## Evenflo Cristine

# Evenflo Cristine Stroller User Manual

Model: Cristine

## INTRODUCTION

---

This manual provides essential instructions for the safe assembly, operation, and maintenance of your Evenflo Cristine Stroller. The Evenflo Cristine Stroller is designed for convenient and lightweight travel, featuring a compact one-hand fold, a secure 5-point harness, and a safety bar for your child's comfort and security. Please read this manual thoroughly before using the product and retain it for future reference.

## IMPORTANT SAFETY INFORMATION

**WARNING:** Failure to follow these warnings and instructions could result in serious injury or death.

- Always secure your child with the 5-point harness.
- Never leave your child unattended in the stroller.
- Do not overload the storage basket or hang items on the handle, as this may cause the stroller to tip.
- Ensure the stroller is fully open and locked before placing a child inside.
- Engage the brakes when parking the stroller.
- Do not use the stroller on stairs or escalators.
- The stroller is suitable for children weighing between 2.2 kg (4.8 lbs) and 18 kg (40 lbs). The maximum recommended weight is 23 kg (50 lbs).

- Discontinue use if the stroller becomes damaged or broken.

## SETUP AND ASSEMBLY

---

The Evenflo Cristine Stroller requires minimal assembly. Follow these steps to prepare your stroller for use:

1. **Unfolding the Stroller:** Release the folding latch (if present) and pull the handle upwards until the frame locks into place. Ensure both sides are securely locked.
2. **Attaching the Wheels:** Insert the front and rear wheels into their respective slots until they click securely. Pull on the wheels to ensure they are firmly attached.
3. **Attaching the Canopy:** Slide the canopy attachments onto the frame until they snap into position.
4. **Installing the Safety Bar:** Attach the safety bar to the designated slots on the stroller frame until it clicks.

*Image 2: Side view of the Evenflo Cristine Stroller, illustrating the frame and wheel assembly.*

## OPERATING INSTRUCTIONS

---

### Folding the Stroller

The Cristine Stroller features a convenient one-hand folding system:

1. Ensure the child is removed from the stroller.
2. Engage the brakes.
3. Locate the one-hand fold mechanism (usually on the handle or side of the frame).
4. Activate the mechanism and push the handle forward or downward until the stroller collapses.
5. Secure the folding latch to keep the stroller compact for storage or transport.

### **Adjusting the Seat Recline**

The stroller seat offers 3 recline positions for your child's comfort:

1. Locate the recline adjustment lever or strap behind the seat.
2. Squeeze or lift the lever/strap and adjust the seat to the desired position.
3. Release the lever/strap to lock the seat in place. Ensure it is securely locked before placing your child in the stroller.

*Image 3: Front view of the Evenflo Cristine Stroller seat, showing the harness and safety bar.*

## Securing Your Child

Always use the 5-point harness and safety bar to secure your child:

1. Place your child in the seat.
2. Bring the shoulder straps over your child's shoulders and the waist straps around their hips.
3. Insert the buckle tongues into the buckle housing until they click.
4. Adjust the straps to ensure a snug fit, leaving no more than one finger's width between the strap and your child.
5. Ensure the safety bar is securely attached across the child's lap.

## Using the Brakes

The stroller is equipped with rear wheel brakes:

- To engage the brakes, press down firmly on the brake levers located on the rear wheels.
- To release the brakes, lift the levers upwards.
- Always engage the brakes when the stroller is stationary.

## MAINTENANCE

---

Regular maintenance ensures the longevity and safe operation of your stroller.

- **Cleaning Fabric:** Spot clean fabric parts with a mild soap and cold water. Air dry. Do not bleach.
- **Cleaning Frame:** Wipe the frame with a soft, damp cloth. Dry thoroughly.
- **Wheel Maintenance:** Periodically check wheels for debris and clear them. Lubricate moving parts of the wheels and suspension with a silicone-based lubricant if necessary.
- **Inspections:** Regularly check all fasteners, rivets, and straps for security and wear. Replace worn or damaged parts immediately.

## TROUBLESHOOTING

| Problem                                  | Possible Cause   | Solution   |
|--|--|--|
| Stroller does not fold easily.           | Folding mechanism is jammed or not fully disengaged.               | Ensure all items are removed from the stroller. Check for obstructions in the folding mechanism. Apply light pressure while activating the fold. |
| Wheels are difficult to turn or lock up. | Debris in wheel mechanism, brakes engaged, or lack of lubrication. | Clear any debris from the wheels and axles. Ensure brakes are fully disengaged. Apply a silicone-based lubricant to moving parts of the wheels.  |

| Problem                                     | Possible Cause                           | Solution   |
|---|--|--|
| Harness is difficult to buckle or unbuckle. | Buckle mechanism is dirty or misaligned. | Clean the buckle with a damp cloth. Ensure buckle tongues are inserted correctly. Do not force the buckle. |
