2. SAFETY INFORMATION

- This product is recommended for ages 36 months to 3 years. Adult supervision is recommended for younger children.
- Do not operate the RC car near people, pets, or obstacles to prevent accidents.
- Avoid operating in wet conditions or on wet surfaces to prevent damage to electronic components.
- Do not touch the moving wheels or parts during operation.
- Always turn off the car and remote control when not in use.
- Remove batteries from both the car and remote control if storing for extended periods.
- Use only the recommended battery types and ensure correct polarity during installation.
- Do not mix old and new batteries, or different types of batteries.
- Keep small parts and batteries out of reach of young children to prevent choking hazards.

3. PACKAGE CONTENTS

Verify that all items are present in your package:

- 1x RC Lamborghini Veneno Sport Racing Car
- 1x 27MHz Remote Control

4. SETUP

4.1 Battery Installation (RC Car)

1. Locate the battery compartment on the underside of the RC car.
2. Using a screwdriver, open the battery compartment cover.
3. Insert 3 "AA" batteries (not included) into the compartment, ensuring correct polarity (+/-).
4. Replace the battery compartment cover and secure it with the screw.

4.3 Powering On

- Turn the ON/OFF switch on the RC car to the "ON" position.
- Turn the ON/OFF switch on the remote control to the "ON" position.
- The car and remote should automatically pair. If the car does not respond, turn both off and then on again.

5. OPERATING INSTRUCTIONS

5.1 Remote Control Functions

The 27MHz remote control features two joysticks for intuitive operation:

- **Left Joystick:** Controls forward and reverse movement.
 - Push forward to move the car forward.
 - Pull backward to move the car in reverse.
- **Right Joystick:** Controls left and right turns.
 - Push left to turn the car left.
 - Push right to turn the car right.

5.2 Functional Lights

- The car features realistic headlights and taillights.
- White headlights illuminate when the car moves forward.
- Red taillights illuminate when the car moves in reverse.

5.3 Shock Suspension System

The RC car is equipped with a shock suspension system and rubber tires to absorb impacts and provide a smoother ride on various surfaces.

5.4 Fine Tune Adjustment

If the car does not drive straight, use the fine-tune adjustment switch located on the bottom of the car. Adjust it slightly left or right until the car maintains a straight path.

6. MAINTENANCE

- **Cleaning:** Wipe the car and remote control with a soft, dry cloth. Do not use water or chemical cleaners.
- **Storage:** Store the RC car and remote in a cool, dry place away from direct sunlight. Remove all batteries if storing for extended periods to prevent leakage.
- **Battery Care:** Always dispose of used batteries responsibly according to local regulations.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Car does not move or respond to remote.	Batteries are low or incorrectly installed. Car or remote is turned off. Interference from other 27MHz devices.	Replace batteries in both car and remote, ensuring correct polarity. Ensure both car and remote are switched to "ON". Move to a different location or turn off other 27MHz devices.
Car drives crooked.	Steering alignment needs adjustment.	Use the fine-tune adjustment switch on the bottom of the car to correct the steering.
Short operating range.	Low batteries in remote or car.	Replace batteries in both the car and remote control.

8. SPECIFICATIONS
