

## LOZ 9048

# LOZ 9048 Nanoblock Santa María Ship Kit Instruction Manual

## INTRODUCTION

---

This manual provides detailed instructions for assembling your LOZ 9048 Nanoblock Santa María Ship Kit. This kit allows you to construct a miniature replica of the historic Santa María ship using 2660 nanoblocks. Please read these instructions carefully before beginning assembly to ensure a smooth and enjoyable building experience.

## SAFETY INFORMATION

---

- **Choking Hazard:** This kit contains small parts and is not suitable for children under 3 years of age. Keep all components away from infants and young children.
- **Adult Supervision:** Adult supervision is recommended during assembly, especially for younger builders.
- **Handling:** Handle small blocks with care to avoid loss.

## ASSEMBLY INSTRUCTIONS

---

### Before You Begin

- Unpack all components and verify that all 2660 pieces are present. Refer to the parts list (if included in your physical instruction booklet).
- Organize your workspace. A clean, well-lit, and flat surface is recommended.
- Familiarize yourself with the different types of nanoblocks and their connection points.

## Step-by-Step Assembly

The assembly process involves connecting nanoblocks according to the included visual guide. Follow the numbered steps provided in your physical instruction booklet carefully. Each step will illustrate which blocks to use and where to place them.

**Tip:** Start by building the base and gradually add layers, ensuring each block is securely connected. Pay close attention to the color and shape of each block as depicted in the instructions.

## DISPLAY AND HANDLING

Once assembled, your LOZ Santa María model is designed for display. Place it on a stable, flat surface away from direct sunlight, excessive heat, and high humidity to preserve its condition.

Handle the model carefully to prevent accidental disassembly. Avoid dropping or applying excessive force to any part of the model, especially delicate sections like masts and sails.

## MAINTENANCE

---

### Cleaning

To clean your assembled model, use a soft, dry brush or a can of compressed air to gently remove dust from the surface. For stubborn dirt, gently wipe with a slightly damp cloth, then dry immediately with a soft, lint-free cloth.

Do not use harsh chemicals, abrasive cleaners, or excessive water, as these may damage the plastic blocks or cause discoloration.

## TROUBLESHOOTING

---

### Missing Pieces

If you find any pieces missing during assembly, carefully re-check your workspace, the packaging, and any discarded materials. If pieces are still missing, please refer to the contact information provided in your product packaging or on the official LOZ website for customer support.

### Difficulty Connecting Blocks

Ensure blocks are aligned correctly before applying gentle, even pressure. If a block is difficult to connect, check for any obstructions, misaligned studs, or if you are attempting to connect an incorrect piece. Refer to the instruction booklet for the correct block placement.

### Model Instability

Verify that all blocks are firmly pressed together. Loose connections can lead to instability. Re-trace your steps to ensure all sections are securely joined, paying particular attention to the base and structural elements.

## SPECIFICATIONS

---

| Feature                        | Detail                                        |
