SETUP AND INSTALLATION

The Fackelmann Double Hook is designed for easy, tool-free installation on glass shower walls.

1. **Verify Glass Thickness:** Ensure your shower glass wall has a thickness between 0.24 and 0.3 inches (0.6 to 0.8 cm). The hook is specifically designed for this range.

2. **Clean the Surface:** Before installation, clean the top edge of the glass wall where the hook will be placed to ensure a secure fit and prevent debris from scratching the glass.
3. **Position the Hook:** Gently slide the hook over the top edge of the glass shower wall. The soft protection inside the hook is designed to prevent scratches and provide a snug fit.
4. **Secure Placement:** Ensure the hook is fully seated and stable on the glass wall before hanging any items.

MAINTENANCE

To maintain the appearance and functionality of your Fackelmann Double Hook:

- **Cleaning:** Wipe the hook regularly with a soft, damp cloth. For stubborn spots, a mild soap solution can be used. Avoid abrasive cleaners or scouring pads, as these can scratch the stainless steel finish.
- **Drying:** After cleaning, dry the hook thoroughly to prevent water spots and maintain its luster.
- **Inspection:** Periodically inspect the soft protective lining inside the hook for wear. While designed for durability, extreme conditions or improper use can affect it over time.

TROUBLESHOOTING

If you encounter any issues with your Fackelmann Double Hook, consider the following:

- **Hook is Loose:** Ensure the glass wall thickness is within the specified range (0.24-0.3 inches or 0.6-0.8 cm). If the glass is too thin, the hook may not sit securely.

- **Scratches on Glass:** The hook includes a soft protective lining. If scratches occur, verify that the lining is intact and that no foreign particles were trapped between the hook and the glass during installation.
- **Items Falling Off:** Check that the total weight of items hung on the hook does not exceed the 35-pound limit. Ensure items are properly balanced on the hooks.
