Bose 761682-1110

Bose Lifestyle 600 Home Entertainment System User Manual

Model: 761682-1110

INTRODUCTION

The Bose Lifestyle 600 Home Entertainment System is designed to deliver rich, immersive sound for your music, movies, and TV. This system integrates advanced technologies to provide a multi-dimensional audio experience throughout your home. This manual provides essential information for setting up, operating, and maintaining your system.

WHAT'S IN THE BOX

Upon unboxing your Bose Lifestyle 600 system, verify that all components are present:

- Acoustimass wireless bass module
- Jewel Cube speakers (4)
- Center channel speaker
- Console
- Universal remote
- Wireless surround speaker receivers
- Power supply
- Necessary cables

Figure 1: All components included with the Bose Lifestyle 600 system.

SETUP

Setting up your Lifestyle 600 system involves connecting the console to your television and other devices, positioning the speakers, and pairing wireless components. The Unify technology provides guided onscreen messages to simplify the process.

1. Console Connections

Connect your television and other audio/video sources (e.g., cable box, Blu-ray player) to the console using HDMI cables. The console features 6 HDMI inputs for versatile connectivity.

Figure 2: Rear panel of the console with connection ports.

2. Speaker Placement

Position the four Jewel Cube satellite speakers and the center channel speaker in your room for optimal surround sound. The wireless bass module can be placed discreetly within the room.

Figure 3: Example of a Bose Lifestyle 600 system setup in a living room.

3. Wireless Components

The Acoustimass wireless bass module and wireless rear surround speakers connect wirelessly to the console, simplifying cable management. Ensure they are within range of the console for stable connection.

Figure 5: Jewel Cube satellite speakers.

OPERATING THE SYSTEM

The Lifestyle 600 system offers multiple ways to control your entertainment experience.

1. Universal Remote Control

The included universal remote with an LED display allows you to control the Lifestyle 600 system and connected devices. Follow the onscreen prompts during setup to program the remote for your specific components.

Figure 7: Using the universal remote control.

2. Voice Control with Amazon Alexa

The system works with Amazon Alexa-enabled devices, allowing for hands-free voice control of your music. Enable the Bose skill in the Alexa app to set up any SoundTouch speaker and control playback with voice commands.

Your browser does not support the video tag.

Video 1: Demonstrates how to control Bose SoundTouch speakers using Amazon Alexa voice commands, including playing music, checking what's playing, and playing music everywhere.

3. SoundTouch App

Utilize the SoundTouch app on your smartphone or tablet for additional control over your music services and system settings. This app allows you to manage your favorite music, explore new content, and control multiple SoundTouch speakers throughout your home.

MAINTENANCE

To ensure the longevity and optimal performance of your Bose Lifestyle 600 system, follow these general maintenance guidelines:

- Keep the system components clean by wiping them with a soft, dry cloth. Avoid using liquid cleaners or solvents.
- Ensure proper ventilation around the console and bass module to prevent overheating.
- Protect the speakers and console from direct sunlight, excessive heat, and moisture.
- Regularly check cable connections to ensure they are secure.

TROUBLESHOOTING

If you encounter issues with your Lifestyle 600 system, consider the following common troubleshooting steps:

- **No Power:** Verify that all power cables are securely connected to the console, bass module, and power outlets.
- **No Sound:** Check all audio connections between the console and your TV/source devices. Ensure the correct input is selected on the console and TV. Confirm speaker cables are properly connected.
- **Remote Not Responding:** Replace the batteries in the universal remote. Ensure there are no obstructions between the remote and the console.
- **Wireless Connection Issues:** Ensure the wireless bass module and surround speaker receivers are powered on and within range of the console. Re-pair them if necessary according to the system's onscreen instructions.
- **Distorted Audio:** Check audio source quality. Ensure speaker wires are not frayed or shorting. Adjust volume levels.

For more detailed troubleshooting, refer to the official user manual PDF or contact Bose customer support.

SPECIFICATIONS

Feature	Detail
Model Name	Lifestyle 600
Speaker Type	Satellite
Special Feature	Bass Boost, Wireless
Recommended Uses For Product	For Surround Sound Systems, For Televisions
Compatible Devices	Television, Laptop
