Lemax Plaza System Grey 32 Pieces Road Set Instruction Manual

Brand: Lemax | Model: 64099

INTRODUCTION

This manual provides instructions for the assembly and use of your Lemax Plaza System Grey 32 Pieces Road Set. This modular set is designed to create realistic road and plaza foundations for your miniature village or Christmas nativity scene, enhancing the overall display with detailed pathways and open areas.

PACKAGE CONTENTS

The Lemax Plaza System Grey 32 Pieces Road Set (Model 64099) includes the following components:

- 32 individual grey modular road and plaza sections. These pieces vary in shape, including straight, curved, corner, and ramp sections, allowing for diverse layout configurations.
- A quantity of small interlocking connectors to secure the modular pieces together.

This image displays the complete set of 32 grey modular road and plaza pieces, along with a small bag containing additional connectors. The pieces are designed to interlock, forming diverse layouts for miniature village scenes.

SETUP AND ASSEMBLY

The Lemax Plaza System is designed for easy, modular assembly. Follow these steps to create your desired road or plaza layout:

1. **Unpack Components:** Carefully remove all road and plaza sections, along with the connectors, from the packaging.
2. **Identify Piece Types:** Familiarize yourself with the different shapes of the modular pieces, such as straight segments, curved sections, corner pieces, and ramp sections.
3. **Plan Your Layout:** Before connecting, arrange the pieces loosely on your display surface to visualize your desired road or plaza configuration. Consider the flow of your miniature village and where you want pathways or open areas.
4. **Connect Pieces:** Align the interlocking tabs on the edges of two pieces. Gently press them together until they click securely into place. For added stability or complex arrangements, use the small connectors provided by inserting them into the designated slots on the underside or sides of the pieces.
5. **Ensure Stability:** After connecting all desired pieces, gently test the assembled structure to ensure all connections are secure and the layout is stable.

OPERATING INSTRUCTIONS

Once assembled, the Lemax Plaza System serves as a foundational element for your miniature village display. There are no operational functions for this product beyond its physical arrangement.

- **Placement:** Position your assembled road and plaza system on a flat, stable surface that will serve as your miniature village base.
- **Integration:** Arrange your Lemax buildings, figures, trees, and other accessories on and around the road sections to create a cohesive and detailed scene.
- **Reconfiguration:** The modular design allows for easy disassembly and reconfiguration, enabling you to change your village layout for different seasons, themes, or display spaces.

MAINTENANCE

Proper care will help preserve the appearance and longevity of your Lemax Plaza System:

- **Cleaning:** To remove dust or light debris, gently wipe the pieces with a soft, dry, lint-free cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish or material.
- **Storage:** When not in use, store the road and plaza pieces in their original packaging or a clean, dry container. Ensure they are protected from excessive weight or pressure to prevent warping or breakage.
- **Environmental Conditions:** Avoid prolonged exposure to direct sunlight, high humidity, or extreme temperatures, which can lead to discoloration, fading, or material degradation over time.

TROUBLESHOOTING

The Lemax Plaza System is a static display accessory and typically does not require troubleshooting. However, if you encounter minor issues, consider the following:

- **Pieces do not connect smoothly:**
Solution: Ensure that the interlocking tabs and slots are perfectly aligned. Apply gentle, even pressure. Do not force pieces together, as this may cause damage to the tabs or the pieces themselves. Check for any debris obstructing the connection points.
- **Assembled layout is unstable:**
Solution: Verify that all pieces are fully interlocked and that the small connectors are properly inserted where applicable. Ensure the display surface is flat and level. Uneven surfaces can cause instability in the assembled structure.

SPECIFICATIONS

Brand	Lemax
-------	-------

Model Number	64099
Product Type	Modular Road/Plaza System
Number of Pieces	32
Color	Grey
Approximate Individual Piece Dimensions (H x W x D)	0.8 cm x 7.6 cm x 7.6 cm (0.31 in x 3 in x 3 in)
