# mophie Powerstation Plus 6,000mAh External Battery User Manual

Model: 3461\_PSPLUS-6K-2N1-SGRY-BLK

## 1. INTRODUCTION

The mophie Powerstation Plus 6,000mAh is a portable external battery designed to charge smartphones and tablets. It features a compact design, a 6,000mAh battery capacity, and a built-in switch-tip charging cable that supports both Apple Lightning and Micro USB devices. An additional USB-A port allows for simultaneous charging of two devices.

## 2. PACKAGE CONTENTS

Verify that all items are present in the package:

- mophie Powerstation Plus (6,000mAh)
- 9-inch Micro USB Cable (for recharging the powerstation)
- Quick Start Guide

## 3. SETUP

### 3.1 Charging the Powerstation

Before initial use, fully charge your mophie Powerstation Plus. To charge the powerstation:

1. Connect the included 9-inch Micro USB cable to the Micro USB input port on the powerstation.
2. Connect the other end of the Micro USB cable to a USB wall adapter (not included) or a computer's USB port.
3. The LED indicator lights on the powerstation will illuminate to show the charging status. All four LEDs will be solid when fully charged.

A full charge typically takes several hours. It is recommended to fully charge the powerstation before its first use to optimize battery performance.

## 4. OPERATING INSTRUCTIONS

### 4.1 Charging Your Device

The Powerstation Plus can charge one or two devices simultaneously.

#### Using the Built-in Switch-Tip Cable:

1. Locate the built-in cable on the side of the powerstation.
2. The cable features a switch-tip connector. Gently pull the tip to reveal either the Apple Lightning connector or the Micro USB connector.
3. Connect the appropriate connector to your smartphone or tablet.
4. The powerstation will automatically begin charging your device.

#### Using the Additional USB-A Port:

1. Connect your device's standard USB charging cable (not included) to the USB-A output port on the powerstation.
2. Connect the other end of your cable to your device.
3. The powerstation will automatically begin charging your device.

## 4.2 Checking Battery Level

Press the status indicator button on the side of the powerstation. The four LED lights will illuminate to indicate the current charge level:

- **4 LEDs:** 75-100% charged
- **3 LEDs:** 50-74% charged
- **2 LEDs:** 25-49% charged
- **1 LED:** 1-24% charged

## 5. MAINTENANCE

### 5.1 Cleaning

To clean your powerstation, use a soft, lint-free cloth. Avoid using harsh chemicals, cleaning solvents, or strong detergents.

### 5.2 Storage

Store the powerstation in a cool, dry place away from direct sunlight and extreme temperatures. For optimal battery health, avoid storing the device completely discharged for extended periods.

## 6. TROUBLESHOOTING

### 6.1 Device Not Charging

- Ensure the powerstation has sufficient charge (check LED indicators).
- Verify that the charging cable is securely connected to both the powerstation and your device.
- If using the built-in cable, ensure the correct tip (Lightning or Micro USB) is fully extended and connected.
- Try using a different charging cable or the other output port (if charging two devices).
- Restart your device.

### 6.2 Powerstation Not Recharging

- Ensure the Micro USB input cable is securely connected to the powerstation and the power source.
- Verify that the USB wall adapter or computer USB port is functioning correctly.
- Try using a different Micro USB cable or power source.
