## OPERATING THE STAND

### Stability and Work Height

The DW7451 stand is engineered for optimal stability during table saw operation. Ensure the stand is always placed on a level and firm surface. The design provides a suitable work height for most users, contributing to improved control and

reduced fatigue during cutting tasks.

The stand's lightweight and folding design makes it highly portable and easy to store. To fold the stand:

1. First, remove the table saw from the stand by unfastening the mounting hardware.
2. Locate the locking mechanisms on the legs and disengage them.
3. Fold the legs inwards until the stand is flat.
4. The compact, flat profile allows for convenient storage in tight spaces or easy transport to different job sites.
