

RIGID 20631

RIGID Ignite LED Diffused Flush Mount Light (Model 20631)

Instruction Manual

1. INTRODUCTION

The RIGID Ignite LED Diffused Flush Mount Light (Model 20631) is a compact and versatile auxiliary lighting solution. Designed for various applications including cars, trucks, motorcycles, UTVs, and marine environments, this light provides 1000 raw lumens of diffused light output. Its small footprint, approximately 1.4" x 1.4" x 2", makes it suitable for installations where space is limited. This manual provides essential information for the safe installation, operation, and maintenance of your RIGID Ignite light.

Key Features:

- Smallest forward projecting light in the RIGID product line.
- Easy installation, typically requiring a 1.75-inch hole saw.
- Wide operating voltage range: 6-28 VDC.
- Diffused beam pattern for broad, short-range illumination.
- IP68 compliant for dust and water resistance.

2. SAFETY INFORMATION

Please read and understand all safety instructions before installing or operating the RIGID Ignite LED Diffused Flush Mount Light. Failure to follow these instructions may result in electrical shock, fire, serious injury, or property damage.

- Always disconnect the vehicle's battery before performing any electrical work.
- Ensure all wiring connections are secure and properly insulated to prevent short circuits.
- Do not look directly into the light when it is illuminated, as it can cause temporary vision impairment.
- Mount the light securely to prevent it from becoming a projectile during vehicle operation or impact.
- Verify that the installation does not interfere with existing vehicle components or safety systems.
- Consult a professional if you are unsure about any part of the installation process.

3. PACKAGE CONTENTS

Upon opening the package, verify that all components are present and undamaged.

- 1x RIGID Ignite LED Diffused Flush Mount Light
- Mounting Hardware (screws, nuts, washers)
- Wiring Harness (may vary by kit)
- Installation Template (may be included for drilling)

4. PRODUCT OVERVIEW

The RIGID Ignite LED Diffused Flush Mount Light is engineered for durability and performance in demanding conditions. Its compact design allows for discreet and integrated mounting.

Figure 4.1: Front view of the RIGID Ignite LED Diffused Flush Mount Light. This image highlights the central LED array with its diffused lens and the four visible mounting screw heads, along with two additional mounting holes on the sides of the black housing.

Figure 4.2: Angled view of the RIGID Ignite LED Diffused Flush Mount Light. This perspective shows the depth of the light housing and the side where the electrical connection would typically be made, emphasizing its compact form factor.

Figure 4.3: RIGID Ignite LED Diffused Flush Mount Light installed on a vehicle's rear bumper. The light is flush-mounted into the black textured bumper,

positioned near a red taillight,
demonstrating a typical auxiliary backup
light application.

Figure 4.4: Rear view of a white Jeep Renegade with the RIGID Ignite LED Diffused Flush Mount Light illuminated. The light is visible on the rear bumper, casting a bright, wide beam, illustrating its effectiveness as an auxiliary reverse or area light.

5. SETUP AND INSTALLATION

Proper installation is crucial for the performance and longevity of your RIGID Ignite light. Follow these general steps for installation. Specific vehicle applications may require additional considerations.

1. **Choose Mounting Location:** Select a flat, secure surface on your vehicle for flush mounting. Ensure there is sufficient clearance behind the mounting surface for the light housing and wiring.
2. **Prepare Mounting Surface:** If flush mounting, use the provided template (if applicable) or measure carefully to mark the cutting area. A 1.75-inch hole saw is typically required for the main opening. Drill pilot holes for the mounting screws.
3. **Drill/Cut Opening:** Carefully cut the marked opening and drill the mounting screw holes. Deburr any sharp edges.
4. **Wiring:**
 - Connect the positive (+) wire from the light to a fused 12V-28V power source (e.g., auxiliary switch, reverse light circuit).
 - Connect the negative (-) wire from the light to a suitable ground point on the vehicle chassis.
 - Ensure all connections are waterproof and protected from abrasion.
5. **Mount the Light:** Insert the light into the prepared opening. Secure it using the provided mounting hardware (screws, nuts, washers). Do not overtighten.
6. **Test Functionality:** Reconnect the vehicle battery. Activate the light to ensure it functions correctly. Check for proper beam pattern and illumination.

Note: For optimal performance and safety, it is recommended to use a relay and appropriate gauge wiring for your installation, especially if connecting to a high-current circuit or multiple lights.

6. OPERATING INSTRUCTIONS

The RIGID Ignite LED Diffused Flush Mount Light operates as a simple on/off auxiliary light.

1. **Power On:** Activate the switch or circuit to which the light is connected. The light will illuminate, providing a broad, diffused beam.
2. **Power Off:** Deactivate the switch or circuit to turn off the light.

The diffused beam pattern is designed for short-range area illumination, making it ideal for backup lights, utility lighting, or scene lighting.

7. MAINTENANCE

The RIGID Ignite LED Diffused Flush Mount Light is designed for minimal maintenance.

- **Cleaning:** Periodically clean the lens with a soft cloth and mild soap and water to remove dirt, mud, or debris that may obstruct light output. Avoid abrasive cleaners or harsh chemicals.
- **Inspection:** Regularly inspect the mounting hardware and wiring for any signs of looseness, corrosion, or damage. Tighten any loose fasteners and repair or replace damaged wiring as needed.
- **Water Resistance:** While IP68 compliant, avoid directing high-pressure water sprays directly at the light for extended periods, especially at seals.

8. TROUBLESHOOTING

If your RIGID Ignite light is not functioning as expected, refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
Light does not turn on.	No power, faulty wiring, blown fuse, faulty switch.	Check power connections, ensure proper grounding, inspect fuse in the circuit, test the switch.
Light flickers or is dim.	Loose connection, insufficient voltage, damaged wiring.	Verify all connections are secure, check vehicle voltage, inspect wiring for damage.
Moisture inside the lens.	Compromised seal, improper installation.	Ensure mounting screws are tightened correctly. If moisture persists, contact customer support.

If troubleshooting steps do not resolve the issue, contact RIGID customer support for further assistance.

9. SPECIFICATIONS

Feature	Detail
Model Number	20631
Brand	RIGID
Light Type	LED Diffused Flush Mount
Raw Lumens	1000
LEDs	1
Amp Draw	12
Voltage Range	6-28 VDC
Lux at 10m	9
Beam Distance	59.9 m

Feature	Detail
Peak Beam Intensity	884 cd
Dimensions (L x W x H)	Approximately 1.4" x 1.4" x 2" (Light) / 5 x 5 x 5 inches (Packaging)
Item Weight	0.3 Pounds / 4.8 ounces
Water Resistance	IP68 Compliant
Color	Black
Form Factor	Pod
Recommended Uses	Vehicle Exterior, Vehicle Interior
Automotive Fit Type	Universal Fit
Assembly Location	Designed, engineered and assembled in USA.

10. WARRANTY AND SUPPORT

For information regarding the product warranty, please refer to the official RIGID Industries website or contact their customer support directly. Warranty terms and conditions may vary.

For technical assistance, troubleshooting beyond this manual, or warranty claims, please contact RIGID Industries customer support.

- **Manufacturer:** RIGID INDUSTRIES
- **Website:** www.rigidindustries.com
- **Contact:** Refer to the manufacturer's website for current contact information.
