Troubleshooting

Common Issues and Solutions:

- **Issue: Bolts not anchoring tightly during assembly.**
  If you experience issues with bolts not securely anchoring into the arm or other parts of the futon, ensure that

the internal housing for the bolt is intact and not stripped. If the housing appears damaged, contact customer support for assistance. Do not force the bolt, as this may cause further damage.

- **Issue: Futon not converting smoothly.**
  Check for any obstructions around the folding mechanism. Ensure the futon is placed on a level surface. If the issue persists, inspect the mechanism for any visible damage or misalignment.
- **Issue: Squeaking noises.**
  Squeaking can sometimes occur from loose connections. Re-tighten all assembly bolts. If the noise continues, it may indicate an issue with the internal frame or springs; contact customer support.
