HP Aruba 2930F 24G 4SFP+ Switch User Manual

Model: JL253A

1. INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of the HP Aruba 2930F 24G 4SFP+ Switch (Model JL253A). Please read this manual thoroughly before using the device to ensure proper setup and optimal performance. Retain this manual for future reference.

2. PRODUCT OVERVIEW

The HP Aruba 2930F 24G 4SFP+ Switch is a high-performance network switch designed for enterprise edge deployments. It features 24 Gigabit Ethernet ports and 4 SFP+ ports for high-speed uplinks, providing reliable and secure connectivity.

Figure 2.1: Front view of the HP Aruba 2930F 24G 4SFP+ Switch, showing 24 RJ45 Gigabit Ethernet ports, 4 SFP+ uplink ports, and LED indicators.

Figure 2.2: Angled view of the HP Aruba 2930F 24G 4SFP+ Switch, highlighting its compact design suitable for rack mounting.

Figure 2.3: Side view of the HP Aruba 2930F 24G 4SFP+ Switch, showing ventilation slots for heat dissipation.

3. SETUP

3.1 Unpacking and Contents Verification

Carefully unpack the switch and verify that all components are present. The package should include:

- HP Aruba 2930F 24G 4SFP+ Switch (Model JL253A)

- Power cable
- Rack-mount kit
- Console cable

If any items are missing or damaged, contact your vendor immediately.

3.2 Physical Installation

1. **Rack Mounting:** Use the provided rack-mount kit to secure the switch in a standard 19-inch equipment rack. Ensure adequate ventilation around the switch.
2. **Power Connection:** Connect the power cable to the switch's power input and then to a grounded AC power outlet.
3. **Initial Network Connection:** Connect a computer to the switch's console port using the console cable for initial configuration, or connect to any RJ45 port for network access if DHCP is available.

Ensure all cables are securely connected and routed to prevent accidental disconnections.

4. OPERATING INSTRUCTIONS

4.1 Powering On and Initial Boot

Once the power cable is connected, the switch will automatically power on. Observe the LED indicators on the front panel. The Power LED should illuminate, indicating the device is receiving power. Other LEDs will indicate port status and activity.

4.2 Port Connectivity

- **RJ45 Ports (10/100/1000BASE-T):** Connect standard Ethernet cables (Cat5e or higher) to these ports for connecting network devices such as computers, servers, and other switches. These ports support auto-negotiation for speed and duplex settings.
- **SFP+ Ports (10 Gigabit Ethernet):** Use compatible SFP+ transceivers and fiber optic cables for high-speed uplinks to core switches or servers.
- **PoE+ (Power over Ethernet Plus):** If your model supports PoE+, these ports can provide power to compatible devices like IP phones, wireless access points, and security cameras, eliminating the need for separate power supplies.

4.3 LED Indicators

The front panel LEDs provide visual status of the switch and its ports:

- **Power LED:** Indicates power status (On/Off).
- **Fault LED:** Indicates system errors or malfunctions.
- **Port Link/Activity LEDs:** Indicate link status (solid green for link) and network activity (flashing green). Different colors or patterns may indicate different speeds (e.g., amber for 100Mbps, green for 1Gbps). Refer to the device's specific LED guide for detailed interpretation.

5. MAINTENANCE

5.1 Cleaning

Regularly clean the exterior of the switch with a soft, dry cloth. Do not use liquid or aerosol cleaners. Ensure ventilation openings are free from dust and obstructions to maintain proper airflow.

5.2 Firmware Updates

Periodically check the Hewlett Packard (Aruba) support website for firmware updates. Keeping the firmware up-to-date ensures optimal performance, security, and access to new features. Follow the instructions provided with the firmware update package carefully.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your HP Aruba 2930F switch.

- **No Power:**
 - Verify the power cable is securely connected to both the switch and a working power outlet.
 - Check the power outlet with another device to ensure it is functional.
- **No Link on a Port:**
 - Ensure the Ethernet cable is properly connected at both ends.
 - Try a different Ethernet cable.
 - Test the connected device with another port or switch to isolate the issue.
 - Verify the connected device is powered on and functioning correctly.
- **Slow Network Connection:**
 - Check for excessive network traffic or bottlenecks.
 - Ensure cables are Cat5e or higher for Gigabit speeds.
 - Verify duplex settings on connected devices match the switch's auto-negotiated settings.
 - Consider updating the switch firmware.

For more advanced troubleshooting or persistent issues, consult the official Hewlett Packard (Aruba) support documentation or contact technical support.

7. SPECIFICATIONS

Feature	Value
Brand	HEWLETT PACKARD
Model Number	JL253A
Item Weight	2.4 Kilograms (5.28 pounds)
Product Dimensions (LxWxH)	17.42 x 7.88 x 1.73 inches
Voltage	200 Volts
Interface Type	RJ45, SFP+, PoE+
Data Transfer Rate	100 Megabits Per Second (per port, supports Gigabit on RJ45 and 10 Gigabit on SFP+)
RAM	1024 MB
Number of Ports	24 Gigabit Ethernet, 4 SFP+ (Total 28 logical ports)
Included Components	Power cable, rack-mount kit, console cable
Color	Black
Compatible Devices	Desktop (general network devices)

Note: Data Transfer Rate of "100 Megabits Per Second" may refer to a baseline or specific port type; the switch supports Gigabit Ethernet on RJ45 ports and 10 Gigabit Ethernet on SFP+ ports.

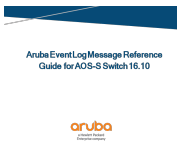

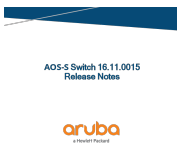

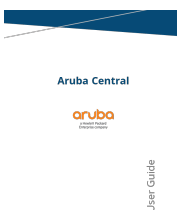

8. WARRANTY AND SUPPORT

This HP Aruba 2930F 24G 4SFP+ Switch is manufactured by HEWLETT PACKARD. For warranty information, please refer to the warranty card included with your product or visit the official Hewlett Packard Enterprise (Aruba) website. Technical support and additional resources can be found on their support portal.

For assistance, please visit: [Aruba Networks Support](#)

Overview

Aruba 2930F Switch Series

The Aruba 2930F Switch Series is designed for customers creating smart digital workplaces that are optimized for mobile users with an integrated wired and wireless approach. These convenient Layer 3 network switches include built-in uplinks and PoE power, and are simple to deploy and manage with advanced security and network management tools like Aruba ClearPass Policy Manager, Aruba

A powerful **Aruba Provision** AGC delivers performance, robust feature support and value with programmability for the latest applications. Stacking with Virtual Switching Framework (VSF) provides simplicity and scalability. The 2930F supports built-in 10GbE or 10GbE uplinks, PoE+, Access GSSP routing, Dynamic Segmentation, robust QoS, RFP routing, and IPv6 with no software licensing required.

The **Aruba 2930F Switch Series** provides a convenient and cost-effective access switch solution that can be quickly set up with Zero Touch Provisioning. The robust basic Layer 3 feature set includes a limited lifetime warranty.

Aruba 2930F Switch Series

Key features

- Aruba Layer 3 switch series with VSF stacking, static, RPF and Access GSSP Routing, dynamic segmentation, ACLs, and robust QoS
- Supports cloud and on-premise management. And advanced policy management using Aruba ClearPass
- Convenient built-in 10GbE or 10GbE uplinks and up to 7x24 PoE+
- Software-defined ready with REST APIs and OpenFlow support
- Simple deployment with Zero Touch Provisioning
