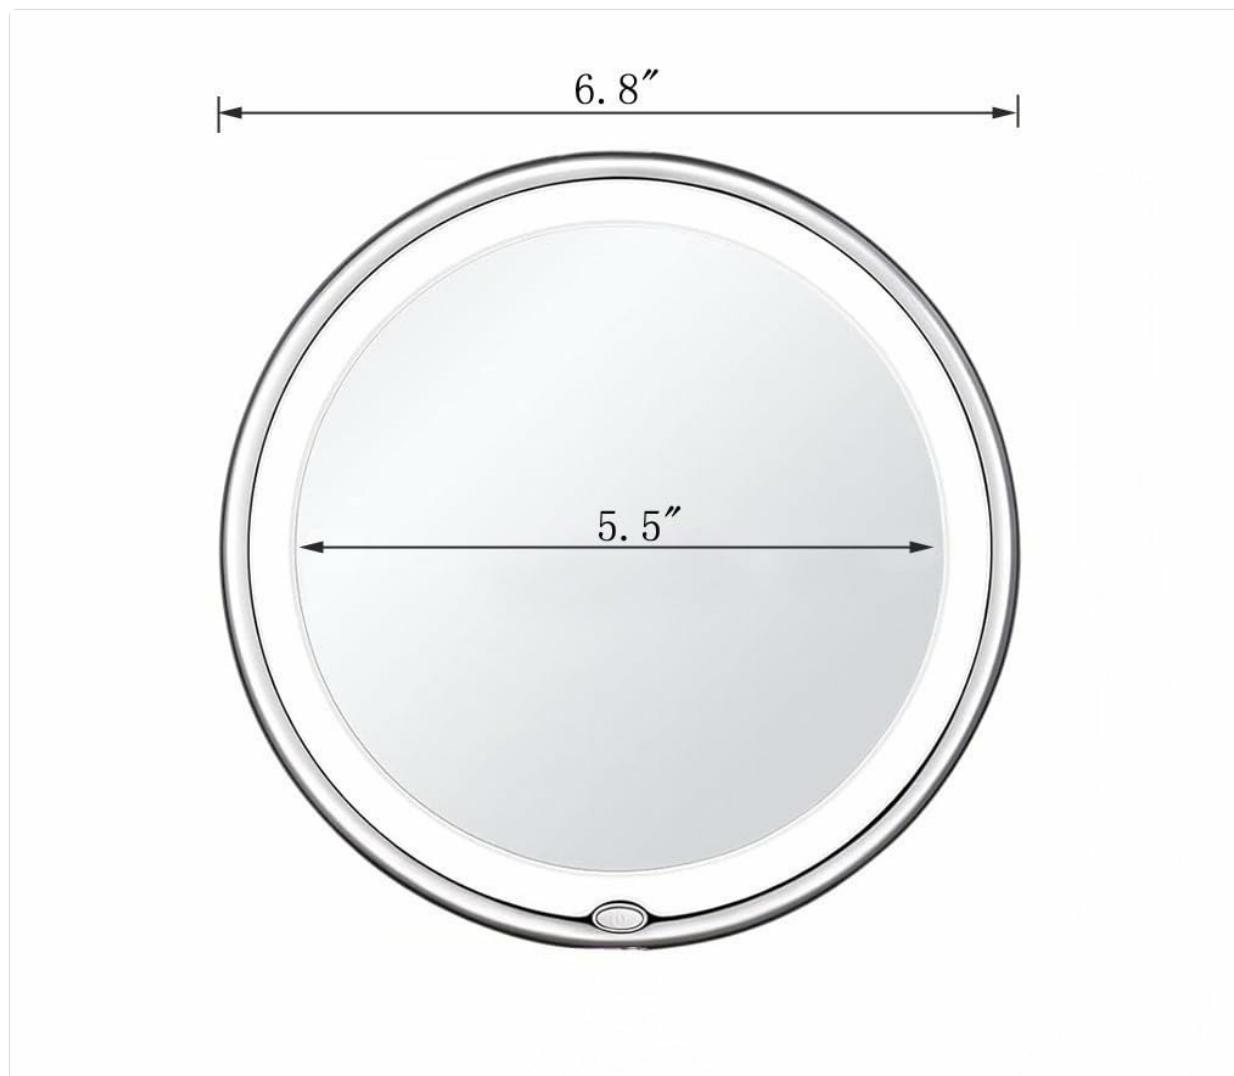

The mirror features an energy-efficient LED light ring for optimal illumination.

- To turn the LED light on or off, simply tap the button located on the bottom front edge of the mirror face.

Adjusting the Mirror Angle

The 360-degree rotating swivel arm allows you to adjust the mirror to your best viewing angle.

- Gently pivot the mirror head to achieve the desired tilt and rotation. The ball joint is designed to be smooth yet secure, holding its position once set.

A user adjusting the mirror for optimal viewing in a bathroom setting.

Optimal Viewing Distance for 10X Magnification

The 10X magnification is very strong and requires close proximity for a clear, undistorted image.

- For best results and a clear, undistorted image, position your face within 5 inches (approximately 12.7 cm) of the mirror surface.

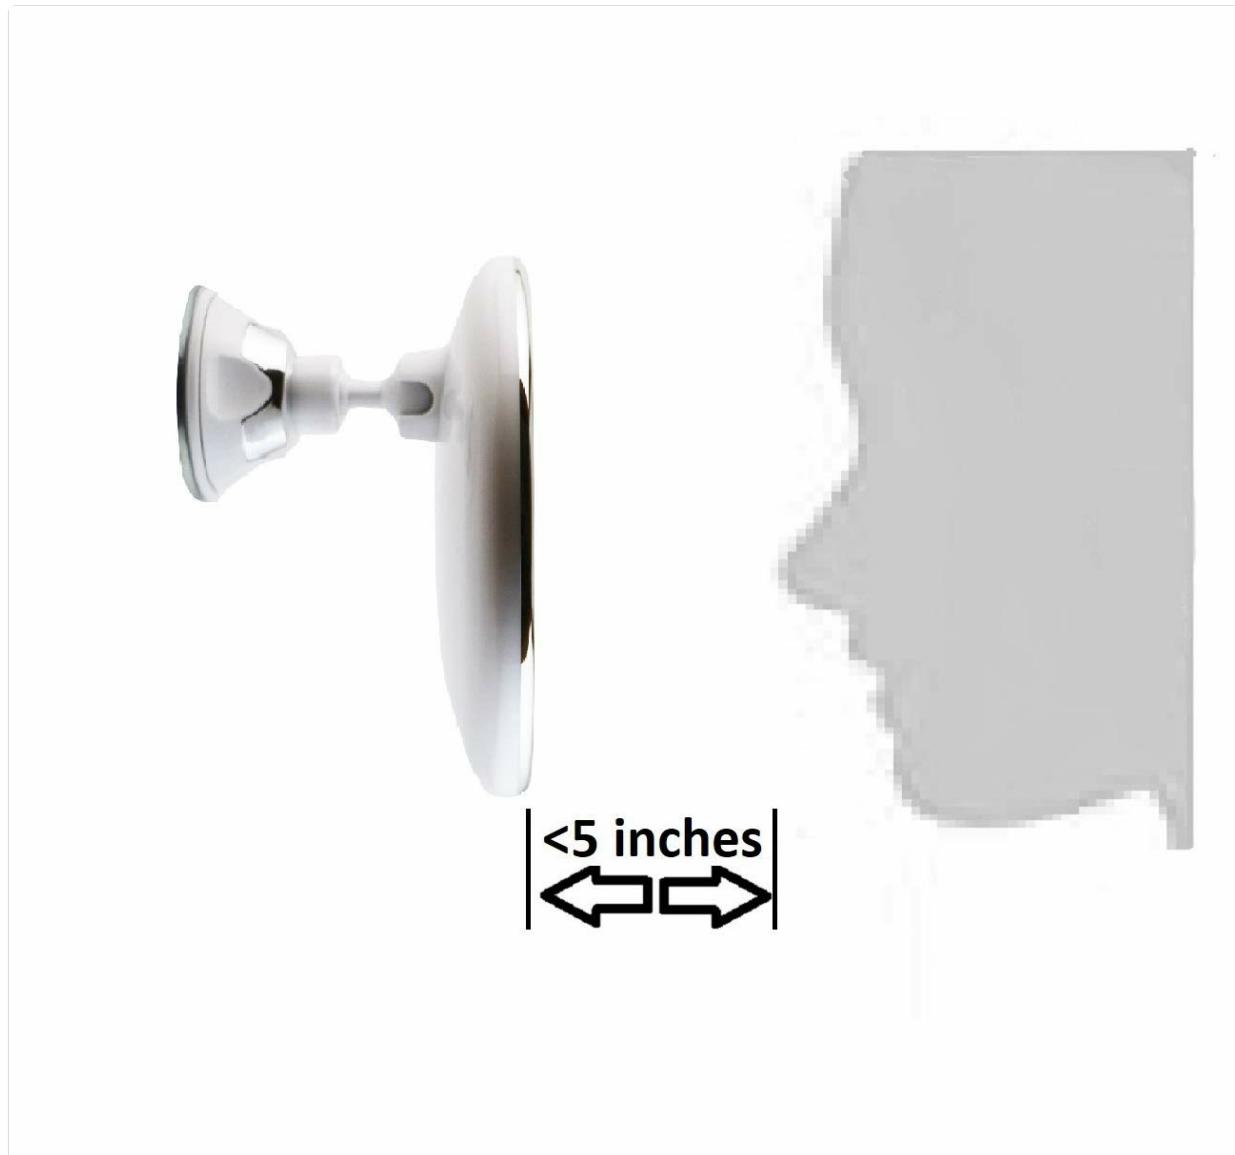

Diagram illustrating the recommended viewing distance of less than 5 inches for the 10X magnifying mirror.

MAINTENANCE

Cleaning the Mirror

To keep your mirror clean and clear:

- Wipe the mirror surface and body with a soft, lint-free, damp cloth.
- Avoid using abrasive cleaners, solvents, or harsh chemicals, as these may damage the mirror's finish or LED components.

Suction Cup Maintenance

To ensure the suction cup maintains its strong hold:

- Periodically (e.g., monthly), remove the mirror from its mounting surface.
- Clean both the suction cup and the mounting surface thoroughly.
- Re-mount the mirror following the "Mounting Instructions" in the Setup section. This process helps prevent loss of suction over time.

TROUBLESHOOTING

Problem	Possible Cause / Solution
Magnifying image appears distorted.	The 10X magnification is very strong. Ensure your face is within 5 inches of the mirror for a clear, undistorted image.
Suction cup does not hold or loses suction.	The mounting surface must be absolutely smooth and flat. Clean the mounting surface thoroughly before attachment. Re-mount the mirror monthly to prevent loss of suction.
LED light does not turn on.	Check if the batteries are inserted correctly with the correct polarity. Replace the 3 AAA batteries with new ones.

SPECIFICATIONS

Feature	Detail
Model Number	M002
Magnification	10X
Light Source	LED
Power Source	3 x AAA Batteries (not included)
Product Dimensions	8" L x 1" W (Mirror diameter approx. 5.5")
Frame Material	Glass
Mounting Type	Power Locking Suction Cup
Adjustability	360-Degree Rotating Swivel Arm
