# Hama Universal 8-in-1 Remote Control User Manual

Model: 00012307

For TV, DVD, Blu-ray, VCR, Satellite Receivers, AUX, DVBT, CBL, AM devices

## 1. INTRODUCTION

---

The Hama Universal 8-in-1 Remote Control is designed to consolidate control of up to eight different audio/video devices into a single, convenient unit. This remote is pre-programmed with a vast library of codes for most popular AV device manufacturers, offering multiple programming methods to ensure compatibility with your home entertainment system. It also includes special features for Smart TVs and advanced control options.

## 2. PRODUCT OVERVIEW

---

### 2.1 Key Features

- Controls up to 8 devices: TV, DVD, Blu-ray, VCR, satellite receivers, AUX, DVBT, CBL, AM.
- Supports direct code input, manual code search, and automatic code search.
- Compatible with many brands including LG, Sony, Samsung, Sharp, Panasonic, Philips.
- Dedicated color-coded keys for Teletext functions and auxiliary devices.
- Two special buttons for Smart TV and App menu access.
- Macro Power function: Simultaneously turn two AV devices on/off.
- Channel Punch-Through: Bypass current device to change channels on a second device.
- Volume Punch-Through: Bypass current device to adjust volume on a second device.
- Power saving function: Automatic shutdown after 15 seconds of continuous button press.
- Code memory function: Programmed codes remain stored for up to 10 minutes during battery replacement.

### 2.2 Remote Control Layout

Figure 2.1: Angled view of the Hama Universal 8-in-1 Remote Control, showcasing its button layout and sleek black design.

**Figure 2.2:** Close-up view of the Hama Universal 8-in-1 Remote Control's central navigation and playback buttons, including the "OK" button, directional pads, and dedicated Smart TV and Apps buttons at the bottom.

The remote features clearly labeled buttons for device selection (AUX, DVBT, CBL, AMP, TV, DVD, SAT, VCR), numerical input, channel and volume control, playback functions, and navigation. Special buttons for Smart TV and Apps are located at the bottom.

## 3. SETUP

### 3.1 Battery Installation

The Hama Universal 8-in-1 Remote Control requires two AAA batteries (not included). Follow these steps to install them:

1. Locate the battery compartment on the back of the remote control.
2. Slide the battery compartment cover downwards to open it.
3. Insert two AAA batteries, ensuring the correct polarity (+ and -) as indicated inside the compartment.
4. Slide the battery compartment cover back into place until it clicks securely.

**Note:** When replacing batteries, all programmed codes will remain stored for up to 10 minutes, allowing for convenient battery changes without reprogramming.

**Figure 3.1:** Rear view of the Hama Universal 8-in-1 Remote Control, clearly showing the battery compartment cover at the bottom.

## **3.2 Programming Your Devices**

The remote offers three methods to program your devices. It is recommended to try Direct Code Entry first, as it is often the quickest method.

### **3.2.1 Direct Code Entry**

This method uses a specific 4-digit code for your device's brand. Refer to the included code list or the product information section online for a comprehensive list of codes.

1. Turn on the device you wish to program (e.g., TV, DVD player).
2. Press and hold the **SETUP** button on the remote until the red indicator light illuminates.
3. Press the device button (e.g., **TV**, **DVD**) corresponding to the device you are programming. The red indicator light will flash once and then remain lit.
4. Enter the 4-digit code for your device's brand using the number buttons. After entering the last digit, the red indicator light should turn off.
5. Test the remote by pressing the **POWER** button. If the device turns off, the programming was successful. If not, repeat the process with another code from the list for your brand, or try a different programming method.

### 3.2.2 Manual Code Search

If direct code entry is unsuccessful, you can manually search through the remote's built-in code library (up to 350 codes per device type).

1. Turn on the device you wish to program.
2. Press and hold the **SETUP** button until the red indicator light illuminates.
3. Press the device button (e.g., **TV**, **DVD**) corresponding to the device you are programming. The red indicator light will flash once and then remain lit.
4. Repeatedly press the **POWER** button (or **PROG+** / **PROG-**) on the remote. Each press sends a new code. Observe your device for a response (e.g., turning off, changing channel).
5. Once your device responds, immediately press the **SETUP** button to save the code. The red indicator light will turn off.
6. Test the remote's functions (e.g., volume, channel change) to confirm successful programming.

### 3.2.3 Automatic Code Search

This method automatically scans through the remote's code library until a compatible code is found.

1. Turn on the device you wish to program.
2. Press and hold the **SETUP** button until the red indicator light illuminates.
3. Press the device button (e.g., **TV**, **DVD**) corresponding to the device you are programming. The red indicator light will flash once and then remain lit.
4. Press the **POWER** button once. The remote will begin automatically scanning through codes, indicated by the red light flashing continuously.
5. Point the remote at your device and wait for it to respond (e.g., turn off, change channel).
6. As soon as your device responds, immediately press any button (e.g., **OK**, **EXIT**) to stop the automatic search and save the code. The red indicator light will turn off.
7. Test the remote's functions to confirm successful programming.

## 4. OPERATING INSTRUCTIONS

---

### 4.1 Basic Operation

To control a specific device, first press the corresponding device button (e.g., **TV**, **DVD**) at the top of the remote. The remote will then send commands for that selected device. For example, to change the channel on your TV, press the **TV** button, then use the **PROG+** / **PROG-** buttons.

**Figure 4.1:** The Hama Universal 8-in-1 Remote Control positioned on a desk, ready for use with a display monitor, illustrating its compact and user-friendly design in a typical home setup.

## 4.2 Smart TV Functions

The remote includes two dedicated buttons for enhanced Smart TV functionality:

- **SMART TV Button:** Press this button to directly access your Smart TV's main interface or home screen.
- **APPS Button:** Use this button to quickly open the applications menu on your Smart TV, allowing you to browse and launch installed apps.

## 4.3 Special Functions

### 4.3.1 Macro Power

The Macro Power function allows you to turn two AV devices on or off simultaneously with a single button press. This is useful for turning on your TV and a connected sound system at the same time.

*(Specific setup instructions for Macro Power are typically found in the full manual's code list section. Generally, it involves assigning two device codes to a single power command.)*

### 4.3.2 Channel Punch-Through

With Channel Punch-Through, the **PROG+** / **PROG-** commands can bypass the currently controlled device and change the channels of a second, pre-selected device. All other commands will still control the primary selected device.

*(Specific setup instructions for Channel Punch-Through are typically found in the full manual's code list section. This feature is often configured during the initial programming phase.)*

### 4.3.3 Volume Punch-Through

Similar to Channel Punch-Through, the Volume Punch-Through function allows the **VOL+** / **VOL-** commands to bypass the currently controlled device and adjust the volume of a second, pre-selected device. All other commands will continue to control the primary selected device.

*(Specific setup instructions for Volume Punch-Through are typically found in the full manual's code list section. This feature is often configured during the initial programming phase.)*

## 5. MAINTENANCE

### 5.1 Cleaning

To clean your remote control, use a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Do not use abrasive cleaners, solvents, or alcohol, as these can damage the remote's surface or internal components.

### 5.2 Battery Replacement

Replace the batteries when the remote's response becomes sluggish or the indicator light does not illuminate. As mentioned in Section 3.1, the remote retains programmed codes for up to 10 minutes during battery replacement, allowing for a quick and seamless change.

## 6. TROUBLESHOOTING

| Problem                                       | Possible Cause   | Solution  |
|---|--|---|
| Remote does not operate device.               | Incorrect code programmed; batteries are low or incorrectly inserted; remote not pointed at device; device is off. | Ensure batteries are correctly inserted and charged.<br>Reprogram the device using Direct Code Entry, Manual Code Search, or Automatic Code Search (Section 3.2).<br>Ensure the remote is pointed directly at the device's IR receiver.<br>Ensure the device is powered on. |
| Some functions do not work after programming. | The programmed code is a partial match; device may not support all functions via universal remote.                 | Try another code for your device's brand from the code list.<br>Some advanced functions may require the original remote.  |
| Red indicator light does not illuminate.      | Batteries are dead or incorrectly inserted.  | Replace batteries with new AAA batteries.<br>Check battery polarity.  |
| Remote turns off automatically.               | Power saving function activated.   | This is normal behavior if a button is pressed for more than 15 seconds (e.g., remote stuck between sofa cushions). Release the button.   |

## 7. SPECIFICATIONS

| Feature            | Detail   |
|--------------------|--|
| Model Number       | 00012307   |
| Compatible Devices | TV, DVD, Blu-ray, VCR, Satellite Receivers, AUX, DVBT, CBL, AM (up to 8 devices)                                 |
| Compatible Brands  | LG, Sony, Samsung, Sharp, Panasonic, Philips, and many more.   |
| Power Source       | 2 x AAA Batteries (not included)   |
| Connector Type     | Infrared   |
| Material Type      | Plastic  |
| Product Dimensions | 23 x 14 x 3.8 cm   |
| Item Weight        | 130 g  |
| Special Features   | Universal, Smart TV buttons, Macro Power, Channel Punch-Through, Volume Punch-Through, Power Saving, Code Memory |

## 8. WARRANTY AND SUPPORT

For warranty information, please refer to the documentation provided with your purchase or contact your retailer. For technical support or further assistance with programming, please visit the official Hama website or contact Hama customer service directly.
