Mayflower Products Pro Size Jewelry Polishing and Cleaning Cloth Instruction Manual

Model: J1114GW

1. INTRODUCTION

This manual provides detailed instructions for the proper use and care of your Mayflower Products Pro Size Polishing Cleaning Cloth. Designed for gold (14k and 18k), silver, and platinum jewelry, coins, and other fine valuables, this cloth effectively cleans, shines, and protects your items by removing tarnish and restoring their original brilliance. It also helps prevent new tarnish formation.

The Mayflower Products polishing cloth is made from pure cotton and is treated with non-toxic, environmentally friendly ingredients, ensuring safe use for both your valuables and the environment.

2. PRODUCT OVERVIEW AND COMPONENTS

The Mayflower Products Pro Size Polishing Cleaning Cloth features a two-step system for optimal cleaning and polishing:

- **Inner White Layer:** This section of the cloth is dry-impregnated with non-toxic cleaning agents. It is designed for effective cleaning and tarnish removal.
- **Outer Gray Layer:** This untreated flannel layer is used for a final buff, removing any remaining residue and imparting a brilliant shine.

Both layers are made of ultra-soft cotton, ensuring gentle treatment for delicate and valuable items. The cloth measures 11 x 14 inches when opened, providing ample surface for various item sizes.

3. OPERATING INSTRUCTIONS

Follow these steps to clean and polish your valuables:

1. **Preparation:** Ensure the item to be cleaned is dry and free from loose dirt.
2. **Cleaning and Tarnish Removal (White Layer):** Gently rub the item with the inner white portion of the cloth. Apply light to moderate pressure, depending on the level of tarnish. The cleaning agents embedded in the white cloth will lift away dirt and tarnish. No additional pastes or solutions are required.
3. **Buffing and Shining (Gray Layer):** After cleaning with the white layer, use the untreated gray flannel side of the cloth to gently buff the item. This step removes any residual cleaning agents and enhances the shine, restoring the item's brilliance.

For best results, always use a clean section of the cloth. The cloth is effective on a variety of metals and items:

- Gold (14k and 18k)
- Silver

- Platinum
- Jewelry (rings, necklaces, bracelets, earrings)
- Coins
- Silverware
- Watches
- Silver musical instruments
- Antiques

Cleans all of your fine jewelry

4. MAINTENANCE AND CARE

To ensure the longevity and effectiveness of your Mayflower Products Polishing Cleaning Cloth, please observe the following care instructions:

- **Do Not Wash:** It is crucial that the polishing cloth is **never washed**. Washing will remove the embedded cleaning agents, rendering the cloth ineffective.
- **Reusability:** The cloth is designed for multiple uses. Its lifespan depends on the size and number of items cleaned. Continue using it as long as it effectively cleans and polishes.

- **Storage:** Store the cloth in a clean, dry place, preferably in its original packaging or a sealed bag, to protect it from dust and moisture.

5. TROUBLESHOOTING

- **Item not shining sufficiently:** Ensure you are using the white inner layer first for cleaning and tarnish removal, then the gray outer layer for buffing. Apply gentle, consistent pressure. If the cloth is heavily soiled or no longer effective, it may be time to replace it.
- **Residue left on item:** This typically indicates that the buffing step with the gray layer was insufficient. Re-buff the item gently with the clean gray side of the cloth until all residue is removed and a brilliant shine is achieved.
- **Cloth appears dirty but not cleaning:** The cloth is designed to absorb tarnish and dirt, so it will darken with use. This does not necessarily mean it is ineffective. However, if cleaning performance significantly diminishes, the cleaning agents may be depleted, and the cloth should be replaced.

6. SPECIFICATIONS

Feature	Detail
Model Number	J1114GW
Product Dimensions (Opened)	11 x 14 inches (28 x 35.5 cm)
Material	100% Pure Cotton Flannel
Cleaning Agents	Non-toxic, dry-impregnated
Suitable Metals	Gold (14k, 18k), Silver, Platinum
Origin	Made in USA
