Azio MK-MAC-U01

Azio MK-MAC-U01 USB Mechanical Backlit Keyboard for Mac User Manual

Model: MK-MAC-U01

Brand: Azio

INTRODUCTION

This manual provides detailed instructions for the Azio MK-MAC-U01 USB Mechanical Backlit Keyboard, designed specifically for Mac users. It covers essential information for setup, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your device.

PACKAGE CONTENTS

- Azio MK-MAC-U01 USB Mechanical Backlit Keyboard
- User Guide (This manual)
- Palm Rest

The Azio MK-MAC-U01 keyboard and included palm rest.

SETUP

Connecting the Keyboard

1. Unpack the Azio MK-MAC-U01 keyboard and its components from the packaging.
2. Connect the USB cable from the keyboard to an available USB port on your Mac computer.
3. The keyboard is plug-and-play and should be automatically recognized by your Mac operating system.

Attaching the Palm Rest

The included palm rest can be attached to the front edge of the keyboard for enhanced ergonomic support during typing. Align the palm rest with the keyboard and gently push to secure it.

OPERATING INSTRUCTIONS

Mac Layout and Function Keys

The keyboard features a dedicated Mac layout, including function keys for quick access to various Mac features such as Mission Control and Launchpad.

Mechanical Key Switches

The keyboard utilizes Kailh Brown mechanical switches, offering a tactile typing experience without a loud click. This design provides a responsive feel while maintaining a quieter operation compared to clicky switches.

MAINTENANCE

Cleaning the Keyboard

To clean the keyboard, disconnect it from your computer. Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution. Avoid excessive moisture. For cleaning between keycaps, use compressed air or a small brush.

Keycap Removal (Advanced Users)

Keycaps can be carefully removed for deeper cleaning or replacement using a keycap puller. Exercise caution to avoid damaging the key switches.

TROUBLESHOOTING

Keyboard Not Responding

- Ensure the USB cable is securely connected to both the keyboard and your Mac.
- Try connecting the keyboard to a different USB port.
- Restart your Mac computer.
- Test the keyboard on another computer to rule out a system-specific issue.

Backlight Not Working

- Check the backlight brightness settings using the dedicated function keys (e.g., F1, F2).
- Ensure the keyboard is properly connected and receiving power.

Keys Sticking or Not Registering

- Clean around and under the affected keycap using compressed air to remove any debris.
- If the issue persists, carefully remove the keycap and inspect the switch for any obstructions.
