## 4. SETUP AND PROGRAMMING

**Important:** DIY programming for this smart key fob is **not available**. This key fob must be programmed by a qualified professional, such as an automotive locksmith or a dealership service center. Attempting to program the key fob yourself may result in damage or improper functionality.

When you receive your new key fob, contact a professional locksmith or your car dealership to schedule programming. They have the specialized tools and expertise required to correctly link the key fob to your vehicle's security system.

## 5. OPERATING INSTRUCTIONS

---

Once your key fob is successfully programmed, you can use its buttons to control various functions of your vehicle:

- **Lock Button (Closed Padlock Icon):** Press once to lock all vehicle doors.
- **Unlock Button (Open Padlock Icon):** Press once to unlock the driver's door. Press twice to unlock all vehicle doors.
- **Remote Start Button (x2 Arrow Icon):** Press this button twice within a short period to remotely start your vehicle (if equipped). Refer to your vehicle's owner's manual for specific remote start procedures.
- **Panic Button (Red PANIC button):** Press and hold this button to activate the vehicle's alarm system. Release the button to deactivate the alarm.

## 6. MAINTENANCE

---

Proper care and maintenance will extend the life of your key fob.

### Battery Replacement

If the remote key stops working or its range decreases, the battery may need replacement. The key fob uses a standard lithium coin cell battery. To replace:

1. Carefully open the key fob casing.
2. Remove the old battery.
3. Insert a new battery of the same type, ensuring correct polarity.
4. Close the key fob casing securely.

### General Care Tips

- Avoid placing the key fob near strong electronic equipment that may cause interference.
- Do not drop the key fob or subject it to strong impacts.
- Prevent water or other liquids from entering the key fob.
- Avoid contact with metal objects that could short-circuit the internal components.

- Always use the correct battery type for replacement.

## 7. TROUBLESHOOTING

---

If your key fob experiences issues, consider the following:

- **Key Fob Not Working:** If the key fob stops working after a few days, first try replacing the battery with a new one. Ensure the new battery is inserted correctly.
- **Programming Issues:** If the key fob was recently programmed and is not functioning, contact the professional locksmith or dealer who performed the programming for assistance.
- **Compatibility Check:** Double-check that the key fob's appearance, button quantity, model, frequency, and OE/FCC part number are consistent with your vehicle's requirements and your original key.

## 8. WARRANTY AND SUPPORT

---

SCITOO provides a 12-month after-sales service for this product. If you encounter any issues or have concerns regarding the functionality of your key fob, please contact SCITOO customer support for assistance. Ensure you have your purchase details available when contacting support.
