# Kotobukiya Marvel Lady Loki Bishoujo Statue MK199 User Manual

Model: MK199

## INTRODUCTION

---

This manual provides essential instructions for the setup, display, maintenance, and care of your Kotobukiya Marvel Lady Loki Bishoujo Statue, model MK199. Please read these instructions carefully to ensure proper handling and long-lasting enjoyment of your collectible figure.

The Lady Loki Bishoujo Statue depicts Loki in her female form, as seen after Ragnarok in Norse mythology. This figure is a reproduction of Shunya Yamashita's design, featuring a detailed sculpt and revised coloring. The base of this statue is designed to connect with the Marvel Thor (Jane Foster) Bishoujo Statue, allowing for a dynamic display when both figures are owned.

## SETUP AND ASSEMBLY

---

Follow these steps for safe unboxing and assembly of your statue:

- Unboxing:** Carefully remove the statue and all its components from the packaging. Retain the original packaging for future storage or transport.
- Component Check:** Verify that all parts are present and undamaged. The statue typically includes the main figure and a display base.
- Base Attachment:** Gently attach the figure to its designated display base. Ensure the connection points align correctly to prevent damage. Do not force parts together.
- Optional Connection:** If you possess the Marvel Thor (Jane Foster) Bishoujo Statue, the bases of both figures can be connected for a combined display. Align the connecting features on the bases and gently push them together until secure.

**Placement:** Place the assembled statue on a stable, level surface away from direct sunlight, excessive heat, humidity, or areas prone to vibrations. Direct sunlight can cause color fading over time.

## DISPLAY AND HANDLING

---

To maintain the condition of your statue, observe the following guidelines:

- **Handling:** Always handle the statue by its base or main body. Avoid touching delicate parts such as horns, hair, or thin accessories, as these can be fragile.
- **Stability:** Ensure the statue is placed in a location where it cannot be easily knocked over.

- **Environmental Factors:** Keep the statue away from extreme temperature fluctuations, high humidity, and direct sunlight to prevent material degradation or discoloration.

## MAINTENANCE AND CLEANING

---

Regular cleaning will help preserve the appearance of your statue:

- **Dusting:** Use a soft, dry brush (such as a makeup brush) or a microfiber cloth to gently remove dust from the surface. For intricate areas, canned air can be used carefully.
- **Spot Cleaning:** For stubborn marks, lightly dampen a cotton swab with distilled water and gently wipe the affected area. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as

these can damage the paint or material.

- **Avoid Solvents:** Do not use alcohol, paint thinners, or other chemical solvents, as they can dissolve paint or damage the plastic.

## TROUBLESHOOTING

---

If you encounter any issues with your statue, consider the following:

- **Parts Not Fitting:** Ensure you are aligning the parts correctly. Refer to any visual guides on the packaging or product images. Do not apply excessive force, as this can break connection pegs or damage the figure.
- **Figure Instability:** Check that the figure is fully seated on its base and that the base is on a flat, stable surface. If the base is connected to another figure's base, ensure both connections are secure.
- **Dust Accumulation:** If dust is difficult to remove from crevices, use a soft brush with very fine bristles or a gentle stream of compressed air.
