Natalie Styx NS8001B

Natalie Styx NS8001B Slow Masticating Juicer Extractor

User Manual

Important Safeguards

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Read all instructions before operating the juicer.
- Do not immerse the motor base in water or other liquids.
- Ensure the appliance is unplugged before assembling, disassembling, or cleaning.
- Keep hands and utensils out of the feeding chute during operation to prevent injury.
- Do not operate the appliance if the power cord or plug is damaged.
- This appliance is for household use only.
- Ensure all parts are correctly assembled and locked into place before operation. The juicer will not operate if the cover is not locked.

Product Overview

The Natalie Styx NS8001B Slow Masticating Juicer Extractor is designed to efficiently extract juice from fruits and vegetables, preserving nutrients and flavor. It features a wide feeding chute and a quiet AC motor.

Image: The Natalie Styx Slow Masticating Juicer Extractor, silver and black, shown with a pitcher of orange juice, lemons, grapes, and mint leaves.

Key Features:

- **High Juice Yield:** Designed to extract up to 70% more juice and vitamins compared to traditional juicers.
- **Wide Feeding Chute (76mm):** Accommodates whole fruits and vegetables, reducing preparation time.
- **Food-Grade Materials:** Constructed with Tritan material and BPA-free components.
- **Easy Assembly and Cleaning:** Parts are designed for simple assembly and disassembly, with a reverse rotation (REV) button to clear residues. Includes a cleaning brush.
- **Quiet 240W AC Motor:** Operates efficiently with reduced noise.
- **Safety Guaranteed:** Features a safety lock system that prevents operation if the cover is not properly secured.
- **Multiple Juicing Nets:** Includes fine net for pure juice, thick net for pulpier juice, and a smoothie net for milkshakes.

Image: An internal view of the juicer's motor, labeled 'Pure Copper AC Motor', emphasizing its high juice yield, stable operation, and overheating protection.

Included Components:

Image: All components of the Natalie Styx juicer laid out on a white surface, including the motor base, feeding chute, auger, juicing nets, juice jug, pulp collector, pusher, and cleaning brush.

- Main Machine (Motor Base)
- Pusher
- Feeding Chute
- Juicing Screw (Auger)
- Juicing Nets (Fine, Thick, Smoothie)
- Rotation Wiper
- Juice Container (1000ML)
- Pulp Collector
- Cleaning Brush
- User Manual

Setup and Assembly

Follow these steps to correctly assemble your Natalie Styx juicer:

1. Place the motor base on a stable, flat surface.
2. Align the juicing bowl with the motor base, ensuring the arrow on the bowl aligns with the unlock symbol on the base. Rotate clockwise until it clicks into the lock symbol.
3. Insert the desired juicing net (fine, thick, or smoothie) into the juicing bowl. Ensure it sits securely.
4. Place the rotation wiper assembly over the juicing net.
5. Insert the juicing screw (auger) into the center of the juicing net and rotation wiper assembly.
6. Attach the feeding chute assembly to the top of the juicing bowl, aligning the arrow on the chute with the lock symbol on the bowl. Rotate clockwise until it locks securely.
7. Place the juice container and pulp collector under their respective spouts.

Video: This video demonstrates the assembly process for the Natalie Styx Slow Masticating Juicer. It shows how to correctly place each component onto the motor base, including the juicing bowl, filter, auger, and feeding chute, ensuring proper locking mechanisms are engaged.

Operating Instructions

Once assembled, operating your juicer is straightforward:

1. Ensure the juicer is properly assembled and plugged into a power outlet.
2. Prepare your fruits and vegetables. While the wide chute can handle whole items, cutting larger or fibrous produce into smaller pieces (e.g., kale, celery) can optimize juicing and prevent clogging. Remove hard seeds or pits.
3. Turn the juicer ON using the power switch.
4. Slowly feed the prepared ingredients into the feeding chute. Use the pusher only if necessary to guide ingredients down, avoiding excessive force.
5. The juicer will automatically separate juice into the juice container and pulp into the pulp collector.
6. After juicing, turn the appliance OFF and unplug it.

Video: This video demonstrates the juicing process with the Natalie Styx Slow Masticating Juicer. It shows various fruits being fed into the wide chute, the extraction of juice, and the separation of pulp, highlighting the efficiency and ease of use.

Cleaning and Maintenance

Regular cleaning ensures optimal performance and longevity of your juicer. All removable parts are recommended for hand washing only.

1. After use, turn off and unplug the juicer.
2. Press the 'REV' (Reverse Rotation) button for a few seconds to help clear any remaining pulp or residue from the auger and juicing net.
3. Disassemble the juicer by rotating the feeding chute and juicing bowl counter-clockwise to unlock and remove them from the motor base.
4. Separate all removable parts: feeding chute, pusher, juicing bowl, juicing net, rotation wiper, and auger.
5. Rinse all parts under running water. Use the included cleaning brush to remove pulp from the juicing net and other components.
6. Wash parts with warm, soapy water. Rinse thoroughly.
7. Dry all parts completely before reassembling or storing.
8. Wipe the motor base with a damp cloth. Do not immerse the motor base in water.

Troubleshooting

If you encounter issues with your juicer, refer to the following common problems and solutions:

- **Juicer does not turn on:**
  - Ensure the power cord is securely plugged into a working outlet.
  - Verify that all parts are correctly assembled and the feeding chute cover is locked into place. The safety mechanism prevents operation if not properly secured.
- **Low juice yield or excessive pulp:**
  - Ensure you are using the appropriate juicing net for your desired consistency.
  - Feed ingredients slowly and avoid overfilling the chute.
  - Some fruits and vegetables naturally produce more pulp or less juice.
- **Motor stops during operation:**
  - The juicer may have overheated. Turn it off, unplug, and allow it to cool down for at least 30 minutes before restarting.
  - Too much pressure or hard ingredients may have caused a jam. Use the 'REV' button to clear, then disassemble and clean if necessary.
- **Loud noise or vibration:**
  - Check that all components are correctly assembled and securely locked.
  - Ensure the juicer is on a stable, flat surface.

If problems persist, please contact customer support.

Specifications

Feature	Detail
Brand	Natalie Styx
Model Number	NS8001B
Color	Silver
Special Feature	BPA Free, Quiet Motor
Material	Plastic (Tritan)
Wattage	240 watts
Power Source	Corded Electric
Controller Type	Button
Product Care Instructions	Hand Wash Only

Capacity (Juice Container)	1000 ml
Item Weight	16.5 pounds
UPC	758150858896
