Troubleshooting

- **Phone not turning on:** Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again.
- **Poor signal or no network:** Check that the SIM card is correctly inserted. Move to an area with better network coverage. Contact your service provider if the issue persists.
- **Applications crashing or freezing:** Close and restart the application. If the problem continues, restart the phone. Consider clearing the app's cache via **Settings** > **Apps**.
