PureAction WP-2022 Water Softener Shower Head Instruction Manual

Model: WP-2022

INTRODUCTION

Thank you for choosing the PureAction WP-2022 Water Softener Shower Head. This product is designed to enhance your showering experience by filtering out harmful substances and minerals from your water supply. It features a powerful 2-stage filtration system that reduces chlorine, fluoride, dissolved minerals, sediments, and heavy metals found in hard water. This manual provides essential information for the proper installation, operation, maintenance, and troubleshooting of your new shower head.

This image displays the PureAction Water Softener Shower Head, highlighting its internal filtration components and the water flow. It illustrates the product's primary function of filtering water.

SETUP AND INSTALLATION

The PureAction WP-2022 Shower Head is designed for easy installation and connects to any standard 1/2-inch NPT shower arm. No special tools are typically required.

Installation Steps:

- 1. Prepare the Shower Arm:** Ensure your existing shower arm is clean and free of debris. If replacing an old shower head, unscrew it counter-clockwise.
- 2. Apply Teflon Tape:** Wrap the included Teflon tape (sealant tape) clockwise around the threads of your shower arm 3-5 times. This helps prevent leaks.
- 3. Attach the Shower Head:** Carefully screw the PureAction shower head onto the shower arm clockwise. Hand-tighten until snug. Do not overtighten, as this can damage the threads or the shower head.

4. **Check for Leaks:** Turn on the water and check for any leaks around the connection. If leaks occur, tighten slightly more or reapply Teflon tape.

This diagram illustrates the simple process of replacing the filter cartridge in the PureAction Shower Head. It shows the shower head unscrewed into its main components, emphasizing the ease of maintenance, which is similar to initial assembly.

OPERATING INSTRUCTIONS

Your PureAction shower head features three adjustable spray settings for a customized showering experience.

Adjusting Spray Settings:

- To change the spray mode, gently rotate the shower head's face or the designated selector ring (if present) to cycle through the available settings.
- The three settings typically include: **Rain** (a gentle, full-coverage spray), **Massage** (a focused, invigorating stream), and a **Combo** mode (combining elements of both).

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your PureAction shower head.

Filter Cartridge Replacement:

- The water filter cartridge should be replaced every 6 to 8 months, or sooner if you notice a decrease in water pressure or filtration effectiveness.
- To replace, unscrew the shower head from the shower arm. Then, carefully separate the shower head components to access the old filter cartridge. Insert a new PureAction replacement cartridge and reassemble.
- Replacement cartridges can be purchased separately.

Cleaning the Shower Head:

- Periodically clean the nozzle jets to prevent mineral buildup and maintain consistent water flow.
- You can gently rub the silicone nozzles with your finger or a soft brush to dislodge any deposits. For stubborn buildup, a solution of white vinegar and water can be used to soak the shower head (after removing the filter cartridge) for a few hours before scrubbing.

TROUBLESHOOTING

If you encounter issues with your PureAction shower head, refer to the following common problems and solutions:

- **Low Water Pressure:**
 - **Check Filter:** A clogged filter cartridge is the most common cause of low pressure. Replace the filter if it's been 6-8 months or longer since the last replacement.
 - **Clean Nozzles:** Mineral buildup in the nozzle jets can restrict water flow. Clean the nozzles as described in the

Maintenance section.

- **Water Supply:** Ensure your home's main water supply valve is fully open.
- **Leaks from Connection:**
 - **Tighten Connection:** Ensure the shower head is securely hand-tightened onto the shower arm.
 - **Reapply Teflon Tape:** Unscrew the shower head, remove old Teflon tape, and reapply fresh tape 3-5 times clockwise around the shower arm threads before reattaching.
- **Water Not Filtering Effectively:**
 - **Replace Filter:** The filter cartridge may have reached the end of its lifespan. Replace it with a new PureAction cartridge.
 - **Verify Installation:** Ensure the filter cartridge is correctly seated within the shower head assembly.

SPECIFICATIONS

Feature	Detail
Brand	PureAction
Model Number	WP-2022
Part Number	SH888
Product Dimensions (L x W x H)	10.16 x 7.62 x 12.7 cm (4 x 3 x 5 inches)
Weight	172.37 grams
Material	Plastic, Stainless Steel
Finish Type	Chrome
Installation Type	Wall Mount
Color	Silver
Shape	Round
Number of Settings	3 (Rain, Massage, Combo)
Number of Jets	1 (multi-function)
Flow Rate	2.4 GPM
Special Features	2-stage purification filtration system, Adjustable swivel ball joint, High-pressure settings, Universal fitting
Included Components	Shower head with filter, 2 replacement cartridges, Sealant tape
UPC	700362762744
