CubicFun T4011h

CubicFun T4011h Titanic Ship Model (Large) 3D Puzzle Instruction Manual

Model: T4011h

1. INTRODUCTION

Thank you for choosing the CubicFun T4011h Titanic Ship Model 3D Puzzle. This large-scale 3D puzzle allows you to recreate the iconic RMS Titanic with 113 precision-cut pieces. Designed for an engaging and educational experience, this model promotes concentration skills and provides a rewarding building process. Once assembled, the model serves as an impressive display piece.

This image displays the fully assembled CubicFun T4011h Titanic 3D Puzzle, showcasing its intricate details and the included display stand. The model features the iconic black, red, and white hull, with four yellow and black funnels.

2. SAFETY INFORMATION

- **Age Recommendation:** This product is intended for users aged 8 years and older. It contains small parts that may pose a choking hazard for younger children.
- **Material Safety:** The puzzle pieces are made of paper. Keep away from open flames or excessive heat.
- **Handling:** Handle pieces carefully to avoid bending or tearing, especially during detachment from the sheets.
- **Supervision:** Adult supervision is recommended for younger builders.

3. PACKAGE CONTENTS

Before beginning assembly, please verify that all components are present in your package.

- Pre-cut 3D puzzle sheets (113 pieces total)
- Instruction Manual (this document)
- Display Stand components

This image displays the contents of the puzzle box, including multiple sheets of pre-cut puzzle pieces and the instruction manual, ready for assembly.

4. SETUP AND ASSEMBLY (OPERATING INSTRUCTIONS)

The CubicFun T4011h Titanic 3D Puzzle is designed for easy assembly without the need for scissors or glue. Follow these steps carefully to construct your model.

1. Preparation:

- Unpack all puzzle sheets and the instruction manual from the box.
- Familiarize yourself with the pieces by reviewing the diagrams in the instruction manual. Pieces are typically numbered for easy identification.
- Find a clean, flat, and well-lit workspace.

2. Detaching Pieces:

- Gently push out each puzzle piece from its sheet. Do not force pieces, as they are pre-cut and should detach easily.
- If a piece is stubborn, gently rock it back and forth until it loosens.
- Keep detached pieces organized, perhaps by their sheet number or section of the ship, to simplify assembly.

This image demonstrates the assembly process, showing a user detaching a puzzle piece from a sheet and attaching it to a partially built section of the Titanic model. This highlights the slot-and-tab construction method.

3. Following Instructions:

- Refer to the included instruction manual for step-by-step guidance. The manual will show which pieces connect to form specific sections of the ship.
- Pieces are designed to interlock using tabs and slots. Align the tabs with the corresponding slots and gently push them together until they fit snugly.
- Build the model section by section as indicated in the manual. Typically, the hull is built first, followed by decks, superstructures, and funnels.

4. Assembling the Display Stand:

- Once the main ship model is complete, assemble the provided display stand pieces according to the manual.
- Carefully place the assembled Titanic model onto the display stand.

This image shows the assembled Titanic puzzle being held, emphasizing its size and portability. Below the model, several icons illustrate key features: easy assembly, no scissors or glue required, original design, suitable for family games, aids stereopsis training, and provides edutainment.

This composite image provides detailed close-up views of various sections of the assembled Titanic 3D puzzle, including the bow, stern, deck structures, and funnels, showcasing the fine craftsmanship.

5. MAINTENANCE

To ensure the longevity and appearance of your CubicFun Titanic 3D Puzzle:

- **Cleaning:** Gently dust the model with a soft, dry cloth or a soft brush. Avoid using water or cleaning solutions, as they may damage the paper material.

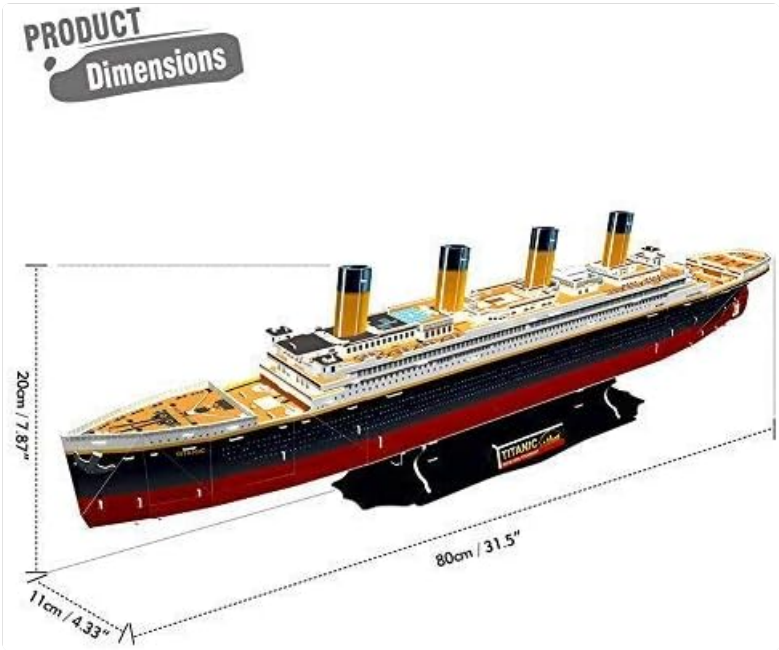

- **Storage:** Display the model in a dry environment, away from direct sunlight, high humidity, or extreme temperatures, which can cause warping or fading.
- **Handling:** When moving the model, support it from the base or main hull to prevent damage to delicate parts.

6. TROUBLESHOOTING

- **Pieces not fitting:** Ensure you are using the correct pieces for the current step as indicated in the manual. Do not force pieces; they should fit snugly but without excessive pressure. Check for any bent tabs or misalignments.
- **Missing a piece:** Carefully re-check all puzzle sheets and your workspace. If a piece is genuinely missing, contact CubicFun customer support (refer to Section 8).
- **Model is unstable:** Ensure all connections are fully engaged and that the display stand is correctly assembled and supporting the model evenly.

7. SPECIFICATIONS

Attribute	Detail
Product Model	T4011h
Brand	CubicFun
Number of Pieces	113
Material Type	Paper
Assembled Dimensions (L x W x H)	Approx. 80cm x 11cm x 20cm (31.5" x 4.33" x 7.87")
Product Weight	Approx. 699 g
Educational Objective	Concentration Skill
Assembly Required	No (refers to no tools/glue, assembly of pieces is required)

A technical diagram illustrating the dimensions of the assembled Titanic 3D puzzle. The model measures approximately 80cm (31.5 inches) in length, 20cm (7.87 inches) in height, and 11cm (4.33 inches) in width.
