Before You Begin:

- **Clear Workspace:** Ensure you have a large, clear area for assembly, free from obstructions.

5. OPERATING INSTRUCTIONS

The Acme Tobi Train Twin Bed is designed for straightforward use as a sleeping surface.

- **Mattress Placement:** Once assembled, place a standard twin-size mattress directly onto the included slat system. No box spring is required.
- **Bedding:** Dress the bed with appropriate twin-size bedding.
- **Supervision:** Always supervise young children when they are using the bed, especially during initial use.

6. MAINTENANCE AND CARE

Proper care will extend the life and appearance of your bed.

- **Cleaning:** Wipe down the metal and MDF surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the finish. For the PU padded headboard, use a mild soap solution and a soft cloth, then wipe dry.
- **Hardware Check:** Periodically check all bolts, screws, and connections to ensure they remain tight. Retighten as necessary to maintain stability and safety.
- **Inspection:** Regularly inspect the bed for any signs of wear, damage, or loose parts. Address any issues promptly.
- **Moving the Bed:** When moving the bed, lift it rather than dragging it to prevent damage to the frame and your flooring.

7. TROUBLESHOOTING

If you encounter any issues with your Acme Tobi Train Twin Bed, refer to the following common solutions:

- **Bed is Wobbly:** Ensure all assembly hardware (bolts, screws) are fully tightened. Check that the bed is on a level surface.
- **Squeaking Noises:** Tighten all hardware. If squeaking persists, disassemble and reassemble the affected section, ensuring all parts are correctly aligned. Applying a small amount of lubricant to metal-on-metal contact points can also help.
- **Missing or Damaged Parts:** Do not attempt to use the bed with missing or damaged parts. Contact Acme customer support for replacement parts.
- **Sharp Edges/Burrs:** If any sharp edges are detected on the metal frame, carefully smooth them with a fine-grit sandpaper or file, then clean the area. If the issue is significant, contact customer support.
