## 4. PREPARATION AND APPLICATION

Follow these steps for optimal application using your LUMINESS airbrush system:

- 1. Prepare the Foundation:** Start by adding 6-8 drops of LUMINESS Airbrush Foundation into the foundation well of your LUMINESS stylus. Securely place the no-spill cap on top of the well.
- 2. Activate the System:** Turn on your LUMINESS airbrush system. It is normal to feel air coming out of the stylus.
- 3. Initial Positioning:** Hold your stylus approximately four fingers away from the surface of your face.
- 4. Application Technique:** Gently pull back on the trigger to release the foundation. Continuously move your stylus in small, circular motions across your face.
- 5. Building Coverage:** Gradually build up foundation and coverage as needed by repeating the circular motions and light trigger pulls. Avoid holding the stylus stationary in one spot to prevent uneven application.

Proper care of your foundation bottle and airbrush system ensures optimal performance and product longevity.

- Bottle Storage:** Store the foundation bottle upright in a cool, dry place away from direct sunlight. Ensure the cap is tightly sealed after each use to prevent drying or contamination.
- Airbrush System Cleaning:** Regularly clean your LUMINESS airbrush stylus according to its specific instruction manual. This prevents clogging and ensures smooth application.
- Hygiene:** Avoid touching the dropper or the inside of the cap to prevent bacterial contamination.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
<b>Uneven Coverage / Streaks</b>	Stylus held too close or stationary; insufficient product; clogged stylus.	Maintain a distance of four fingers from the face and keep the stylus moving in circular motions. Ensure 6-8 drops are used. Clean the stylus if clogged.
<b>Foundation Appears Too Sheer</b>	Not enough product used; desire for higher coverage.	Apply additional thin layers until desired coverage is achieved. Ensure 6-8 drops are used initially.
<b>Foundation Settles into Fine Lines</b>	Skin dryness; excessive product application; lack of primer.	Ensure skin is well-moisturized before application. Apply thinner layers. Consider using a dedicated primer if not already using the 4-in-1's primer function effectively. Gently smooth out immediately after application.
<b>Bottle Cap Leaks</b>	Cap not securely tightened; damage to the cap or bottle.	Always ensure the cap is tightly sealed after each use. If leakage persists, contact customer support.
