

BEPER 70.420

BEPER 70.420 Thermoelectric Dehumidifier User Manual

Model: 70.420

1. INTRODUCTION

Thank you for choosing the BEPER 70.420 Thermoelectric Dehumidifier. This appliance is designed to reduce excess moisture in small spaces, helping to prevent mold, mildew, and musty odors. Please read this manual carefully before operating the dehumidifier to ensure safe and efficient use. Keep this manual for future reference.

2. IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, or injury, always follow these basic safety precautions:

- Read all instructions before using the appliance.
- Ensure the power supply matches the voltage specified on the rating label.
- Do not operate the dehumidifier with a damaged cord or plug. If the cord or plug is damaged, contact qualified service personnel.
- Do not place the appliance near heat sources such as radiators, stoves, or other heat-producing appliances.
- Always place the dehumidifier on a firm, flat, and level surface.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Unplug the dehumidifier from the power outlet before cleaning, performing maintenance, or when not in use.
- This appliance is for indoor use only. Do not use outdoors.
- Keep children and pets away from the appliance during operation.
- Do not block the air inlet or outlet vents. Ensure adequate air circulation around the unit.
- Do not insert objects into the vents or openings.
- Do not use the appliance in areas where flammable liquids or gases are stored.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your BEPER 70.420 Dehumidifier:

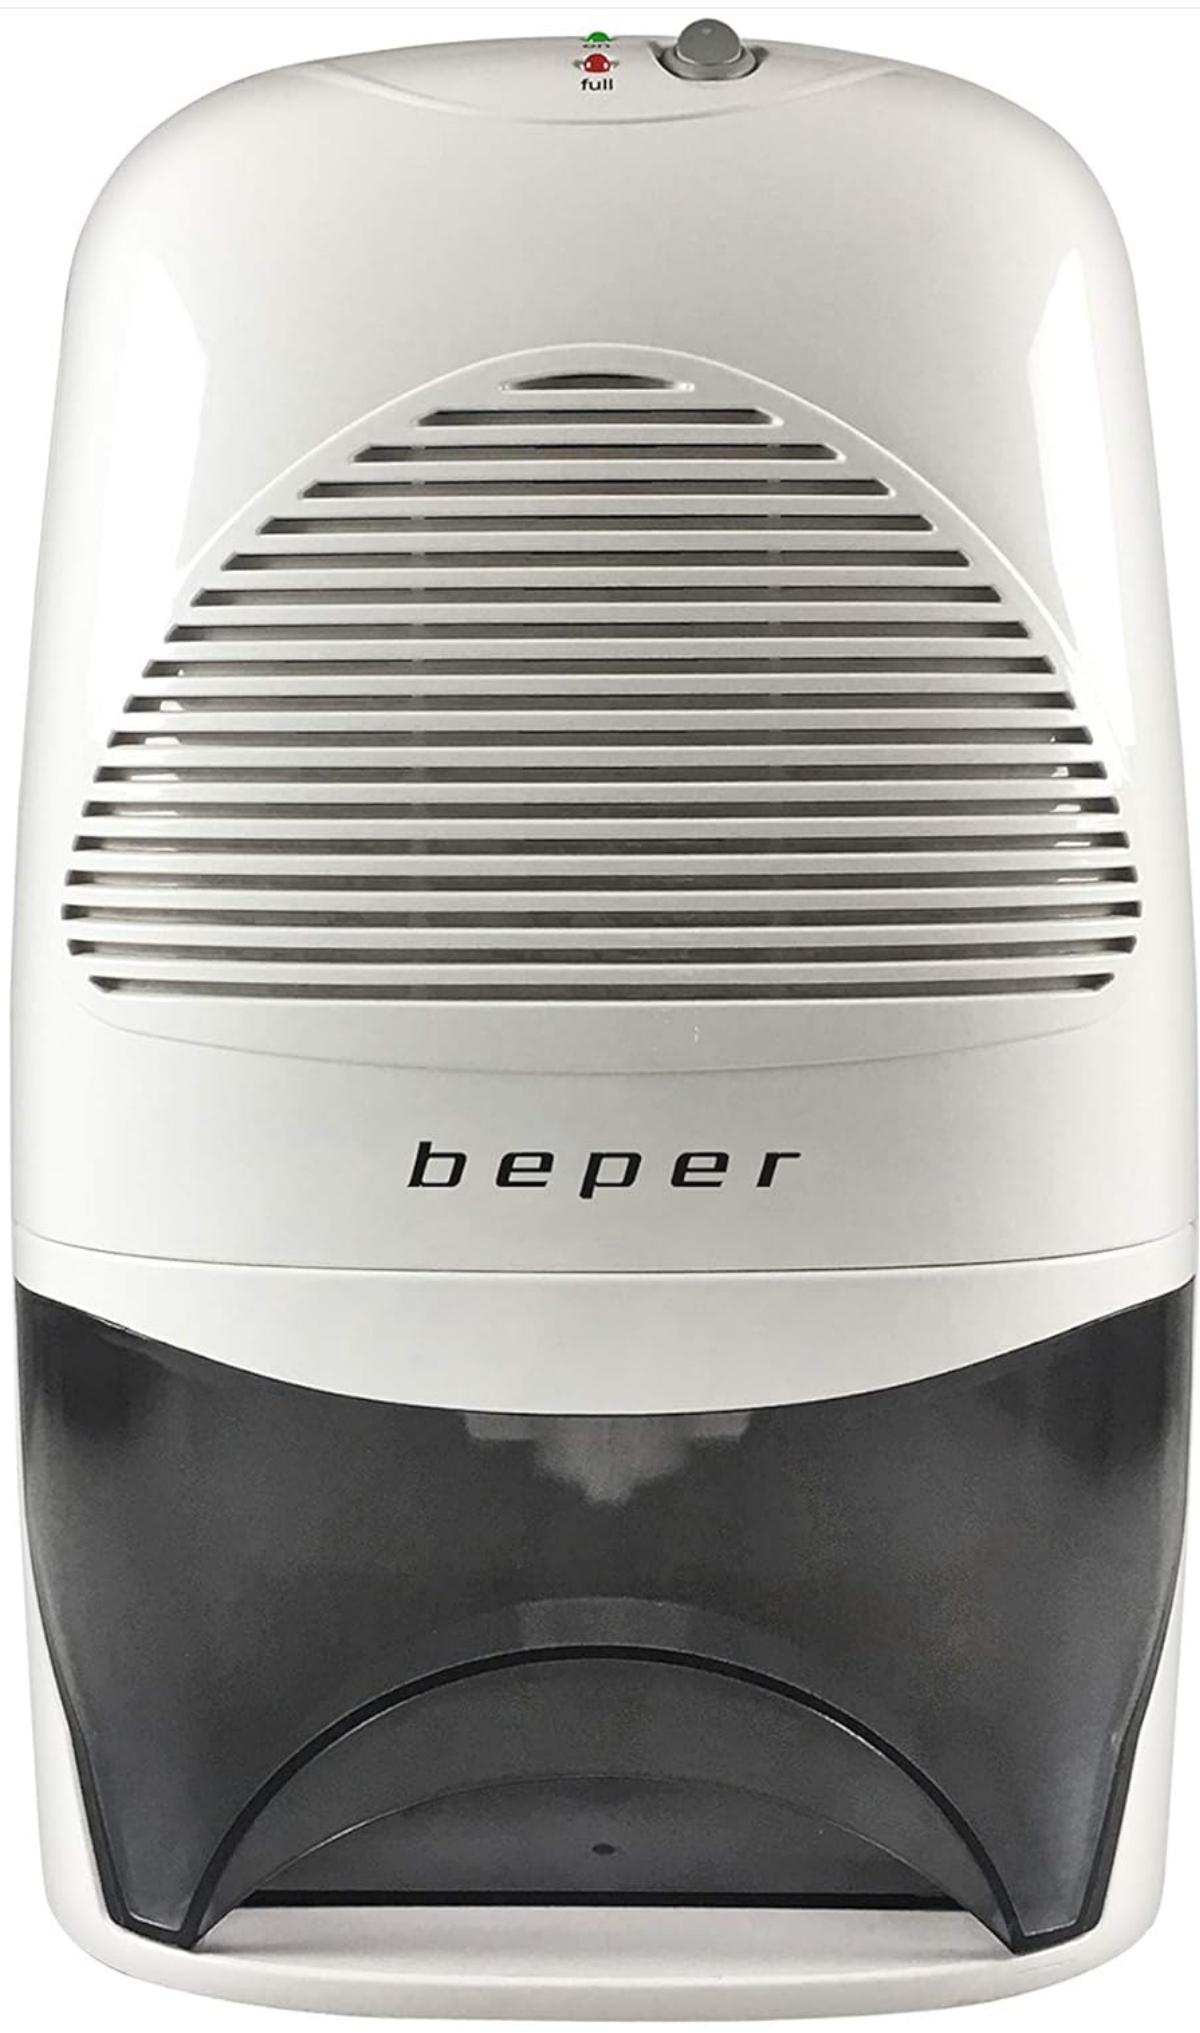

Figure 1: Front View of the Dehumidifier. This image displays the front of the BEPER 70.420 Thermoelectric

Dehumidifier, showing its white and grey casing, the air intake grille, the BEPER logo, and the transparent water tank at the bottom. The control button and indicator light are visible on the top surface.

Figure 2: Dehumidifier in Use. This image shows the BEPER 70.420 Thermoelectric Dehumidifier placed in a modern bathroom environment, demonstrating its compact size and suitability for small to medium-sized rooms. The unit is positioned on the floor next to a bathtub.

1. **Air Inlet Grille:** Where humid air enters the unit.
2. **Air Outlet:** Where dry air is expelled.
3. **Power Button/Indicator Light:** Controls power and indicates operational status.
4. **Water Tank:** Collects condensed moisture. Capacity: 2 Liters.
5. **Power Cord:** Connects the unit to an electrical outlet.

4. SETUP

1. **Unpacking:** Carefully remove the dehumidifier from its packaging. Retain the packaging for future storage or transport.
2. **Placement:** Place the dehumidifier on a firm, level surface in the desired room. Ensure there is at least 20 cm (8 inches) of clear space around the air inlet and outlet grilles for proper air circulation. Avoid placing it directly against walls or furniture.
3. **Power Connection:** Ensure the water tank is correctly inserted. Plug the power cord into a suitable electrical outlet (AC 220-240V, 50/60Hz).

5. OPERATING INSTRUCTIONS

1. **Turning On:** Press the power button located on the top of the unit. The indicator light will illuminate, indicating that the dehumidifier is operating.

2. **Dehumidification Process:** The thermoelectric module will begin to cool, and moisture from the air will condense on its surface, dripping into the water tank. The unit can remove up to 600 ml of water per day.
3. **Automatic Shut-off:** The dehumidifier is equipped with an automatic shut-off feature. When the 2-liter water tank is full, the unit will automatically turn off, and the indicator light will change (or turn off, depending on model specifics, typically it changes color or flashes) to signal that the tank needs emptying.
4. **Emptying the Water Tank:**
 - Carefully pull out the water tank from the front of the unit.
 - Empty the collected water into a sink or drain.
 - Slide the empty water tank back into the dehumidifier until it clicks securely into place.
 - The dehumidifier will resume operation automatically once the tank is reinserted correctly.
5. **Turning Off:** Press the power button again to turn off the dehumidifier. The indicator light will extinguish.

6. MAINTENANCE AND CLEANING

Regular cleaning helps maintain the efficiency and lifespan of your dehumidifier.

1. **Before Cleaning:** Always unplug the dehumidifier from the power outlet before cleaning.
2. **Cleaning the Exterior:** Wipe the exterior surfaces of the unit with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the plastic.
3. **Cleaning the Water Tank:**
 - Remove the water tank and empty any remaining water.
 - Rinse the tank with clean water. If there is any residue or odor, you can use a mild detergent and a soft brush, then rinse thoroughly.
 - Allow the tank to air dry completely before reinserting it into the unit.
4. **Air Inlet/Outlet Grilles:** Use a soft brush or a vacuum cleaner with a brush attachment to gently remove any dust or debris from the air inlet and outlet grilles.
5. **Storage:** If storing the dehumidifier for an extended period, ensure the water tank is empty and clean, and the unit is dry. Store it in a cool, dry place, preferably in its original packaging.

7. TROUBLESHOOTING

Before contacting customer support, please refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	No power supply. Power button not pressed.	Check if the unit is properly plugged into a working outlet. Press the power button firmly.
Dehumidifier is running but not collecting water.	Room humidity is too low. Air vents are blocked. Water tank not properly seated.	The unit will not collect water if the humidity is already low. Ensure air inlet and outlet are clear. Remove and reinsert the water tank securely.
Indicator light is on, but unit is not running.	Water tank is full.	Empty the water tank and reinsert it correctly. The unit should resume operation.

Problem	Possible Cause	Solution
Unit is noisy.	Unit is not on a level surface. Obstruction in fan.	Place the unit on a flat, stable surface. Unplug the unit and check for any obstructions in the air vents.

If the problem persists after trying these solutions, please contact BEPER customer support.

8. SPECIFICATIONS

Brand: BEPER

Model: 70.420

Type: Thermolectric Dehumidifier

Material: Plastic

Color: White/Grey

Power: 60 Watts

Water Tank Capacity: 2 Liters

Dehumidification Capacity: Up to 600 ml/day

Product Dimensions: Approximately 21.5 cm (Depth) x 26 cm (Width) x 43.5 cm (Height)

Weight: 2.83 Kilograms

Special Feature: Automatic Shut-off when water tank is full

9. WARRANTY AND CUSTOMER SUPPORT

This BEPER product is covered by a manufacturer's warranty. For detailed warranty information, please refer to the warranty card included with your purchase or visit the official BEPER website.
