CyberPower GC201

CyberPower GC201 Heavy-Duty Extension Cord User Manual

Model: GC201

1. Introduction

The CyberPower GC201 is a heavy-duty, 6-inch extension cord designed to expand your power options. It features a single NEMA 5-15P male plug that converts into two NEMA 5-15R grounded outlets, providing additional space for power adapters on power strips, surge protectors, or wall outlets. This product is intended for indoor use to optimize outlet utilization.

2. Product Features

- **Space-Saving Design:** Frees up space on power strips, surge protectors, or wall taps by accommodating bulky AC adapters.
- **Dual Grounded Outlets:** Converts one outlet into two NEMA 5-15R grounded outlets.
- **Heavy-Duty Construction:** Features a durable 6-inch cord and impact-resistant casing for extended product life.
- **Electrical Rating:** 125V/13A, suitable for various indoor electronic devices.

3. Safety Information

WARNING: To reduce the risk of electric shock, fire, or injury, please read and follow all instructions carefully.

- Do not exceed the electrical rating of 125V/13A.
- For indoor use only. Do not expose to moisture or use in wet conditions.
- Ensure the plug is fully inserted into the outlet.
- Do not use with ungrounded outlets or adapters.
- Keep children away from the extension cord and connected devices.
- Do not use if the cord or casing is damaged.
- Avoid running the cord under carpets, rugs, or furniture.

4. Setup

The CyberPower GC201 is designed for simple plug-and-play operation.

1. Identify an available NEMA 5-15R grounded outlet on your power strip, surge protector, or wall.
2. Insert the NEMA 5-15P male plug of the GC201 into the chosen outlet, ensuring a secure connection.
3. The two NEMA 5-15R female outlets on the GC201 are now ready for use.

This image displays the CyberPower GC201 Heavy-Duty Extension Cord, highlighting its 6-inch length, the NEMA 5-15P male plug, and the two NEMA 5-15R female grounded outlets.

5. Operating Instructions

Once the CyberPower GC201 is securely plugged into an existing outlet, you can connect up to two devices to its female outlets. This is particularly useful for:

- Connecting bulky power adapters (wall warts) that would otherwise block adjacent outlets on a power strip.
- Extending access to an outlet that is partially obstructed or difficult to reach.
- Increasing the number of available outlets from a single wall receptacle.

The extension cord is shown in use, plugged into a power strip. Its compact design allows for a large power adapter to be connected to an adjacent outlet without obstruction, maximizing the use of the power strip.

This image illustrates the CyberPower GC201 connected to a power strip. It effectively extends two outlets, making space for bulky power adapters that would otherwise block multiple ports.

6. Maintenance

The CyberPower GC201 requires minimal maintenance.

- Ensure the cord and outlets are free from dust and debris.
- Periodically inspect the cord for any signs of damage, such as cuts, fraying, or exposed wires. Discontinue use immediately if damage is found.
- Clean the exterior with a dry, soft cloth. Do not use liquid cleaners.

7. Troubleshooting

If you experience issues with your CyberPower GC201, consider the following:

- **No Power to Devices:**
  - Check if the GC201 is securely plugged into the wall or power strip.
  - Verify that the original wall outlet or power strip is receiving power.
  - Ensure the devices are properly plugged into the GC201 outlets.
  - Confirm that the total power draw of connected devices does not exceed the 13A rating.
- **Loose Connection:** If plugs feel loose, ensure they are fully inserted. If the issue persists, inspect the outlets for damage.

If troubleshooting steps do not resolve the issue, contact CyberPower customer support.

8. Specifications

Model Number	GC201
Cord Length	6 inches (0.5 feet)
Input Plug	NEMA 5-15P (3-prong grounded)
Output Outlets	2 x NEMA 5-15R (3-prong grounded)
Voltage Rating	125V
Current Rating	13A
Product Dimensions	1.9 x 8.9 x 1.2 inches
Item Weight	2.4 ounces
Color	Black
Manufacturer	CyberPower Systems

9. Warranty and Support

The CyberPower GC201 Heavy-Duty Extension Cord is backed by a **1-Year Manufacturer Warranty**. For warranty claims, technical support, or further assistance, please contact CyberPower Systems directly through their official website or customer service channels.

Please retain your proof of purchase for warranty validation.
