## CARE AND MAINTENANCE

---

Regular cleaning and maintenance will ensure the longevity and optimal performance of your microwave oven.

### Exterior Cleaning

Wipe the exterior surfaces with a soft, damp cloth. Avoid using harsh detergents or abrasive cleaners, as they can damage the finish.

### Interior Cleaning

Clean the interior cavity, door seals, and turntable regularly. For spills, wipe immediately with a damp cloth. For stubborn food residue, place a bowl of water with a few lemon slices inside and microwave for 2-3 minutes. The steam will loosen the residue, making it easier to wipe clean. The glass turntable tray can be removed and washed with warm, soapy water.

### Odor Removal

To remove odors, place a bowl containing a mixture of water and lemon juice or baking soda in the oven and microwave for several minutes. This will help neutralize unpleasant smells.
