SETUP

Charging the powerstation

1. Connect the supplied 9-inch Micro USB cable to the Micro USB input port on the powerstation.
2. Plug the other end of the Micro USB cable into a compatible USB wall adapter or computer USB port.
3. The LED indicator lights on the side of the powerstation will illuminate to show the charging progress. All four LEDs will be solid when fully charged.

Connecting to Your Device

1. Locate the built-in charging cable on the side of the powerstation.
2. For Apple devices (iPhone, iPad, iPod), ensure the Lightning adapter is attached to the cable. Plug the Lightning connector into your device's charging port.
3. For Micro USB devices (Android phones, other accessories), gently remove the Lightning adapter from the built-in cable. Plug the Micro USB connector into your device's charging port.

OPERATING INSTRUCTIONS

Charging Your Device

- Once your device is connected to the powerstation via the built-in cable, press the power button on the side of the powerstation.
- The LED indicators will light up, and your device will begin charging.
- To stop charging, press the power button again, or disconnect your device.

Checking Battery Level

- Press the power button once to view the current charge level of the powerstation.
- Each illuminated LED light represents approximately 25% of the battery capacity.

MAINTENANCE

- Keep the powerstation dry and away from moisture.
- Clean the exterior with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Store the powerstation in a cool, dry place when not in use.
- Avoid extreme temperatures, as this can affect battery performance and lifespan.

TROUBLESHOOTING

- **Powerstation not charging:** Ensure the Micro USB cable is securely connected to both the powerstation and the power source. Try a different USB wall adapter or port.
- **Device not charging:** Verify that the built-in cable is correctly connected to your device. Ensure the powerstation has sufficient charge by checking the LED indicators. Press the power button to initiate charging.
- **Slow charging:** Ensure you are using a compatible power adapter for charging the powerstation. For device charging, ensure the connection is secure.
- **Overheating:** If the powerstation becomes excessively hot during charging or use, disconnect it immediately and allow it to cool down. Do not use if overheating persists.
