

Spy Tec GL300MA

Spytec Atlas GL300MA GPS Tracker User Manual

Model: GL300MA | Brand: Spy Tec

1. INTRODUCTION AND OVERVIEW

The Spytec Atlas GL300MA is a compact and versatile GPS tracking device designed for real-time location monitoring of vehicles, assets, children, and seniors. This device provides reliable tracking data through a user-friendly mobile application and web platform, ensuring you stay informed about the whereabouts of your valuable items or loved ones.

Key features include real-time updates as fast as every 5 seconds, up to 14-day battery life, custom boundary alerts (geofencing), and a 'Time Machine' feature to review historical movements. The device operates on 4G LTE networks, offering broad coverage across North America and worldwide with appropriate network settings.

2. WHAT'S IN THE BOX

Your Spytec Atlas GL300MA package should contain the following items:

- Spytec Atlas GL300MA GPS Tracker unit
- Battery (pre-installed or separate)
- USB Charging Cable
- Quick Start Guide

Please inspect all components upon unboxing. If any items are missing or damaged, contact customer support immediately.

3. SETUP INSTRUCTIONS

To begin using your Spytec Atlas GL300MA GPS Tracker, follow these steps:

1. **Charge the Device:** Connect the GPS tracker to a power source using the provided USB charging cable. Ensure the device is fully charged before first use. The PWR indicator light will show charging status.
2. **Download the App:** Download the Spytec GPS mobile application from the iOS App Store or Google Play Store.
3. **Activate Your Subscription:** Open the app and follow the on-screen instructions to create an account and activate your device. A low-cost subscription plan is required for real-time tracking services. Plans start as low as \$22.95/month with long-term prepaid options.
4. **Power On:** Once activated and charged, ensure the device is powered on. The GPS and CEL indicator lights will illuminate to show connectivity.

4. OPERATING INSTRUCTIONS

The Spytec Atlas GL300MA is operated primarily through the dedicated mobile application or web platform. Once your device is set up and active, you can access its features:

- **Real-Time Tracking:** View the current location of your tracker on a map within the app. Updates occur as frequently as every 5 seconds, providing precise, up-to-the-minute information.
- **Time Machine:** Access historical data to review past movements, routes, and stops of your tracker. This feature allows you to see where the tracker was and what was around it at any given point.
- **Custom Boundaries (Geofencing):** Set up virtual boundaries on the map. You will receive instant alerts via the app, email, or text message when the tracker enters or exits these predefined areas. This is useful for monitoring children, seniors, or vehicles.
- **Speed Alerts:** Configure alerts to be notified if the tracker exceeds a specified speed limit, ideal for monitoring teen drivers.
- **Global Coverage:** The 4G Super SIM provides coverage across North America and worldwide. For global tracking outside the USA, ensure you update the Network Mode in the app settings.

5. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Spytec Atlas GL300MA GPS Tracker:

- **Battery Management:** The device offers up to 14 days of battery life. Monitor the battery level through the app and recharge as needed. Consider optional 60 & 90-day battery packs for extended use.
- **Charging:** Use only the provided USB charging cable. Avoid using damaged cables or chargers.
- **Cleaning:** Wipe the device with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place when not in use. Avoid extreme temperatures.
- **Weatherproof Case:** For outdoor or harsh conditions, consider using a weatherproof magnetic case (sold separately) to protect the device.

6. TROUBLESHOOTING

If you encounter issues with your Spytec Atlas GL300MA, try the following:

- **No Location Updates:** Ensure the device is charged and powered on. Check the GPS and CEL indicator lights for proper connectivity. Verify your subscription is active.

- **Inaccurate Location:** Ensure the device has a clear line of sight to the sky for optimal GPS signal reception. Avoid placing it in enclosed metal containers.
- **App Issues:** Try restarting the mobile application or reinstalling it. Ensure your phone's operating system is up to date.
- **Battery Draining Quickly:** Adjust the tracking update frequency in the app settings to a less frequent interval to conserve battery life.

If problems persist, please contact Spytec GPS customer support for assistance.
