---

Your Kmise Concert Ukulele UK-24F package includes:

- Kmise Concert Ukulele UK-24F
- Ukulele Bag
- Clip-on Tuner

## SETUP

---

### 1. Initial Inspection

Upon receiving your ukulele, carefully remove it from its packaging and inspect it for any signs of damage. Ensure all components are present as listed in the 'What's in the Box' section.

## 2. Stringing and Tuning

Your ukulele comes pre-strung with Aquila nylon strings. New strings require some stretching before they hold their tune consistently. Tune your ukulele frequently during the first few days of playing.

Use the included clip-on tuner:

1. Clip the tuner onto the headstock of your ukulele.
2. Pluck each string individually. The tuner display will show the note.
3. Adjust the tuning pegs until the tuner indicates the correct note for each string (G-C-E-A, from top to bottom).

## 3. Attaching the Strap

If you wish to use a strap (not included, but the ukulele has a strap button), attach one end to the strap button located at the bottom of the ukulele body. The other end can typically be tied around the headstock, just above the

nut.

## OPERATING YOUR UKULELE

### 1. Holding the Ukulele

Hold the ukulele against your body, resting the back against your chest or stomach. Support the neck with your left hand (if right-handed) and use your right hand for strumming or picking.

### 2. Basic Strumming

Use your thumb or index finger to gently strum across all four strings. Practice upstrokes and downstrokes to get a feel for the rhythm and sound.

### 3. Learning Chords

Begin by learning basic chords such as C, G, Am, and F. Many online resources and tutorials are available to guide you. Place your fingers firmly on the frets to produce clear notes.

## MAINTENANCE

### 1. Cleaning

Regularly wipe down your ukulele with a soft, dry cloth to remove dust and fingerprints. Avoid using harsh chemicals or abrasive materials that could damage the matte finish.

### 2. String Care and Replacement

Over time, strings can wear out or lose their tone. Replace strings as needed to maintain optimal sound quality. Refer to online tutorials for guidance on changing ukulele strings.

### 3. Storage

Store your ukulele in its included bag when not in use to protect it from dust, humidity, and accidental bumps. Avoid exposing the instrument to extreme temperatures or direct sunlight.

## TROUBLESHOOTING

### 1. Tuning Instability

New nylon strings will stretch significantly during the first few days of use. Tune your ukulele frequently (before and during playing sessions) until the strings stabilize. This is normal for new instruments.

### 2. Buzzing Strings

If you hear a buzzing sound, ensure your fingers are pressing down firmly on the frets, just behind the metal fret wire. Also, check if any strings are too loose or if the action (string height) is too low. If the issue persists, consult a professional.
