# Tribest Greenstar Gold Twin Gear Juicer User Manual

Model: GP-E1503-B HD

## INTRODUCTION

Thank you for choosing the Tribest Greenstar Gold Twin Gear Juicer. This manual provides essential information for the safe and efficient operation, maintenance, and care of your juicer. Please read all instructions carefully before using the appliance to ensure optimal performance and longevity.

The Tribest Greenstar Gold Twin Gear Juicer is designed to extract high-quality juice from various fruits and vegetables, utilizing advanced twin gear technology for maximum nutrient retention.

## IMPORTANT SAFETY PRECAUTIONS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons.

- Read all instructions before operating the juicer.
- Do not immerse the motor base in water or other liquids.
- Always unplug the juicer from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Keep hands and utensils away from moving parts during operation to prevent injury.
- Ensure all parts are correctly assembled before turning on the appliance.
- Do not operate the juicer with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- This appliance is for household use only. Do not use outdoors.
- Supervise children closely when the appliance is in use.

## PARTS IDENTIFICATION

Familiarize yourself with the components of your Tribest Greenstar Gold Twin Gear Juicer:

**Image:** A complete view of the Tribest Greenstar Gold Twin Gear Juicer. The juicer is white with green accents, featuring the 'Green Star' logo and 'Twin Gear' label. A clear juice collection cup is positioned beneath the twin gear assembly. The main body includes a handle for portability and a control panel with a red power indicator light.

- **Hopper:** For feeding fruits and vegetables.
- **Plunger:** Used to push produce into the gears.
- **Twin Gears:** The core juicing mechanism.
- **Juicing Casing:** Encloses the twin gears and directs juice/pulp.
- **Outlet Adjusting Knob:** Controls pulp pressure.
- **Motor Base:** Houses the motor and controls.
- **Juice Container:** Collects extracted juice.
- **Pulp Container:** Collects expelled pulp.

## SETUP

Follow these steps to assemble your juicer before first use:

1. Unpack all components and remove any packaging materials.
2. Wash all detachable parts (excluding the motor base) with warm, soapy water. Rinse thoroughly and dry.
3. Place the motor base on a stable, flat, and dry surface.
4. Insert the twin gears into the juicing casing, ensuring they align correctly.
5. Attach the juicing casing assembly to the motor base, twisting until it locks securely into place.
6. Place the hopper onto the top of the juicing casing.
7. Position the juice container under the juice outlet and the pulp container under the pulp outlet.

8. Ensure the outlet adjusting knob is set to the appropriate position for the type of produce you are juicing (refer to operating instructions).

## OPERATING INSTRUCTIONS

---

Before juicing, prepare your ingredients by washing them thoroughly and cutting them into pieces that fit easily into the hopper.

1. Ensure the juicer is properly assembled and the juice and pulp containers are in place.
2. Plug the power cord into a grounded electrical outlet.
3. Turn on the juicer using the power button. The red indicator light will illuminate.
4. Slowly feed prepared fruits and vegetables into the hopper. Use the plunger to gently guide the produce down towards the twin gears. **Do not force the plunger.**
5. The juicer will automatically separate the juice and pulp into their respective containers.
6. For optimal extraction, adjust the outlet adjusting knob based on the hardness of the produce. A tighter setting (higher number) is for harder produce, and a looser setting (lower number) is for softer produce.
7. Once juicing is complete, turn off the juicer and unplug it from the outlet.
8. Disassemble the parts for cleaning immediately after use.

## MAINTENANCE AND CLEANING

---

Regular cleaning and maintenance will ensure your juicer operates efficiently and lasts longer. The detachable parts are dishwasher safe.

- **Immediate Cleaning:** Clean all detachable parts immediately after each use to prevent pulp from drying and sticking.
- **Disassembly:** Unplug the juicer. Disassemble the hopper, plunger, juicing casing, twin gears, and containers.
- **Washing:** Wash these parts with warm, soapy water using the cleaning brush provided to remove any residue. Rinse thoroughly.
- **Dishwasher Safe:** All detachable parts are dishwasher safe (top rack recommended).
- **Motor Base:** Wipe the motor base with a damp cloth. **Never immerse the motor base in water.**
- **Drying and Storage:** Ensure all parts are completely dry before reassembling or storing. Store the juicer in a clean, dry place.

## TROUBLESHOOTING

---

Refer to the table below for common issues and their solutions:

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; power switch off; parts not assembled correctly.	Ensure power cord is securely plugged in; turn power switch on; reassemble parts correctly until locked.

Problem	Possible Cause	Solution
Motor stops during operation.	Overload protection activated; too much produce fed too quickly.	Turn off and unplug the juicer. Remove excess produce. Wait 30 minutes for motor to cool before restarting. Feed produce slowly.
Low juice yield or wet pulp.	Outlet adjusting knob setting is too loose for produce; gears are clogged.	Adjust the outlet adjusting knob to a tighter setting (higher number). Disassemble and clean gears if clogged.
Loud noise or vibration.	Parts not assembled correctly; foreign object in juicer.	Disassemble and reassemble all parts, ensuring they are securely locked. Check for and remove any foreign objects.

## SPECIFICATIONS

Feature	Detail
Brand	Tribest
Model Number	1694-GP-E1503-B
Power Source	Corded Electric
Product Dimensions	7.5 x 20.6 x 13.3 inches
Item Weight	31 pounds
Blade Material	Plastic
Controller Type	Button
Dishwasher Safe Parts	Yes
UPC	888817582281
