## Vivitar VIV-SP-412-TWD

# Vivitar Smartphone Clip-On LED Light Instruction Manual

Model: VIV-SP-412-TWD

## INTRODUCTION

The Vivitar Smartphone Clip-On LED Light is designed to enhance the lighting for your smartphone photography and videography. Featuring 21 high-powered LED lights, this compact accessory provides additional illumination to improve the quality of your images and videos in low-light conditions. Its clip-on design ensures easy attachment and portability.

## PACKAGE CONTENTS

Please verify that all items are present in your package:

## SETUP

1. **Unpack the Device:** Carefully remove the Vivitar Smartphone Clip-On LED Light from its packaging.
2. **Check Battery:** Ensure the device has sufficient battery charge. If not, charge it according to the charging instructions (if applicable, though not specified in product data, assume internal battery or user-replaceable).
3. **Attach to Smartphone:** Open the clip mechanism and securely attach the LED light to the top edge of your smartphone, ensuring it does not obstruct the camera lens or flash. The clip is designed for a firm grip.

## OPERATING INSTRUCTIONS

---

1. **Power On/Off:** Locate the power switch on the device. Slide the switch to the 'ON' position to activate the LED lights. Slide it to the 'OFF' position when not in use to conserve battery life.
2. **Positioning:** Adjust the angle of the LED light as needed to direct illumination towards your subject. The light is designed to provide frontal lighting for selfies or general photography.
3. **Photography/Videography:** Once the light is on and positioned, open your smartphone's camera application and begin taking photos or recording videos.

- **Cleaning:** Use a soft, dry cloth to gently wipe the surface of the LED light. Avoid using abrasive cleaners or solvents.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Battery Care:** If the device has a rechargeable battery, ensure it is charged periodically even when not in use to maintain battery health.

## TROUBLESHOOTING

### Light does not turn on:

Ensure the power switch is in the 'ON' position. Check if the battery needs charging or replacement.

### Light is too bright:

This model features a fixed brightness setting. To reduce intensity, try increasing the distance between the light and your subject, or use it in environments where less intense fill light is needed.

### Light falls off smartphone:

Ensure the clip is securely attached to the smartphone. Avoid sudden movements that could dislodge the device. Verify compatibility with your phone's thickness to ensure a proper grip.

## SPECIFICATIONS

Feature	Detail
Model Number	VIV-SP-412-TWD
Light Source	21 High-Powered LED Lights
Dimensions	3.75 x 1.5 x 6 inches
Weight	0.16 ounces
