Key Features:

- **Moisture-Resistant Construction:** Crafted from Oak wood and plywood, this bathroom vanity is designed for moisture resistance, ensuring long-lasting use in bathroom environments.
- **Ceramic Top Surface:** The vanity features a ceramic top with an undermount ceramic sink, offering a durable and easy-to-maintain surface that repels water droplets and stains.
- **Matching Wall Mirror:** Each vanity includes a matching square wall mirror with a color-matched frame, designed to complement the bathroom's aesthetic.
- **Ample Storage Options:** This vanity provides generous storage with a combination of shelving and dovetail drawers. Optional drawer units allow for customized storage solutions.
- **Smooth Operation:** Equipped with soft-closing double doors featuring metal hinges to prevent slamming, and metal drawer glides with brushed nickel handles for effortless use.

2. IMPORTANT SAFETY INFORMATION

Please read and understand all safety instructions before assembly, installation, or use of this product. Failure to follow these instructions may result in injury or product damage.

- Always follow the assembly instructions carefully.
- Keep hands and fingers away from door and drawer openings to prevent pinch injuries.
- Use appropriate safety gear (e.g., gloves, eye protection) when handling heavy components or tools.

- Ensure the vanity is installed on a level and stable surface to prevent tipping.
- Consult a professional plumber for all plumbing connections to ensure proper installation and prevent leaks.
- Do not overload drawers or shelves beyond their recommended weight capacity (Maximum Weight Capacity: 390 Pounds).
- Keep small children away from the assembly area and do not allow them to play with the product.

3. SETUP & INSTALLATION

3.1. Unpacking and Inspection

Carefully unpack all components and inspect for any damage. Report any damage to the retailer immediately. Ensure all parts listed in the package contents are present.

3.2. Assembly (if required)

The main cabinet components are typically pre-assembled. Follow the specific instructions provided in your package for attaching any additional components such as handles, mirrors, or optional drawer units.

3.3. Drawer Removal and Installation

For plumbing access or maintenance, drawers may need to be removed. To remove a drawer, locate the release levers on the drawer slides (typically one on each side). Press down on one lever and lift up on the other simultaneously, then pull the drawer out. To reinstall, align the drawer slides with the cabinet slides and push firmly until they click into place.

3.4. Plumbing Considerations

Ensure that your drain lines are positioned appropriately for the vanity's design. Some installations may require adjusting drain pipe height to accommodate drawers. Consult a qualified plumber for any modifications to existing plumbing.

3.5. Mirror Installation

Mount the included square wall mirror securely to the wall above the vanity using appropriate hardware for your wall type. Ensure it is level and at a suitable height.

4. OPERATION

4.1. Using Drawers and Doors

The vanity features soft-closing drawers and doors. To open, gently pull the brushed nickel handles. To close, push gently, and the soft-close mechanism will engage, preventing slamming.

4.2. Storage Capacity

Utilize the 13 dovetail storage drawers and internal shelving for organizing bathroom essentials. Distribute weight evenly within drawers and on shelves.

5. MAINTENANCE & CARE

5.1. Cleaning the Vanity

Wipe the vanity surfaces with a damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. For the ceramic top, use standard non-abrasive bathroom cleaners.

5.2. Protecting the Wood Finish

While the vanity is moisture-resistant, promptly wipe away any standing water to prevent long-term damage. Avoid placing hot items directly on the ceramic top without protection.

5.3. Hardware Care

Periodically check and tighten any loose screws on handles, hinges, or drawer glides. Clean brushed nickel handles with a soft, dry cloth.

6. TROUBLESHOOTING

6.1. Drawers Not Closing Smoothly

- Check for obstructions in the drawer slides.
- Ensure the drawer is properly aligned on its tracks.
- Verify that the soft-close mechanism is not damaged or jammed.

6.2. Water Leaks

- Immediately shut off the water supply.
- Inspect all plumbing connections under the sink for loose fittings or damaged seals.
- If unable to resolve, contact a qualified plumber.

6.3. Mirror Appears Distorted

- Ensure the mirror is mounted flat against the wall and not warped.
- Check for any external factors causing distortion, such as uneven lighting.
