Condor 35ZR07

Condor Absorbent Pad, 43 Gallon, White, PK200 (Model 35ZR07) User Manual

1. Introduction

This manual provides comprehensive instructions for the proper use and handling of the Condor Absorbent Pad, Model 35ZR07. These pads are designed for efficient absorption of oil-only and petroleum-based fluids, making them suitable for various industrial and automotive applications. Please read this manual thoroughly before use to ensure safe and effective operation.

Image 1.1: Two stacks of Condor Absorbent Pads. These white pads are made of polypropylene and are designed to absorb oil-only fluids. Each pad is flat and rectangular, stacked neatly, indicating their compact storage and readiness for use.

2. Product Specifications

The Condor Absorbent Pad (Model 35ZR07) features the following specifications:

- **Material:** Polypropylene
- **Fluids Absorbed:** Oil Only / Petroleum
- **Color:** White
- **Volume Absorbed Per Package:** 43 gallons
- **Pad Dimensions:** 15 inches (Width) x 19 inches (Length)
- **Perforations:** No
- **Package Quantity:** 200 pads
- **Item Model Number:** 35ZR07
- **Country of Manufacture:** United States

3. Setup

Condor Absorbent Pads are ready for immediate use upon removal from their packaging. No assembly or special preparation is required.

1. **Unpack:** Carefully open the packaging to access the absorbent pads.
2. **Inspect:** Before deployment, visually inspect pads for any damage or contamination. Do not use damaged pads.
3. **Storage:** Store unused pads in a dry, cool environment, away from direct sunlight and potential contaminants, to maintain their absorbent properties.

4. Operating Instructions

Follow these steps for effective absorption of oil-based spills:

1. **Identify Spill:** Locate the oil-only or petroleum-based fluid spill. Ensure the area is safe for intervention.
2. **Deploy Pads:** Place the absorbent pads directly onto the spill. For larger spills, overlap pads to create a continuous absorbent surface.
3. **Allow Absorption:** Allow the pads sufficient time to absorb the fluid. The polypropylene material is designed to quickly wick and retain oil while repelling water.
4. **Monitor Saturation:** Replace pads as they become saturated. Saturated pads will appear discolored and heavier.
5. **Containment:** For spills that are spreading, use pads to create a barrier to prevent further spread before absorbing the main body of the spill.

Note: *These pads are designed for oil-only absorption and will not effectively absorb water-based fluids.*

5. Maintenance and Disposal

Proper maintenance and disposal are crucial for environmental safety and regulatory compliance.

5.1. Storage

Store unused pads in their original packaging or a sealed container in a dry, cool place. Protect from physical damage and exposure to chemicals that could compromise their integrity.

5.2. Disposal

Disposal of used absorbent pads must comply with all local, state, and federal regulations regarding hazardous waste. The absorbed fluid dictates the disposal method. Always consult with local waste management authorities or environmental agencies for specific guidelines.

- **Containment:** Place saturated pads into appropriate, sealed hazardous waste containers immediately after use.
- **Labeling:** Clearly label containers with the type of absorbed fluid and the date.
- **Transportation:** Arrange for transportation and disposal by certified hazardous waste disposal services.

6. Troubleshooting

This section addresses common concerns regarding the use of Condor Absorbent Pads.

Problem	Possible Cause	Solution
Pads not absorbing effectively.	Fluid is water-based; pads are saturated; pads are damaged.	Ensure fluid is oil-only/petroleum. Replace saturated pads. Inspect pads before use for damage.
Spill spreading despite pad deployment.	Insufficient pads used; pads not placed to contain spread.	Use more pads. Create a perimeter with pads to contain the spill before absorbing the center.
Difficulty with disposal.	Unfamiliarity with local regulations.	Contact local waste management or environmental agencies for specific hazardous waste disposal guidelines.

7. Warranty Information

Condor products are manufactured to high-quality standards. For specific warranty details regarding the Absorbent Pad Model 35ZR07, please refer to the warranty documentation provided with your purchase or contact Condor customer support directly. General warranty terms typically cover manufacturing defects under normal use conditions.

8. Customer Support

For further assistance, technical support, or inquiries regarding the Condor Absorbent Pad, Model 35ZR07, please contact Condor customer service.
