## phonar SL-1601-36

# phonar 36 inch Under Cabinet LED Lighting Instruction Manual

Model: SL-1601-36

## PRODUCT OVERVIEW

---

The phonar 36 inch Under Cabinet LED Lighting provides efficient and versatile illumination for various indoor spaces such as kitchens, closets, and wardrobes. This LED lamp features a slim aluminum alloy fixture, an acrylic diffuser, and a touch sensor for convenient operation. It is designed for plug-in or hardwired installation and offers warm white light at 3000K.

## SETUP AND INSTALLATION

The phonar Under Cabinet LED Lighting is designed for easy installation. Choose between screw mounting for a permanent fixture or the double-sided sticky strip for a non-permanent solution.

### Installation Steps:

- 1. Choose Mounting Method:** Decide whether to use the provided screws or the double-sided sticky mounting strip.
- 2. Position the Light Bar:** Select the desired location under your cabinet or shelf. Ensure the surface is clean and dry for optimal adhesion if using the sticky strip.
- 3. Secure the Light Bar:**
  - **For Screws:** Mark the screw positions, drill pilot holes if necessary, and secure the light bar using the provided screws.
  - **For Sticky Strip:** Peel the backing from the double-sided sticky strip and firmly press the light bar into place.
- 4. Connect Power:** Plug the 12V power adapter into the light bar.

5. **Plug into Outlet:** Insert the power adapter into a suitable electrical outlet.

## OPERATING INSTRUCTIONS

---

The phonar Under Cabinet LED Lighting offers two primary operating modes based on how the power adapter is connected.

### Mode 1: Touch Sensor Control

- **Connection:** Plug the 12V power adapter into the side of the light bar that features the touch button.
- **Operation:** Lightly tap the touch button on the light bar to turn the light ON or OFF.

### Mode 2: All-Time Lighting

- **Connection:** Plug the 12V power adapter into the opposite side of the light bar (the side without the touch button).
- **Operation:** In this mode, the light will remain ON continuously as long as it is plugged into power. The touch button will not function to turn the light on or off.

## MAINTENANCE

---

To ensure the longevity and optimal performance of your phonar Under Cabinet LED Lighting, follow these simple maintenance guidelines:

- **Cleaning:** Gently wipe the light bar and diffuser with a soft, dry, or slightly damp cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish or electronic components.
- **Power Disconnection:** Always unplug the light from the power source before cleaning or performing any maintenance.
- **Inspection:** Periodically check the power cord and connections for any signs of wear or damage. If any damage is found, discontinue use and contact customer support.

## TROUBLESHOOTING

---

If you encounter any issues with your phonar Under Cabinet LED Lighting, refer to the following troubleshooting tips:

- **Light Does Not Turn On:**
  - Ensure the 12V power adapter is securely plugged into both the light bar and a working electrical outlet.
  - Verify that the light bar is connected to the correct port for your desired operating mode (touch sensor or all-time lighting).
  - Test the electrical outlet with another device to confirm it is functional.
- **Touch Sensor Not Responding:**
  - Confirm the power adapter is plugged into the touch sensor side of the light bar.
  - Ensure your finger makes direct contact with the touch sensor area.

- **Light Output is Dim or Flickering:**

- Check all connections to ensure they are secure.
- Ensure the power adapter is providing adequate power.
- If the issue persists, contact customer support.

## SPECIFICATIONS

---
