Amazon Basics SL-SUAM-7

Amazon Basics 4-Shelf Adjustable Heavy Duty Steel Wire Rack Storage Shelving Instruction Manual

Model: SL-SUAM-7

1. Introduction

Thank you for choosing the Amazon Basics 4-Shelf Adjustable Heavy Duty Steel Wire Rack Storage Shelving. This versatile and robust shelving unit is designed to provide efficient storage solutions for various environments, including garages, kitchens, laundry rooms, and more. Its durable alloy steel construction and adjustable shelves ensure long-lasting performance and adaptability to your specific storage needs. Please read this manual carefully before assembly and use to ensure proper installation and safe operation.

2. Product Components

Before beginning assembly, ensure all components are present and undamaged. Refer to the list and image below:

- **Shelf Panels:** 4 pieces, wire construction.
- **Upper Pole Sections:** 4 pieces, threaded at one end.
- **Lower Pole Sections:** 4 pieces, with leveling feet pre-installed or to be installed.
- **Plastic Clips:** Multiple pairs, used to secure shelves at desired heights.
- **Leveling Feet:** 4 pieces (may be pre-installed on lower pole sections).
- **Anti-Tipping Kit:** Includes wall anchors, screws, and a strap for securing the unit to a wall.

3. Setup and Assembly Instructions

This shelving unit is designed for easy, no-tool assembly. Follow these steps:

1. **Prepare the Base:** If not pre-installed, screw the leveling feet into the bottom of the four lower pole sections. Adjust them slightly to ensure stability on your floor surface.
2. **Connect Pole Sections:** Screw the upper pole sections onto the lower pole sections. Ensure they are securely tightened to form four complete vertical poles.
3. **Attach Plastic Clips:** Determine the desired height for your first (bottom) shelf. Snap two halves of a plastic clip around each pole at the same groove level. Ensure the clips are securely locked into the grooves and are at an identical height on all four poles for a level shelf. The poles have 1-inch increment grooves for precise adjustment.
4. **Install First Shelf:** Carefully slide the first wire shelf down over the top of the poles until it rests firmly on the installed plastic clips. Gently tap the corners of the shelf to ensure it is fully seated and level.
5. **Install Remaining Shelves:** Repeat step 3 and 4 for the remaining three shelves, placing plastic clips at your desired heights for each. Always ensure clips are at the same level on all four poles for each shelf.

6. **Final Stability Check:** Once all shelves are installed, gently rock the unit to check for stability. Adjust the leveling feet as needed to eliminate any wobbling.
7. **Optional: Install Anti-Tipping Kit:** For enhanced safety, especially in households with children or pets, use the provided anti-tipping kit to secure the shelving unit to a wall. Follow the instructions included with the kit for proper installation.

4. Usage

This heavy-duty shelving unit is designed for versatile use and high capacity:

- **Weight Capacity:** Each individual shelf can hold up to 350 pounds when weight is evenly distributed. The total weight capacity for the entire unit is 1400 pounds. Do not exceed these limits.
- **Adjustability:** The shelves can be adjusted in 1-inch increments along the poles, allowing you to customize the spacing to accommodate items of various sizes.
- **Versatile Placement:** Ideal for organizing items in a garage, laundry room, kitchen, pantry, playroom, or any other living or work space requiring sturdy storage.

5. Maintenance

To maintain the appearance and longevity of your shelving unit:

- **Cleaning:** Wipe down the shelves and poles with a damp cloth and mild detergent. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Drying:** Ensure all parts are thoroughly dried after cleaning to prevent rust or water spots.
- **Regular Inspection:** Periodically check all connections and clips to ensure they remain secure. Re-tighten or re-seat as necessary.

6. Troubleshooting

If you encounter any issues with your shelving unit, refer to the following common solutions:

- **Uneven or Wobbly Shelf:**
  - Ensure all plastic clips for that shelf are placed at the exact same groove level on each pole.
  - Verify that the shelf is fully seated onto all four clips.
  - Adjust the leveling feet at the bottom of the poles to compensate for uneven floor surfaces.
- **Unit Instability:**
  - Confirm all pole sections are securely screwed together.
  - Check that all shelves are properly installed and seated on their clips.
  - Adjust leveling feet to ensure the unit stands firmly on the floor.
  - Consider installing the anti-tipping kit to secure the unit to a wall, especially if it holds heavy items or is in an area with potential for tipping.

7. Specifications

Feature	Specification
Model Number	SL-SUAM-7
Dimensions (L x W x H)	36" x 14" x 54" (91.4 cm x 35.6 cm x 137.2 cm)
Number of Shelves	4
Material	Alloy Steel
Color	Black
Weight Capacity Per Shelf	350 lbs (evenly distributed)
Total Weight Capacity	1400 lbs
Assembly Required	Yes (No tools needed)
Special Features	Adjustable shelf height, Leveling feet

8. Warranty and Support

For warranty information or product support, please refer to the documentation included with your purchase or visit the official Amazon Basics support page. Keep your purchase receipt for any warranty claims.
