## 4. ASSEMBLY INSTRUCTIONS

---

Follow these steps to assemble your 3D puzzle:

1. **Sort Pieces:** Carefully sort and group your puzzle pieces by color, shape, and image details. The more organized your pieces are, the easier the assembly process will be. Be sure to put aside any pieces with red dots, as these are manufacturing scraps and not part of the actual 3D puzzle. Keep these scraps until the end of the build to ensure no actual puzzle pieces are discarded.
2. **Assemble Flat Sections:** Before going 3D, you must assemble all your pieces into several flat jigsaw puzzle sections to form the various parts of the buildings.
3. **Go 3D!** Once all sections are assembled, refer to the detailed instructions provided in the leaflet or online for step-by-step guidance on how to connect them to form the complete 3D model.
