## 5. CARE AND MAINTENANCE

---

Regular cleaning and maintenance will ensure the longevity and optimal performance of your Winco microwave oven.

### Cleaning the Exterior:

- Wipe the exterior surfaces with a soft, damp cloth and mild detergent.

- For stainless steel, use a specialized stainless steel cleaner and polish in the direction of the grain to prevent streaks.
- Do not use abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the finish.

### Cleaning the Interior:

- After each use, wipe the interior with a soft, damp cloth to remove food splatters.
- For stubborn food residue, place a bowl of water with a few lemon slices inside the oven and heat on high for 2-3 minutes. The steam will loosen the residue, making it easier to wipe clean.
- Clean the door seals and surrounding areas regularly to ensure a proper seal.
- Do not immerse the appliance in water or spray water directly into the oven.

### General Care:

- Always unplug the oven before cleaning or performing any maintenance.
- Ensure the oven is completely dry before plugging it back in and using it.
- Do not attempt to repair or modify the oven yourself. Refer to qualified service personnel for any repairs.
