TP-Link RE350

TP-Link AC1200 Wi-Fi Range Extender RE350 User Manual

MODEL: RE350

Image: Front view of the TP-Link RE350 Wi-Fi Range Extender, showing its compact design and how it plugs into a standard wall outlet.

1. Introduction

The TP-Link AC1200 Wi-Fi Range Extender RE350 is designed to expand your existing Wi-Fi network coverage, eliminating dead zones and improving signal strength throughout your home or office. It supports dual-band Wi-Fi (2.4GHz and 5GHz) for faster speeds and includes a Gigabit Ethernet port for wired

connections. This manual provides instructions for setting up, operating, maintaining, and troubleshooting your RE350 device.

2. Package Contents

- AC1200 Wi-Fi Range Extender RE350
- RJ-45 Ethernet Cable
- Quick Installation Guide

3. Physical Overview

Familiarize yourself with the components of your RE350 range extender:

Image: Angled view of the RE350, highlighting the top-mounted Gigabit Ethernet port, side buttons (Reset, LED, ON/OFF), and ventilation.

LED Indicators

- **Power LED:** Indicates the power status of the device.
- **2.4GHz LED:** Indicates the status of the 2.4GHz Wi-Fi band.
- **5GHz LED:** Indicates the status of the 5GHz Wi-Fi band.
- **Signal LED Ring:** Displays the signal strength received from the main router.

4. Setup

Step 1: Power On

Plug the RE350 into a power outlet near your main router. Wait for the Power LED to turn solid blue.

Step 2: Optimal Placement

The Intelligent Signal LED Ring helps you find the best location for your range extender. A blue light indicates a strong connection to your router, while a red light indicates a weak connection. Place the extender between your router and the Wi-Fi dead zone.

Image: Diagram illustrating the meaning of the Signal LED Ring: Blue for a good connection and Red for a bad connection.

Step 3: Connect to the Network (Two Methods)

Method 1: Using the WPS Button (Recommended)

1. Press the WPS button on your main router.
2. Within two minutes, press the WPS button on the RE350.
3. The Signal LED Ring on the RE350 should turn solid blue, indicating a successful connection.

Method 2: Using a Web Browser

1. Connect your computer or mobile device to the RE350's Wi-Fi network (e.g., 'TP-Link_Extender').
2. Open a web browser and enter <http://tplinkrepeater.net> or the IP address (refer to the Quick Installation Guide).
3. Follow the on-screen instructions to create a login password and select your main Wi-Fi network to extend.
4. Confirm the settings, and the RE350 will restart and connect to your network.

5. Operating Modes

Range Extender Mode

In this mode, the RE350 wirelessly connects to your existing router and extends its Wi-Fi signal to areas with weak or no coverage. Devices connect to the RE350's extended network.

Access Point Mode

The RE350 can function as an Access Point (AP). Connect the RE350 to your router via an Ethernet cable, and it will create a new Wi-Fi network, converting your wired connection into a wireless one. This is useful for adding Wi-Fi capability to a wired-only network or creating a separate Wi-Fi network.

Gigabit Ethernet Port Usage

The RE350 features a Gigabit Ethernet port. This port allows you to connect a wired device, such as a smart TV, gaming console, or desktop computer, directly to the extender, providing a stable and high-speed wired connection to your extended wireless network.

Image: Diagram illustrating various devices (media player, game console, music player, USB device) connecting to the RE350 via its Gigabit Ethernet port for a stable wired connection.

6. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the device. Do not use liquid cleaners.
- **Firmware Updates:** Periodically check the TP-Link website for firmware updates to ensure optimal performance and security.
- **Placement:** Avoid placing the extender near sources of interference such as microwaves, cordless phones, or large metal objects.

7. Troubleshooting

- **No Power:** Ensure the extender is securely plugged into a working power outlet.
- **Weak Signal (Red Signal LED):** Relocate the extender closer to your main router until the Signal LED turns blue.
- **Cannot Connect to Extended Network:** Verify that the extender is successfully connected to your main router (blue Signal LED). Restart both the router and the extender.
- **Slow Speeds:** Ensure optimal placement. Consider connecting wired devices directly to the extender's Gigabit Ethernet port for better performance.
- **Forgotten Password:** Perform a factory reset by pressing and holding the Reset button for 5-10 seconds while the device is powered on.

8. Specifications

Brand	TP-Link
Model Number	RE350
Wireless Type	802.11a/b/g/n/ac
Frequency Band Class	Dual-Band (2.4GHz & 5GHz)
Ethernet Port	1x Gigabit Ethernet Port
Special Feature	Intelligent Signal LED Ring
Operating System Compatibility	Microsoft Windows XP, Vista, 7/8/8.1/10; Mac OS; NetWare; UNIX; Linux

Item Weight	1.2 pounds
Product Dimensions	2.95 x 4.9 x 1.69 inches
Color	White
Voltage	5 Volts

9. Warranty and Support

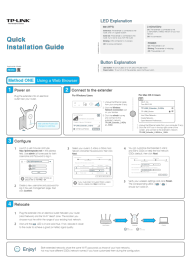

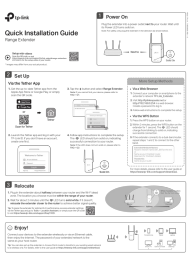

TP-Link provides leading support for its products. The RE350 comes with a **2-year warranty** and **24/7 unlimited technical support**.

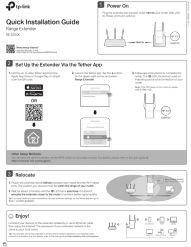

For technical assistance, please contact TP-Link support:

- **Phone:** 1-866-225-8139
- **Email:** support.usa@tp-link.com

Please have your product model number (RE350) and purchase information ready when contacting support.
