Instant Pot 211-0005-01

Instant Pot 2-Pack Sealing Ring Instruction Manual

Model: 211-0005-01 | Brand: Instant Pot

INTRODUCTION

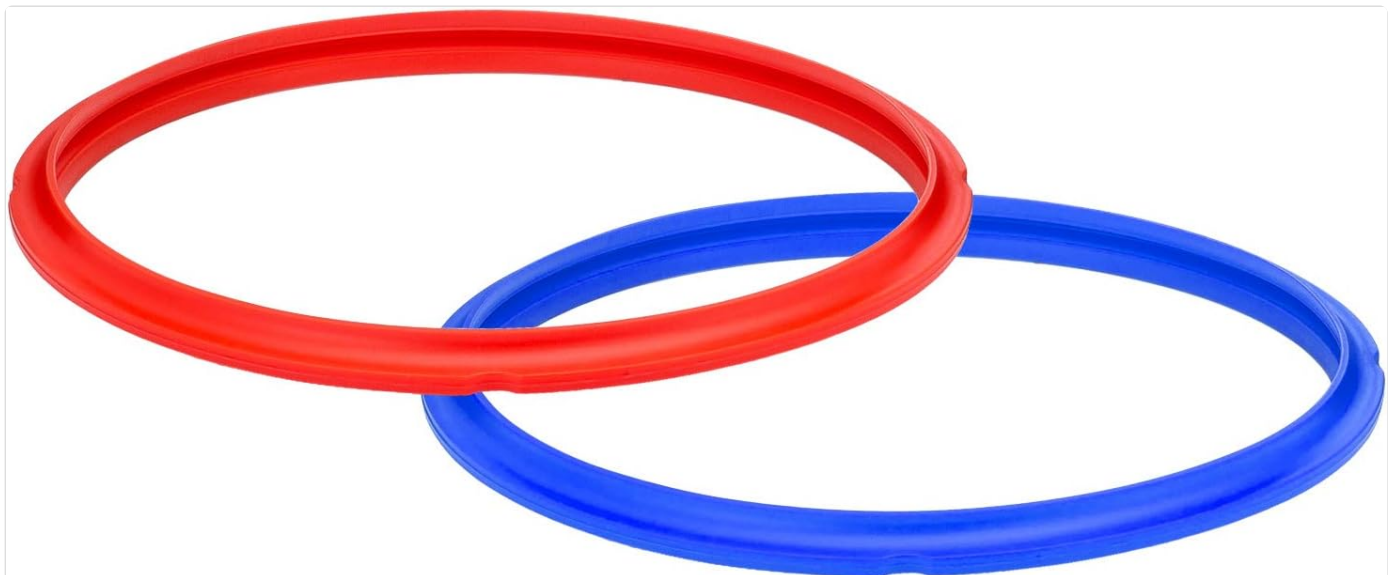

The authentic Instant Pot sealing ring is an integral part of the Instant Pot safety mechanism. It is designed, engineered, and built with optimal material to achieve the hardness and strength required to withstand high-pressure force during electric pressure-cooking. Instant Pot sealing rings have passed UL, FDA, and LFGB tests for safety, including food safety. To ensure your Instant Pot cooker continues to perform as it was meant to, only use Instant Pot authentic sealing rings with your Instant Pot cooker.

COMPATIBILITY

These genuine Instant Pot multi-use programmable pressure cooker sealing rings are designed for the 5 or 6 quart models, including IP DUO50, IP DUO60, IP LUX50, IP LUX60, IP LUX60V3, Smart 60, Ultra 6, IP CSG60, and IP CSG50.

SETUP: INSTALLING THE SEALING RING

To install the sealing ring, carefully fit it into the groove on the underside of your Instant Pot lid. Ensure it is seated firmly and evenly around the entire circumference. A properly installed ring is crucial for maintaining pressure during cooking.

The image shows how to correctly position the silicone sealing ring within the lid of your Instant Pot. Ensure the ring is seated firmly in the

groove.

Watch this video for a quick guide on installing and caring for your Instant Pot sealing rings, highlighting the benefits of using separate rings for different food types.

OPERATING: BEST PRACTICES

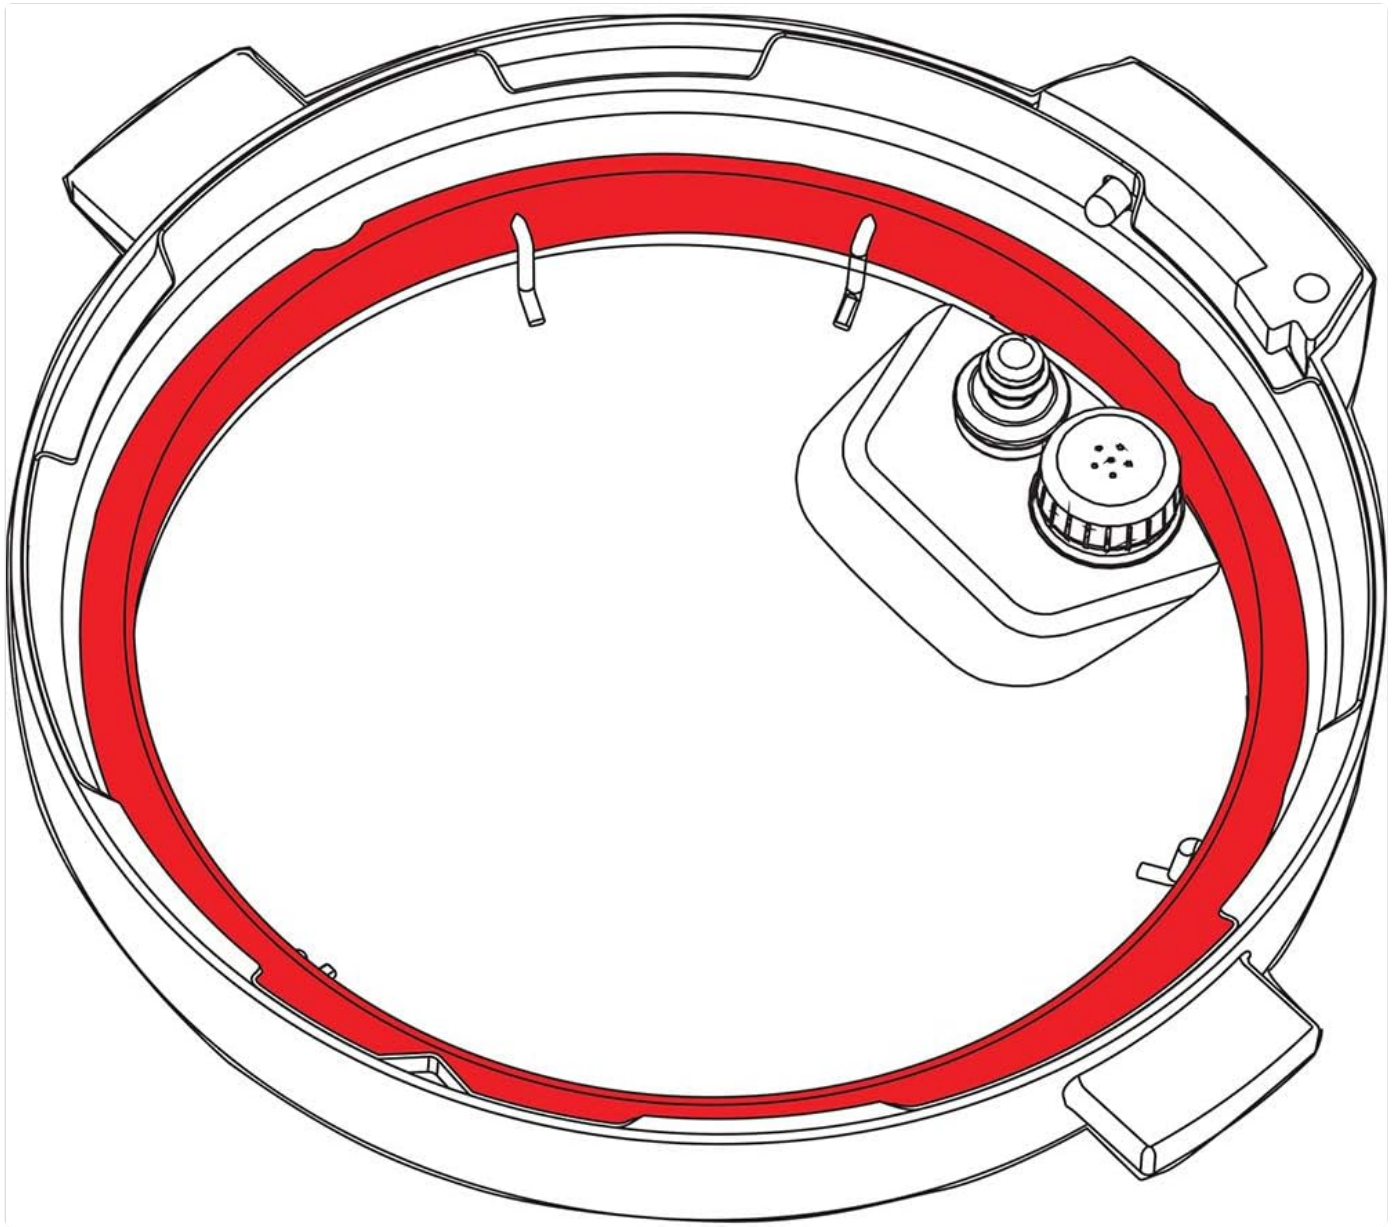

This 2-pack color set allows you to use one ring for sweet and dairy foods (e.g., the blue ring) and the other for savory foods (e.g., the red ring). This practice helps prevent flavor transfer between different types of dishes. Always ensure the sealing ring is clean and free of debris before each use to maintain a proper seal.

This video provides an overview of the Instant Pot sealing rings, demonstrating their proper placement and function to ensure optimal pressure cooking performance.

MAINTENANCE: CLEANING AND REPLACEMENT

The Instant Pot sealing rings are easy-to-clean and dishwasher safe. After each use, remove the ring from the lid and wash it thoroughly with warm, soapy water or place it in the dishwasher. Ensure it is completely dry before re-installing or storing. It is recommended to replace your Instant Pot sealing ring every 12-18 months. To avoid discoloration and odors, you may wish to change the sealing ring every 6-12 months, especially if you frequently cook strong-smelling foods.

Regular cleaning of your sealing rings is crucial. The image displays the two colored rings, ready for washing. They are dishwasher safe for convenience.

TROUBLESHOOTING

- **Steam Leaks:** If steam is leaking from your Instant Pot lid, ensure the sealing ring is correctly installed and not damaged. A worn or improperly seated ring can cause leaks.
- **Odor Retention:** Silicone rings can absorb odors from strong-smelling foods. Using separate rings for savory and sweet dishes, as provided in this 2-pack, helps mitigate this. Regular and thorough cleaning is also essential.
- **Loose Fit:** Over time, silicone rings can become softer and lose their snug fit. If your ring feels loose or stretched, it may be time for a replacement to ensure proper pressure sealing.
- **Discoloration:** Discoloration is normal with use, especially when cooking with spices like turmeric. While discoloration does not typically affect performance, it may indicate it's time for a replacement if accompanied by other issues.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Instant Pot

Feature	Detail
Capacity	6 Quarts (compatible with 5 & 6 Quart models)
Material	Silicone
Color	Red/Blue (2-pack)
Product Dimensions	8.7"D x 8.7"W x 5"H
Special Feature	Dishwasher Safe
Item Weight	1.4 Ounces
Item Model Number	211-0005-01
UPC	853084004316

WARRANTY AND SUPPORT

Using authentic Instant Pot sealing rings is crucial for maintaining the safety and performance of your Instant Pot pressure cooker. Unapproved third-party sealing rings may cause damage or compromise safety features.
